Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *PINELLAS* County: **3**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *PINELLAS* County

No Measures/Homes:	185
Arithmetic Mean:	0.4
Standard Deviation:	0.4
Maximum:	4.4
% >4 pCi/L:	0.5
% >8 pCi/L:	-
% >12 pCi/L:	-
Notes on Data Table:	TABLE 2. Indoor radon results from the Florida population-based radon survey, by county.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

This list of drinking water violations and enforcement actions is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database, as part of the national download of Safe Drinking Water Act (SDWA) data. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program, including monitoring, enforcement, and violation data related to requirements established by the SWDA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

This national download of Safe Drinking Water Act (SDWA) data is sourced from the U.S Environmental Protection Agency's (EPA) Enforcement and Compliance History Online (ECHO) system that incorporates Public Water Systems data from EPA's Safe Drinking Water Information System (SDWIS) database. SDWIS contains information on public water systems from the Public Water System Supervision (PWSS) Program related to requirements established by the Safe Drinking Water Act (SDWA). Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey's (USGS) National Water Information System (NWIS) is the nation's principal repository of water resources data. The data includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data. This NWIS database information is obtained through the Water Quality Data Portal (WQP). The WQP

is a cooperative service sponsored by the USGS, the Environmental Protection Agency (EPA), and the National Water Quality Monitoring Council (NWQMC).

State Sources

Florida Subsidence Incident Reports — **SINKHOLES**

A list of Florida Subsidence Incidents made available by the Florida Department of Environmental Protection (DEP) and maintained by the Florida Geological Survey. Sinkholes are closed depressions in areas underlain by soluble rock such as limestone, dolostone, and in some states gypsum and salt. Other subterranean events can cause holes, depressions, or subsidence of the land surface that may mimic sinkhole activity. Commonly, a reported depression is not verified by a licensed professional geologist to be a true sinkhole, and the cause of subsidence is not known. Such an event is called a subsidence incident.

Oil and Gas Wells — **OGW**

The Oil and Gas Program is the permitting authority within the Florida Department of Environmental Protection's Mining and Minerals Regulation Program. Companies interested in exploration or production of hydrocarbons in Florida are regulated by the Oil and Gas Program. This data is made available by Florida Department of Environmental Protection's Oil and Gas program.

Public Water Supply Wells — **PWSW**

The Public Water Supply Wells (PWSW) data consist of public water supply facilities and their wells in Florida, excluding Federally owned facilities. This data is made available by Florida Department of Environmental Protection, Water Compliance Assurance Program.

Underground Injection Control Wells — **UIC**

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Water Use Permits Sites - South Florida Water Management District — **WELLS**

List of Water Use Permitting Facilities consisting of wells, pumps and culverts, made available by the South Florida Water Management District. The facilities represent a subset of all wells, pumps and culverts associated with Water Use Permits. A Water Use Permit is required for all water uses except single family and duplex use and fire fighting.

Water Well Completions - Northwest Florida Water Management District — **WATER WELLS**

A list of existing well permits provided by the Northwest Florida Water Management District, representing records for wells permitted for construction/repair/abandonment beginning in the year 1976; does not typically contain data on wells constructed prior to 1976. The data provided may therefore only represent a fraction of existing wells. The data are provided by water well contractors on completion reports and, in most cases, has not been verified by District staff.

Water Well Completions - St. Johns River Water Management District — **WATER WELLS**

A list of wells in the Water Well Completion Report database made available by the St. Johns River Water Management District (SJRWMD). The SJRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SJRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SJRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Completions - Suwanee River Water Management District — **WELLS**

A list of wells in the Water Well Completion Report database made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data reported in the Water Well Completion Report are obtained from multiple sources, including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Water Well Construction Permits — **WELL CONST PERM**

Appendix

A list of water well construction permits issued by the St. Johns River Water Management District (SJRWMD).

Water Well Construction Permits - Southwest Florida Water Management District **WATER WELLS**

A list of permitted well construction sites within the Southwest Florida Water District (SWFWD) maintained by the Southwest Florida Water Management District (SWFWMD). A Well Construction Permit (WCP) is required prior to installation of a water well within the SWFWD. The WCP ensures that wells are constructed by qualified contractors and meet rigid safety and durability standards. This list includes historical well construction sites that may not have a recorded latitude and longitude for their location. Instead, address matching, quarter STR centroids, STR centroids, or county centroids, were used as the location. WCPs for wells under 4" were strictly enforced after 1990, meaning many domestic wells built before may be excluded from this dataset.

Water Wells - Suwanee River Water Management District **WATER WELLS**

A list of water wells made available by the Suwanee River Water Management District department (SRWMD). The SRWMD advises that data are obtained from multiple sources including SRWMD, delegated counties, and other regulatory agencies; that they cannot assure that contributors have used consistent measurement techniques or adhered to approved quality control standards; and that, although the SRWMD has made reasonable attempts to assure the quality of the data contained herein, in most cases, the information is reported as received.

Well Surveillance Program Water Wells **WATER WELLS**

A list of privately and publicly owned potable wells from the Florida Department of Health's (DOH) Well Surveillance Program.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. FDEP - Registered Tanks from Storage Tank Contamination Monitoring (STCM) Details

Tank No: 9
Size: 20000
Content: Unleaded Gas
Installed: 10/01/2011
Placement: UNDER
Status: In Service
Construction: F - Fiberglass Clad Steel
L - Compartmented
M - Spill Containment Bucket
N - Flow Shut-Off
O - Tight Fill
P - Level Gauges/Alarms
Piping: C - Fiberglass
F - Double Wall
J - Pressurized Piping System
K - Dispenser Liners
Monitoring: 2 - Visual Inspect Pipe Sumps
4 - Visual Inspect Dispenser Liners
F - Monitor Dbl Wall Tank Space
H - Mechanical Line Leak Detector
M - Manual Tank Gauging - Usts

Discharge Cleanup Summary

Discharge Date: 4/11/2005
Cleanup Required: R - CLEANUP REQUIRED
Dschrg Clnup Status: SRCR - SRCR COMPLETE
Dschrg Clnup Stat Dt: 4/5/2012
Cleanup Work Stat: COMPLETED
Tank Office: PCTM6 - PETROLEUM CLEANUP TEAM 6
Information Source: C - CLOSURE REPORT
Eligib Indicator: I - INELIGIBLE
Site Manager: NUSS_JL
Site Manager End Dt: 4/9/2012

Contaminated Media

Contaminated Drinking Wells:
Contaminated Mntring Wells:
Contaminated Soil: YES
Contaminated Surface Water:
Contaminated Ground Water:
Pollutant: B - Unleaded Gas
Other Description:
Gallons Discharged:

Petroleum Cleanup Program Eligibility

Unplottable Summary

Total: 0 Unplottable sites

DB	Company Name/Site Name	Address	City	Zip	ERIS ID

No unplottable records were found that may be relevant for the search criteria.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS), and is limited to those sites where the NPL Status reflects the site is 'Currently on the Final NPL (F)' and/or the 'Site is Part of NPL Site (A)'. These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jun 19, 2025

National Priority List - Proposed: PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jun 19, 2025

Deleted NPL: DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Jun 19, 2025

SEMS List 8R Active Site Inventory: SEMS

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Jun 26, 2025

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Jun 26, 2025

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Sep 1, 2025

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Sep 1, 2025

RCRA Generator List: RCRA LQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste. This list also includes RCRAInfo sites that have notified as LQGs that do not have a registered Site Manager or Certifier in RCRAInfo.

Government Publication Date: Sep 1, 2025

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month. This list also includes RCRAInfo sites that have notified as SQGs that do not have a registered Site Manager or Certifier in RCRAInfo.

Government Publication Date: Sep 1, 2025

RCRA Very Small Quantity Generators List: RCRA VSQG

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Sep 1, 2025

RCRA Non-Generators: RCRA NON GEN

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Sep 1, 2025

RCRA Sites with Controls: RCRA CONTROLS

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Sep 1, 2025

Federal Engineering Controls-ECs: FED ENG

List of Engineering controls (ECs) made availabe by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jul 29, 2025

Federal Institutional Controls- ICs: FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Jul 29, 2025

Land Use Controls Information System: LUCIS

The Land Use Controls Information System (LUCIS) database is sourced from the U.S. Department of the Navy (DON). This data contains information for former Base Realignment and Closure (BRAC) properties across the United States. DON's BRAC office was tasked with tracking certain base closures while requiring the prevention of risks to human health and the environment of those properties with LUCs in place. Regarding currently available LUC Sites data, the sites listing is limited to centroid point locations for the overall installation property boundaries. Formerly obtained LUC Sites data may reflect site details that applied previously for a BRAC property.

Government Publication Date: Jun 13, 2024

Institutional Control Boundaries at NPL sites: NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Jun 19, 2025

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Jun 22, 2025

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan: FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans: DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations: HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries: REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals: BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Jun 5, 2025

LIEN on Property: SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jun 26, 2025

Superfund Decision Documents: SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Jul 29, 2025

State

Superfund Waste Cleanup & State-Funded Action Sites: SHWS

List of hazardous waste cleanup sites participating in various federal and state funded cleanup programs. Florida's State-Funded Action Sites and Superfund Waste Cleanup Sites lists are maintained and made available by the Florida Department of Environmental Protection (FDEP). This database serves a purpose similar to that of the federal Superfund Enterprise Management System (SEMS), functioning as a state-level counterpart for tracking potential hazardous substance release sites.

Government Publication Date: Aug 1, 2025

Delisted State-Funded Action Sites: DELISTED SHWS

This database contains a list of closed hazardous waste sites of various federal and state funded cleanup programs that were removed from the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Aug 1, 2025

ERIC Waste Cleanup: ERIC

Environmental Restoration Integrated Cleanup (ERIC) is a single database for tracking contaminated site cleanup activities in the Florida Department of Environmental Protection (DEP)'s Division of Waste Management (DWM). Includes records from 11 different DEP data systems, allowing tracking of a contaminated site throughout the course of cleanup regardless of which program area took the lead.

Government Publication Date: Aug 8, 2025

Florida Department of Environmental Protection Cleanup Sites: CLEANUP DEP

This Cleanup Sites dataset is provided by the Florida Department of Environmental Protection (FDEP), and the layer is included on the FDEP's Contamination Locator Map (CLM) tool. The data provides locations and document links for sites currently in the cleanup process and sites awaiting cleanup funding. Cleanup programs include Brownfields, Petroleum, EPA Superfund (CERCLA), Drycleaning, Responsible Party Cleanup, State Funded Cleanup, State Owned Lands Cleanup and Hazardous Waste Cleanup.

Government Publication Date: Aug 9, 2025

Waste Cleanup Responsible Party Sites: WCRPS

List of Open, Closed, and Inactive Waste Cleanup Responsible Party sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Apr 11, 2021

Delisted Waste Cleanup Sites: DELISTED WCP

List of sites which once appeared on - and have since been removed from - the list of Waste Cleanup Sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Aug 8, 2025

Solid Waste Facilities and Landfills: SWF/LF

The Solid Waste Facility Inventory Report made available by the Florida Department of Environmental Protection (FDEP) includes all types of authorized and unauthorized facilities: municipal solid waste, landfills, dumps, construction and demolition disposal, recycling facilities, and more.

Government Publication Date: Jun 20, 2025

Leaking Tanks: LST

This list of leaking storage tanks is sourced from the Florida Department of Environmental Protection (FDEP). The Storage Tank and Petroleum Contamination/Cleanup Monitoring (STCM) section is part of the Petroleum Restoration Program (PRP) in the FDEP's Division of Waste Management. The PRP encompasses the technical oversight, management, and administrative activities necessary to prioritize, assess and clean-up sites contaminated by discharges of petroleum and petroleum products from stationary petroleum storage systems. Over 28,000 facilities have reported discharges of petroleum products from storage tank systems. STCM database reports do not include discharges that are not required for Rule 62-780 as well as discharges that have already been cleaned up. Rule 62-780 applies to site rehabilitation conducted at sites contaminated with pollutants, hazardous substances, drycleaning solvents, petroleum and petroleum products. Florida relies on groundwater for about 92 percent of its drinking water needs and has some of the most stringent rules in the country.

Government Publication Date: Apr 21, 2025

Delisted Leaking Tanks: DELISTED LST

Whereas Leaking Tanks (LST) includes only facilities which currently have contamination as recorded by the Florida Department of Environmental Protection, this list contains facilities which were once included in LST data but no longer appear on the list made available by FDEP. Facilities may be removed from the current LST list because the discharge has been cleaned up, or the discharge is not required for 62-770.

Government Publication Date: Aug 1, 2025

Underground Storage Tanks: UST

List of Underground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity. In an effort to minimize the occurrence and environmental risks of releases and discharges, FDEP administers standards pertaining to the construction, installation, operation, maintenance, repair, closure, and disposal of underground storage tank systems that store regulated substances.

Government Publication Date: Aug 9, 2025

Aboveground Storage Tanks: AST

List of Aboveground Storage Tank facilities made available by the Florida Department of Environmental Protection (FL DEP). Includes facilities tracked for active storage tanks, storage tank history, or petroleum cleanup activity.The Florida Department of Environmental Protection (FDEP) provides standards for aboveground storage tanks (ASTs) that have individual storage tank capacities greater than 550 gallons. The state also regulates the registration, construction, installation, operation, maintenance, repair, closure, and disposal of storage tank systems that store regulated substances.
Government Publication Date: Aug 9, 2025

Storage Tank Facilities: TANK

List of storage tank facilities made available by the Florida Department of Environmental Protection (FL DEP) for which tank information is not available. In the case of closed facilities - where all tanks have been removed or closed, and there is also no petroleum discharge or on-going cleanup activity - the owner data may not be current, but rather would represent the most recent information made available to FL DEP.
Government Publication Date: Aug 9, 2025

Delisted AST UST Storage Tanks: DEL UST AST TANK

This database contains a list of closed UST and AST storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.
Government Publication Date: Jul 2, 2015

Delisted Storage Tanks: DEL STORAGE TANK

List of sites that once appeared on - and have since been removed from - the list of UST and AST storage tank facilities made available by the Florida Department of Environmental Protection.
Government Publication Date: Aug 9, 2025

Federal Facilities Listing: FF TANKS

The Florida Department of Environmental Protection (FDEP) Storage Tank Program registers facilities and storage tanks where aboveground or underground storage tanks store pollutants, hazardous substances, and/or mineral acid substances regulated by Chapter 62-761, Florida Administrative Code, or when aboveground storage tanks or compression vessels store a hazardous substance which requires registration according to Chapter 376, Florida Statutes.
Government Publication Date: Jul 25, 2025

Storage Tank/Contaminated Facility Search: STCS

List of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search. Note that tank details do not appear for facilities for which all tanks have been removed.
Government Publication Date: Aug 1, 2025

Institutional Controls Registry: INST

The Institutional Controls registry is maintained by the Florida Department of Environmental Protection (FDEP). The registry aims to help preserve adequate protection of contaminated soil regions and help to minimize any chances of exposure.
Government Publication Date: Aug 1, 2025

Engineering Controls: ENG

A listing of all engineering controls that are in place to eliminate or reduce the potential for contaminant migration and exposure to contaminants. These controls may include caps, barriers, guards or fences. The list is maintained by the Florida Department of Environmental Protection (FDEP).
Government Publication Date: Aug 1, 2025

Voluntary Cleanup Sites: VCP

A listing of active and closed voluntary cleanup sites registered by the Florida Department of Environmental Protection (FDEP).
Government Publication Date: Sep 8, 2025

Brownfield Sites: BROWNFIELDS

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of sites within designated Brownfield Areas within Florida where Brownfield Site Rehabilitation Agreement (BSRA)s have been executed between FDEP and a responsible party.
Government Publication Date: Jun 19, 2025

Brownfield Areas: BROWNFIELD AREA

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of Brownfield Areas, defined by the FDEP as contiguous areas of one or more brownfield sites, some of which may not be contaminated, that have been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. Because a variety of sources and methods were used to derive information for this data, locations are approximate.
Government Publication Date: Jun 19, 2025

Hazardous Waste Facility List: HAZ WASTE FAC
List of Hazardous Waste Financial Assurance Facilities made available by the Division of Waste Management of the Florida Department of Environmental Protection (FDEP). The FDEP's Hazardous waste financial responsibility requirements exist to ensure that certain hazardous waste facilities and transporters have the financial resources available to provide for closure, postclosure and corrective action requirements and/or pay for bodily injury or property damage that might result from accidents, spills or other unexpected events, known as liabilities. These closure, postclosure, corrective action and liability requirements are called financial assurance.
Government Publication Date: Jul 3, 2025

Tribal

Leaking Underground Storage Tanks on Tribal/Indian Lands: INDIAN LUST
This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 21, 2025

Underground Storage Tanks on Tribal/Indian Lands: INDIAN UST
This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 4, which includes Florida, is made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: Apr 21, 2025

Delisted Tribal Leaking Storage Tanks: DELISTED INDIAN LST
Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: May 22, 2025

Delisted Tribal Underground Storage Tanks: DELISTED INDIAN UST
Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).
Government Publication Date: May 22, 2025

No County databases were selected to be included in the search.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data: PFAS GHG

The U.S. Environmental Protection Agency's (EPA) Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO2e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. This dataset is sourced from the EPA's PFAS Analytic Tools, and it includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified as PFAS based on EPA's CompTox Chemicals Dashboard lists of PFAS with defined and undefined structures. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time. Note that some regulatory programs have specified chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard.

Government Publication Date: Jul 25, 2025

On-Scene Coordinator Response Sites: OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: May 6, 2025

Facility Registry Service/Facility Index: FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Jul 1, 2025

Toxics Release Inventory (TRI) Program: TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites: PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Jun 30, 2025

Federal Agency Locations with Known or Suspected PFAS Detections: PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2025 per agency entity dataset. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

Government Publication Date: May 30, 2025

SSEHRI PFAS Contamination Sites: PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: https://pfasproject.com/pfas-sites-and-community-resources/

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills: PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam, "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Sep 1, 2025

PFAS NPDES Discharge Monitoring: PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory: PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data: PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities: PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest: PFAS E-MANIFEST

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Jul 26, 2025

PFAS Industry Sectors: PFAS IND

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Sep 1, 2025

Hazardous Materials Information Reporting System: HMIRS

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act: TSCA

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.
Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN
An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP
An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.
Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP
Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).
Government Publication Date: Jun 26, 2025

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER
The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRD no longer maintains this data, refer to applicable state source data where available.
Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS
The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.
Government Publication Date: May 3, 2025

Drycleaner Facilities: FED DRYCLEANERS
A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.
Government Publication Date: Jul 19, 2025

Delisted Drycleaner Facilities: DELISTED FED DRY
List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).
Government Publication Date: Apr 19, 2025

Formerly Used Defense Sites: FUDS
Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

Government Publication Date: May 15, 2023

FUDS Munitions Response Sites: FUDS MRS

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites: FORMER NIKE

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents: PIPELINE INCIDENT

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites: SMCRA

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System: MRDS

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites: LM SITES

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Tile II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations: ALT FUELS

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 1, 2025

Superfunds Consent Decrees: CONSENT DECREES

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System: AFS

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments: SSTS

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Sep 26, 2025

Polychlorinated Biphenyl (PCB) Transformers: PCBT

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants: POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Jun 5, 2025

Historical Business Activity Risk: HIST RISK

Proprietary list of sites identified as potentially having engaged in business activity that poses a higher-than-normal risk of contamination. Records originate from historical city directories, and are included in this list based on broad business categories Potentially Hazardous Chemical Users and Fuel and Automotive, including but not limited to Dry Cleaners and Fuel Stations, Garages, etc. Inclusion in this listing does not indicate that there is or ever has been contamination; rather, sites are included in this list due to their potential for having engaged in a business activity presenting an elevated risk of contamination. The list was compiled from various city directories including Polks, Millers, Mullin Kille, Interstate Directory, and State Directory Co; spanning roughly 1920s through 1960 depending on information available by city.

Government Publication Date: Jan 1, 1960

State

Priority Ranking List: PRIORITYCLEAN

The Florida Legislature has established a state-funded program to cleanup properties that are contaminated as a result of the operations of a drycleaning facility or wholesale supply facility (Chapter 376, Florida Statutes). The program is administered by the Florida Department of Environmental Protection (FDEP). The statute was sponsored by the drycleaning industry to address environmental, economic, and liability issues resulting from drycleaning solvent contamination. The program provides limited liability protection to the owner, operator and real property owner of drycleaning or wholesale supply facilities for cleanup of drycleaning solvent contamination if the parties meet the eligibility conditions stated in the law.

Government Publication Date: Aug 9, 2025

Dry Cleaning Facilities: DRYCLEANERS

A listing of dry cleaning facilities registered with the Florida Department of Environmental Protection (FDEP). The information contains facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

Government Publication Date: Jun 13, 2025

Delisted Dry Cleaning Facilities: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Florida Department of Environmental Conservation (DEC).

Government Publication Date: Jun 13, 2025

Historical Dry Cleaners: HISTORICAL DRYC

The Florida Department of Environmental Protection (FDEP) provided this historical database of regulated and non-regulated dry cleaning facilities. These facilities were at one time tracked and registered by the FDEP OCULUS Electronic Document Management System as "drums" in the underground storage tank database.

Government Publication Date: Aug 2, 2013

Oil and Hazardous Materials Incidents: SPILLS

Statewide listing of oil and hazardous materials spills and incidents recorded by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Oct 1, 2025

Contaminated Sites: DWM CONTAM

Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM) listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

Government Publication Date: Mar 3, 2025

Delisted Contaminated Sites: DEL CONTAM SITE

List of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

Government Publication Date: Sep 30, 2015

Aqueous Film Forming Foam (AFFF): PFAS AFFF

A list of fire fighter training facilities that use or possibly used Aqueous Film Forming Foam (AFFF). This list is made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: Aug 29, 2024

PFAS Investigation at Federal Facilities: PFAS

List of sites - including Federal Facilities - in Florida at which either a) there has been confirmed or suspected usage of Aqueous Film Forming Foam (AFFF), or b) the Division of Waste Management has identified as a potential source or environmental impact related to per- and polyfluoroalkyl substances (PFAS). The Florida Department of Environmental Protection (DEP) is committed to the protection of the groundwater resources of the state and the public health and safety of residents. The DEP will continue its efforts to investigate and understand PFAS in the environment and the ecological and human health risks associated with PFAS contamination. Listings made available by the Florida Department of Environmental Protection (DEP).

Government Publication Date: Aug 9, 2025

Ground Water Contamination Areas: GW CONTAM

List of areas of known groundwater contamination made available by the Florida Department of Environmental Protection (DEP). 38 counties have been delineated primarily for the agricultural pesticide ethylene dibromide (EDB), and to a much lesser extent, volatile organic and petroleum contaminants. Permitted water wells in these areas must meet specific well construction criteria and water testing prior to well use. This dataset only indicates the presence or absence of specific groundwater contaminants and does not represent all known sources of groundwater contamination in the state of Florida.

Government Publication Date: Jul 12, 2023

Underground Injection Control Wells: UIC

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Government Publication Date: Sep 20, 2025

Well Surveillance Program Facilities: WELL SURVEILLANCE

List of facilities made available by the Florida Health Well Surveillance group. The Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments (CHDs) to locate potable wells and conduct water sampling for contaminants of concern. The Well Surveillance Section is composed of the State Underground Petroleum Environmental Response Act (SUPER Act), Drinking Water Toxics Program (Toxics), Drycleaner Solvent Cleanup Program (DSCP). Includes locations of known cattle dipping vats.

Government Publication Date: Sep 4, 2025

Cattle Dip Vats: CDV SOUTHEAST

A list of Cattle Dip Vats in Southeast Florida made available by the Florida Department of Environmental Protection.

Government Publication Date: Jan 19, 2017

Tier 2 Report: TIER 2

A list of Tier 2 facilities in the state of Florida. The list tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management.

Government Publication Date: Apr 2, 2024

Delisted County Records: DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Aug 22, 2025

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental databases were selected to be included in the search.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Subject: **Site Rehabilitation Completion Order**
Clearwater Automotive Site
205 South Martin Luther King Avenue
Clearwater, Pinellas County, Florida
FDEP Brownfield Site ID # BF529701004
WCU Site ID: COM_258302
WCU Project ID: COM_293981

Dear Ms. Hufford:

The Southwest District has reviewed the Phase II Interim Source Removal Completion Report with proposal for No Further Action (NFA), dated October 21, 2008 (received October 22, 2008), that was prepared by Tampa Bay Engineering, Inc (TBE) for the Clearwater Automotive Site, located at 205 South Martin Luther King Avenue, Clearwater, Pinellas County, Florida. Maps showing the location of the Clearwater Automotive Site and the location of the "contaminated site" (i.e., contaminant plume) for which this Order is being issued are attached as Exhibits 1 and 2 and are incorporated by reference herein. Laboratory analytical results of soil samples collected during the most recent source removal event indicate that contaminants of concern identified in soil at the site are below Residential Cleanup Target Levels found in Chapter 62-777, Florida Administrative Code (F.A.C.); therefore, no restrictions to residential development of the contaminated site are included in this Order based on the criteria in Chapter 62-777, F.A.C., effective April 17, 2005.

The contamination, which resulted from discharges that occurred on September 8, 2005, consisted of volatile organic compounds (acetone, 2-butanone, methylene chloride, and tetrachloroethylene), semi-volatile organic compounds (Benzo(a)Pyrene equivalents), Total Recoverable Petroleum Hydrocarbons, and metals (arsenic, cadmium, chromium, lead, and mercury) in soils. The discharges resulted from operations of a steel foundry and then automotive salvage yard at the site. There was no groundwater contamination encountered during site assessment activities. The Brownfields Site Rehabilitation Agreement (BSRA), BF529701004 (hereinafter *"the Agreement")* was executed by the Department on September 26, 2005, to address the contamination.

The NFA Proposal is supported by earlier submittals, prepared pursuant to the requirements of Chapter 62-785, F.A.C., including, but not limited to:

- Combined Phase II Environmental Site Assessment Report and Brownfield Site Assessment Report, January 2005 (received January 5, 2005).
- Brownfield Site Assessment Report and Interim Source Removal Plan, November 2007 (received November 26, 2007).
- Supplement No. 1, Brownfield Site Assessment Report Addendum and Interim Source Removal Plan, March 2008 (received March 4, 2008).

Based upon the information provided by the City of Clearwater (City), as the Person Responsible for Brownfield Site Rehabilitation (PRFBSR) concerning property located at 205 South Martin Luther King Avenue, Clearwater, Pinellas County, Florida, the Department has reasonable assurance that the City has successfully and satisfactorily implemented the approved brownfield site rehabilitation agreement schedule and program tasks and, accordingly, no further action is required to assure that the land use/redevelopment identified in the Agreement is consistent with existing and proposed uses.

The submittals indicate that soil and groundwater contaminant concentrations are below the applicable Soil Cleanup Target Levels and Maximum Concentration Limits or Groundwater Cleanup Target Levels as adopted in Chapter 62-777, F.A.C., effective date April 17, 2005. See the attached "Soil Analytical Summary" and the "Groundwater Analytical Summary" (Exhibit 3), which are incorporated by reference herein. These tables include information regarding the contaminants that remain at the site, if any, the affected media, and the applicable cleanup target levels for the contaminated site that is the subject of this Order. Therefore, you have satisfied the site rehabilitation requirements for the above-referenced contaminated site and are released from any further obligation to conduct site rehabilitation at the contaminated site, except as set forth below.

Further, in accordance with Chapter 376.82(3), Florida Statutes (F.S.), upon completion of site rehabilitation in compliance with sections 376.77 – 376.85, F.S., additional site rehabilitation is not required unless it is demonstrated that:

> (a) That fraud was committed in demonstrating site conditions or completion of site rehabilitation;
>
> (b) That new information confirms the existence of an area of previously unknown contamination which exceeds the site-specific rehabilitation levels established in accordance with section 376.81, F.S., or which otherwise poses the threat of real and substantial harm to public health, safety, or the environment in violation of the terms of sections 376.77-376.85, F.S.;
>
> (c) That the remediation efforts failed to achieve the site rehabilitation criteria established under section 376.81, F.S.; or
>
> (e) That a new release occurs at the brownfield site subsequent to a determination of eligibility for participation in the brownfield program established under section 376.80, F.S.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under sections 120.569 and 120.57, F.S., within **21** days of receipt of this Order. The procedures for petitioning for a hearing are set forth below.

Persons affected by this Order have the following options:

A. If you choose to accept the Department's decision regarding this SRCO you do not have to do anything. This Order is final and effective as of the date on the top of the first page of this Order.

B. If you choose to challenge the decision, you may do the following:

1. File a request for an extension of time to file a petition for hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for hearing; or

2. File a petition for administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to section 120.573, F.S., is not available.

How to Request an Extension of Time to File a Petition for Hearing

For good cause shown, pursuant to Rule 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for hearing. Such a request must be filed (received) by the Agency Clerk in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within **21** days of receipt of this Order. Petitioner, if different from the PRFBSR, shall mail a copy of the request to Ms. Diane Hufford, City of Clearwater, 1112 S. Osceola Avenue, Clearwater, Florida 33756 at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for administrative hearing must be made.

How to File a Petition for Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative proceeding (hearing) under sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Agency Clerk in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, MS 35, Tallahassee, Florida, 32399-3000, within **21** days of receipt of this Order. Petitioner, if different from the PRFBSR, shall mail a copy of the petition to Ms. Diane Hufford, City of Clearwater, 1112 S. Osceola Avenue, Clearwater, Florida 33756 at the time of filing. Failure to file a petition within this time period shall

waive the right of anyone who may request an administrative hearing under sections 120.569 and 120.57, F.S.

Pursuant to subsection 120.569(2), F.S., and Rule 28-106.201, F.A.C., a petition for administrative hearing shall contain the following information.

a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the site owner's name and address, if different from the petitioner; the DEP site number; and the name and address of the facility;
b) A statement of when and how each petitioner received notice of the Department's action or proposed action;
c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;
d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;
e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;
f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and
g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective as of the date on the top of the first page of this Order. Timely filing a petition for administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under section 120.68, F.S., by filing a notice of appeal under rule 9.110 of the Florida Rules of Appellate Procedure with the Agency Clerk of the Department in the Office of General Counsel, Mail Station 35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within thirty days after this order is filed with the clerk of the Department (see below).

Questions

Any questions regarding the Department's review of your SRCR should be directed to John Sego, P.G. at (813)-632-7600 x420. Questions regarding legal issues should be referred to Ms. Holly Cauley in the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a petition for administrative hearing or request for an extension of time to file a petition for administrative hearing.

The FDEP Brownfield Site ID Number for this site is BF529701004. Please use this identification on all future correspondence with the Department.

Sincerely yours,

Deborah Getzoff
District Director
Southwest District

FILING AND ACKNOWLEDGMENT
FILED, on this date, pursuant to
§120.52 Florida Statutes, with the
designated Department Clerk, receipt
of which is hereby acknowledged.

Re: **Natural Attenuation Monitoring Annual Report/ Provisional No Further Action Proposal**
ANECO CO
380 S Martin Luther King Jr. Ave.
Clearwater, Pinellas Co., FL,
FDEP Facility ID# 528735150
Discharge Date: April 16, 1992(PLRIP)
FDEP Purchase Order# C2F2CE

Dear Ms. Smith:

The Florida Department of Health in Pinellas (DOH Pinellas) has reviewed the Task 2 Deliverable, Natural Attenuation Monitoring (NAM) Annual Report and No Further Action Proposal (NFAP), dated October 29, 2024 (received October 29, 2024) for the above referenced Purchase Order (PO). The deliverable demonstrates that the components of Task 2 have been satisfactorily performed. The approved cost for the completion of Task 2 is $4,993.17 , as detailed on the attached rate sheet. Please submit a final invoice, including retainage, within 30 days of receipt of this correspondence for the approved Task 2 work in accordance with procedures outlined in the above referenced PO.

The NFAP is herein provisionally approved. This concludes all work under PO C2F2CE. The next scope of work, for abandonment of monitoring wells, will be prepared for generation of a new purchase order. If you should have any questions, please contact me by telephone at (727) 275-6501 or by email address at dominic.broome@flhealth.gov.

Sincerely,

Dominic Broome

RE: 2024 Annual Long-Term Natural Attenuation Monitoring Report
AAMCO Transmission
201 S. Martin Luther King Jr. Avenue
Clearwater, Florida
FDEP Facility ID No. 52/8630822
Non-Program

Dear Ms. Ruselink,

On behalf of Apogee Auto Works, LLC (Site owner), Value Environmental Services, Inc. (VES) has completed the 2024 Annual Long-Term Natural Attenuation Monitoring (LTNAM) groundwater sampling event at the above referenced facility. Groundwater samples were analyzed for benzene, toluene, ethylbenzene, total xylenes (BTEX), methyl tert-butyl ether (MTBE), and chlorobenzene. The details of the sampling event are described below.

Background

The property has been used as an automotive and transmission repair facility since it was developed. A 1,000-gallon underground storage tank (UST) was installed on the north side of the building to store used oil from automotive repair activities. The tank was closed in 1994 and removed in 1997. Impacted soils were observed during the tank removal activities. Groundwater samples collected from a temporary monitoring well indicated that the groundwater had also been impacted by the used oil discharge. A Discharge Reporting Form was submitted on December 16, 1997.

In February 1999, a total of 67 tons of “non-hazardous” soils were excavated and transported to the Okeechobee Landfill located in Okeechobee, Florida.

Subsequent site assessment activities were performed from 2002 to 2004. The results of the assessment indicated that petroleum-impacted soils remained present in front of the service entrance to the building (north side of property). The only dissolved compounds detected above the Groundwater Cleanup Target Levels (GCTLs) were benzene and chlorobenzene. The dissolved compounds were not detected in off-site perimeter monitoring wells.

There are no known on-site irrigation wells. As of FDOH's 2009 potable well survey, no private potable water wells were identified within a 0.25-mile radius of the site and no public water supply wells were identified within a 0.5-mile radius of the site. The nearest potential receptor is the Intracoastal Waterway located approximately 0.25-miles west of the former tank area. A site plan is included as **Figure 1**.

Groundwater Flow Data

On November 14, 2024, VES personnel measured the depth-to-water (DTW) in five (5) monitoring wells (MW-1, MW-2, MW-4, MW-5, and MW-7) prior to sampling. The DTW measurements were subtracted from the surveyed top-of-casing elevations for each monitoring well to calculate groundwater elevations. The interpreted groundwater flow in the surficial aquifer on November 14, 2024, was westerly. Previous measurements have indicated westerly, west-northwesterly, and north-northwesterly flow patterns. Groundwater elevation data are summarized in **Table 1** and graphically interpreted on **Figure 2**.

LTNAM Groundwater Sampling

VES personnel sampled two (2) monitoring wells (MW-2 and MW-7) on November 14, 2024. High Density Polyethylene (HDPE) tubing was used to purge the monitoring wells during groundwater sampling and purge water was observed for sheen and free-floating petroleum product. Groundwater samples were collected from the monitoring wells using the FDEP Standard Operating Procedure (SOP) prescribed sampling techniques. Prior to sampling, water levels were measured so that the purge volumes could be calculated. A slow-rate peristaltic pump with disposable HDPE tubing was then used to collect stabilization parameters and the sample. Each well was purged until temperature, pH, conductivity, dissolved oxygen, and turbidity readings stabilized in accordance with the FDEP SOP.

The groundwater samples were immediately placed in ice-filled coolers and delivered to Advanced Environmental Laboratories under chain-of-custody protocol. All groundwater samples were analyzed for BTEX, MTBE, and chlorobenzene via EPA method 8260. Analytical data are presented on **Table 2** and **Figure 3**. Groundwater sampling and equipment calibration logs are provided in **Attachment A**. The groundwater laboratory analytical report and chain of custody are provided in **Attachment B**.

2024 LTNAM Results

MW-2:

- Benzene = 2.4 micrograms per liter (ug/L)
- Chlorobenzene = 240 ug/L
- All other analyzed constituents were below the GCTLs.

MW-7:

- All analyzed constituents were below the GCTLs.

Groundwater analytical data are shown on **Figure 3**.

Graphs

Historical benzene data, chlorobenzene data and depth-to-water data verses time are graphically plotted in **Attachment C**.

Discussion

Benzene and chlorobenzene concentrations at key well MW-2 increased above the GCTLs compared to the previous 2023 LTNAM data. Concentrations of contaminants of concern have consistently remained below the GCTLs at key well MW-7.

Despite the observed concentration increases at MW-2, benzene data have shown an overall decreasing trend since 2015 and chlorobenzene data have shown an overall decreasing trend since 2017.

Continuation of the current LTNAM program is recommended.

Recommendation

- Continue annual LTNAM activities.
- Measure DTW at monitoring wells MW-1, MW-2, MW-4, MW-5, and MW-7.
- Sample key wells MW-2 and MW-7 for BTEX/MTBE and chlorobenzene.

Please contact VES at 727-276-3024 with any questions.

Thank you,

Chase Swan, P.G.
Project Manager

Results Reported in Micrograms per Liter (ug/L)

GCTL = Groundwater Cleanup Target Level

BOLD = Result exceeds the applicable GCTL

MTBE = Methyl tert-butyl Ether

NA = Not Analyzed

U = Result was below the Method Detection Limit (MDL)

I = Result was between the MDL and Practical Quantitation Limit (PQL)

L = Off-scale high, actual result is higher than reporte value

J4 = Estimated Result

D10 = Denotes dilution factor

RE: Workorder: T2427277 Aamco Transmission

Dear Melinda Hamsher:

Enclosed are the analytical results for sample(s) received by the laboratory on Friday November 15, 2024. Results reported herein conform to the most current NELAC standards, where applicable, unless otherwise narrated in the body of the report. The analytical results for the samples contained in this report were submitted for analysis as outlined by the Chain of Custody and results pertain only to these samples.

If you have any questions concerning this report, please feel free to contact me.

Sincerely,

Tim Preston
TPreston@AELLab.com

2024 Tax Information

Do not rely on current taxes as an estimate following a change in ownership. A significant change in taxable value may occur after a transfer due to a loss of exemptions, reset of the Save Our Homes or 10% Cap, and/or market conditions. Please use our **Tax Estimator** to estimate taxes under new ownership.

Permit Data

Permit information is received from the County and Cities. This data may be incomplete and may exclude permits that do not result in field reviews (for example for water heater replacement permits). We are required to list all improvements, which may include unpermitted construction. Any questions regarding permits, or the status of non-permitted improvements, should be directed to the permitting jurisdiction in which the structure is located.

Ford Motor Co. unleashes its challenge to the United States imported car market tomorrow when it unveils its 1970 Maverick, a sporty two-door, four passenger sedan.

But for those who are anxious to try one out, they won't be available at Ford dealerships until April 17 — the fifth anniversary of the Mustang.

Maverick, with a suggested retail price of $1,995, is, according to the company, roomier and more convenient than major foreign competitors.

Ford anticipates the new car will attract young adults and high income, multi-car owners, with appeal as a first car to young people and as a second car in families. The Maverick is designed to give 22½ miles per gallon in normal use.

More than 38 million gallons of paint — enough for a rainbow-hued ribbon nearly eight feet wide from Detroit to the moon — will be used by America's auto

BUSINESS & INDUSTRY

makers on their 1969 models. The volume of paint could provide a ribbon 7.54 feet wide in a multitude of colors.

The U.S. automotive industry expects to turn out approximately 8.8 million cars for the new model year, with each vehicle using 4½ to 5 gallons of coatings.

The American Bankers Association in testimony before the Senate Banking and Currency Committee in Washington last week, blamed the current high interest rates on record levels of credit demand coupled with a reduction in lendable funds.

Rex J. Morthland, a member of the association's economic policy committee, pointed out increased demands have come from all types of governmental units, individuals and businesses. He added the pressure on interest rates was further accelerated by inflationary expectations and the inability of many banks to obtain additional loan funds though normal channels — by selling assets to obtain cash or by incurring additional liabilities.

Morthland, however, was quick to point out that intense competition from other banks, thrift institutions and primarily from short-term money market instruments has lessened the attraction of time and savings deposits which are the primary source of additional funds for banks during tight money periods.

He concluded that the natural reaction of high customer demand for funds and slower growth, or actual decline, in the funds available to banks is an inevitable increase in rates.

The Credit Managers Association of Tampa has extended an invitation to all members of the Tampa Ministerial Association to attend a dinner meeting April 17 at 6:30 p.m. at the Sheraton Tampa Motor Inn. The dinner is being held in conjunction with the national observance of Consumer Credit Week April 20-26.

Euro-Dollar Market Jumps in Popularity

By HARRY HOSKS

LONDON (UPI) — A foreign exchange manager of a U.S. bank which recently started a branch in London picked up the telephone and in about 60 seconds had raised several million dollars.

"Where else in the world and in what other market can you do this without so much as a piece of paper changing hands?" he asked.

Such speed and the absence of red tape are typical of the multi-billion dollar Euro-dollar market which has its unofficial headquarters in "Threadneedle" in one-square mile section of old London.

Euro-dollars seem to have the unique ability to please everyone and get things done in the process. Bankers find them so profitable that branches of international banks have been opened in London, including 24 from the United States which so far dominates the market. The U.S. Government solves some of its balance of payments and gold reserve problems through their use. Business, facing national restrictions on capital expenditure, expands and pioneers abroad via Euro-dollars. And Britain's coffers are helped by her profits on being the handmaiden — through its banking expertise and facilities — of the Euro-dollar market. Since money tends to follow money, these dollars also have strengthened London's position as the financial capital of the world.

"Vastly important," agreed officials of the two U.S. banks, Morgan Guaranty Trust Co. and First National City of New York, when asked to evaluate this market which made its appearance about ten years ago.

Euro-dollars are exactly the same as ordinary dollars except for their location. They are deposited outside the United States by a person, corporation or financial institution not resident in the United States.

This vast stockpile of expatriate dollars, estimated at from $30 billion to $40 billion is loaned and "bought" around the world. Currently the United States is the market's biggest customer, but Japan, Italy and Germany have dipped into the pool. So have Russia and other Communist countries. Central Banks and the Bank of International Settlements deal in the market.

It grew out of huge, post U.S. balance of payments deficits, all country payments and other commercial transactions. Dollars are accumulated in the far east traffic east. They acquired the "Euro" tag because they flowed inward Europe, notably London, to seek out sophisticated banking systems and expertise.

Owners of such funds prefer to keep them outside the United States for political, geographical and convenience reasons. Their ability to flow around governmental restrictions help them earn very lucrative profits. Instead of shipping dollars abroad, American firms can get around restrictions by borrowing Euro-dollars through debentures or bonds sold in that market. Loans usually are issued in the name of a foreign subsidiary but are guaranteed by the parent company, frequently by convertibility into common stock of the parent firm.

These dollars have been called "the most usable" international finance medium for business, trade, investment and even national currencies. Official figures give an idea of how U.S. business depends on them. In the first three weeks of this year alone U.S. banks in London attracted about $2.5 billion in loans to their own head offices.

There is no "market" in the sense of a meeting place where finance rates, all the billions that change hands result from telephone or telex calls between banks which have a monopoly as intermediaries.

Because deals are transacted rapidly and verbally, a "good name" is vital in the market, especially since the usual unit for dealing is $1 million. Very big deals are subject to some negotiation and interest rates vary with terms and risk.

Paul Einzig, an acknowledged Euro-dollar authority, says the market is here to stay because it has refined and become an integral part of world financing.

"Other things being equal," said Einzig in his latest study, "most banks prefer to borrow Euro-dollars. The negotiation of a large credit in New York is apt to be a slow, cumbersome process in the course of which the borrower is expected to state the purpose for which the credit is required and the banks to decide whether it is a sound purpose. On the Euro-dollar market no often can raise the credit in minutes with no questions asked."

Euro-dollar loans at comparatively high interest rates helped U.S. domestic banks weather the 1966 credit crunch. And there was a heavy Euro-dollar flow back to the United States in mid-March this year because of the fourth prime rate boost since December.

X-rays in the Large Economy Size

To help assure high quality in the large components manufactured by the Westinghouse Tampa division plant, every inch of every weld is X-rayed. The work is performed in a specially equipped X-ray room by a 2 million volt machine capable of "seeing" any defects through seven and one-half inches of steel. About to undergo the X-ray inspection here is the lower shell for a nuclear steam generator which weighs about 231,000 pounds.

Employe Dwarfed by Huge Concentrate Evaporator

Big Concentrate Evaporator Draws Motorist's Curiosity

SAFETY HARBOR—Motorists driving by Golf Machinery Co. on State Road 590 in Safety Harbor last week had their curiosity aroused by a huge truck parked outside, ready to haul away a huge piece of stainless steel machinery which somehow looked as if it would fit nicely into the space program.

What they actually saw was a huge, short-term citrus concentrate evaporator, widely used in Florida, other states, and some foreign countries.

The one loaded on a giant truck with a telescoped trailer last week is being shipped to Sao Paulo, Brazil, the second the company has shipped to a firm there in recent months.

The evaporator, being hauled to Jacksonville for shipment overseas, is 13 feet, six inches wide, 10 feet, six inches high, and 65 feet long. It weighs about 65,000 pounds and costs approximately $300,000.

Gulf Machinery, formerly located on South Greenwood Avenue in Clearwater, moved to a new plant in Safety Harbor two years ago because of the need for increased space to meet production demands.

The concentrate evaporators take about three months to build. Their function is to reduce fresh orange juice into concentrate. The process is one of several undertaken before the juice is poured into containers which eventually wind up in home freezers.

The evaporators can be put to other use, but primarily are manufactured for citrus products.

Jack Benny's One Gallon Helps

Two Gasoline Marketers Get Sales Results Without Games

HOUSTON, Tex. (AP) — Two major gasoline marketers who have refused to promote service station "money games" are pleased with their 1968 sales records.

Stockholders of Texaco Inc. have been told, in effect, that Jack Benny can do a better job of selling gasoline than can the games.

Gulf Oil Corp. stockowners have been advised that 1968 results offer firm evidence that sponsorship of telecasts of such news events as national political conventions and space shots can do a better job.

Both companies reported in their annual financial reports to stockholders that their products sales in 1968 exceeded the industry wide average.

Domestic gasoline sales last year were about 6 per cent above the 1967 level. Gulf reported an increase of 11.6 per cent. The Texaco report gave no breakdown but said its total sales of refined products surpassed the industry average.

"The increase in automotive gasoline sales was particularly gratifying in view of the fact that most of Gulf's competitors used "money games" in attempt to attract customers into service station driveways," the Gulf report said.

"Gulf abstained from the use of money games and, instead, used network television through sponsorship of Walt Disney, the national political conventions and instant news which included the space shots."

Texaco officials said an advertising and sales promotion campaign featuring Jack Benny had been most effective in informing motorists about a new premium grade gasoline.

The Texaco officials made no direct reference to the money games but, after praising Benny's sales abilities, left little doubt about the matter by saying:

"It is Texaco's opinion that it can best serve the consuming public by constantly improving and promoting the high quality of its products and services."

Gulf officials agreed. They said their advertising emphasizing quality and efficiency had been supplemented by intensive dealer training.

"The program generated a great deal of dealer enthusiasm which resulted in increased sales," the Gulf report said.

Among the marketers that have sponsored service station games, Continental Oil Co. also reported motor gasoline sales increased above the industry average.

Continental indicated its 6.8 per cent increase in domestic gasoline sales resulted in part from an increased number of service stations along the interstate highway system and from an expanded four-grade marketing program.

"At year-end, the company held an inventory of additional interstate highway service stations sites that will be developed as traffic continues to build up along the system," Continental's financial report said.

"By year end, four-grade marketing accounted for an important portion of Continental's brand retail gasoline sales in the United States."

Some New Car Dealers Facing Loaded Lots

NEW YORK (AP) — Car lots are loaded with new 1969 models, and some dealers are worried.

There were a record of 1.7 million new cars in U.S. showrooms the beginning of March, compared with 1.45 million at the same time last year, and Detroit production rates are expected to keep those cars there for the next three months.

Some dealers feel caught in a squeeze between the high cost of keeping new cars in showrooms and an unsolicited buying public.

As a result, some dealers said they had lowered prices to help clear the decks and reduce the amount of money that pay banks in interest on unsold cars.

New car sales for March were reported lower than last year.

March 11-20 sales across the country declined about 1 per cent to 203,186 cars from last year's 205,077. The first 19 days of March saw a drop of about 7 per cent to 278,559 from last year's 299,476.

And imports Detroit produces schedules call for a reported total of 2.3 million cars to roll off the assembly lines in the next three months.

That figure is 6 per cent below last year's but could keep the dealers loaded with their present inventories unless sales exceed the 2.3 million for production for the next three months.

One dealer, said to tell manufacturers were going overboard, Edward J. Balsitis, president of Grady Ford in San Francisco, said "I'm not going to be the boss who keeps the economy going."

Balsitis said he now pays banks about $5,000 a month to keep his lot loaded with $1 million in unsold cars. Last year at this time, he said, he paid banks only $3,000 a month.

Balsitis said he had cut some prices to increase sales and make way for new models the last month refused 25 new cars from the factory.

Aggressive Program Helping USI

The Electronic Stock Evaluator Corporation of Rockville Centre, New York, has selected the five securities listed below for outstanding fundamental value and above-average market interest. ESE uses computers to perform tasks commonly done by individual research analysts. However, the computer has the advantage of speed, enabling ESE to analyze approximately 2,500 securities each week. In forecasting the price action of a security ESE obtains estimates of earnings, dividends and sales from several different sources, and programs a consensus of these estimates into the computer. The computer then assigns a rating to the security which serves as a guide for the recommendations made by ESE.

Since the rating assigned to a security is largely dependent on the estimates obtained by ESE the accuracy of a recommendation is dependent upon the accuracy of the estimates obtained. In this respect, the individual research analyst and the computer are subject to the same limitations. General economic conditions, national crisis, or news events which are unprecedented also may have influence on the securities that are recommended.

The securities and the closing prices as of Friday are:

Stock of the Week

U.S. INDUSTRIES, INC. (29½) USI is a diversified company which is benefiting from an exceedingly aggressive acquisition program. Operating areas include industrial equipment, consumer products, and construction. Projected higher volume, new products and successful acquisition efforts should benefit the long term potential. Earnings for the twelve months ended December, 1968 were $3.17 per share versus $1.82 per share for the next twelve months. ESE estimates earnings of $2.76 per share for the next twelve months. The quarterly dividend was recently raised to $0.31½ per share.

Four Stocks of Interest Remember . . .

PEOPLES GAS CO. (37) PGL is an integrated natural gas company and holding entity for Peoples Gas Light & Coke system. The SEC approved the transfer of all outstanding common shares of North Shore Gas Co., a subsidiary of Peoples Gas Light & Coke Co., to Peoples Gas Co. Population and industry growth in adjacent Chicago areas served, indicate good earnings prospects for the long term. Earnings for the twelve months ended December, 1968 were $2.34 per share versus $1.96 per share for the previous twelve months. ESE estimates earnings of $2.40 per share for the next twelve months. An annual dividend of $1.80 per share is paid.

MAYS (J.W.) INC. (45¾) MLW is a top mark-up apparel retailer and operates seven stores in the New York City area. Cost control efforts and higher volume should widen margins. Earnings for the twelve months ended January, 1969 were $2.08 per share versus $2.37 per share for the previous twelve months. ESE estimates earnings of $2.10 per share for the next twelve months. An annual dividend of $0.60 per share is paid.

FOOTE, CONE & BELDING (14⅝) FCB is a major advertising agency. Anticipated growth in this field and expected expansion of CATV interests should enhance long-term prospects. Earnings for the twelve months ended December, 1968 were $1.07 per share versus $0.96 per share for the previous twelve months. ESE estimates earnings of $1.06 per share for the next twelve months. An annual dividend of $0.60 per share is paid.

McLEAN TRUCKING CO. (32) MLN is a common carrier of general freight by motor vehicle and operates from Atlanta to Boston and westward to Chicago, St. Louis and Memphis. Subject to ICC approval, the company announced an agreement to purchase Herrin Transportation Co., extending the franchise into the Southwest. Talks are under way to merge MLN into Reynolds Tobacco. A continued cost control program and better use of equipment and terminal facilities should aid margins. Earnings for the twelve months ended December, 1968 were $1.77 per share versus $2.23 per share for the previous twelve months. ESE estimates earnings of $2.00 per share for the next twelve months. An annual dividend of $1.00 per share is paid.

Your broker will be pleased to furnish you with additional information regarding the above securities.

Manslaughter Charge Filed In Auto Death

By EARL EMMONS
Tribune Staff Writer

ST. PETERSBURG — The state attorney's office said yesterday manslaughter charges have been filed against Freddie McDougal, 23, of 1855 42nd St. S., who allegedly drove the car that crashed into an unmarked St. Petersburg patrol car killing a 21-year-old police officer.

Tim Vinton, James A. Kropp, was pronounced dead on arrival at Mound Park Hospital shortly after 10 p.m. Wednesday after the patrol car in which he was riding was struck at 38th Street and 12th Avenue South by an auto traveling an estimated 80 miles per hour.

Patrolman Robert Meigert, 26, who was driving the unmarked car, is listed in serious condition at the hospital following yesterday morning.

State Attorney Clyde A. Davis said the charge was filed following an all-day investigation carried on by Dennis Quillian of his staff.

According to police, Patrolman Jack Lewis had been chasing McDougal in his auto when Lewis saw his driving suddenly through a Negro section.

Lewis said he wanted to stop McDougal and question him, but the driver took off at a high rate of speed.

According to the report, Mr. Dougal drove south on 20th Street, went through a stop sign, and hit the police car, and a witness car, said.

The crasher was knocked into a utility pole, escaping it in two. McDougal's car skidded and at control and hit a house at 2000 12th Ave. S.

McDougal was listed in satisfactory condition at the hospital, suffering a broken arm, cuts and bruises.

Meigert received two broken legs, head and internal injuries.

About three hours after the fatal accident, another 3-1 speed chase ended when a car driven by Jerome Burnette, 19, of 1902 Seventh Ave., crashed into a public tree, injuring the driver and three passengers.

Patrolman Russ Rhu said Burnette sped away from him at Fifth Avenue and 16th Street, apparently because he did not have a driver's license.

In municipal court yesterday morning, Burnette was given a $50 bail and continued in jail, paying $125 in fines.

He was charged with reckless driving, driving without a license, and driving a car without and on the police car, and a license on hand.

Validation Petitions Under Study

By SAM STUBLEN
Tribune Staff Writer

CLEARWATER—Circuit Court Judge Charles M. Phillips Jr. took under advisement yesterday petitions to validate $2.75 million in revenue certificates for the McKay Creek Sanitary Sewer District and $860,000 worth for a sewer system at Indian Rocks Beach.

Judge Phillips said he would attempt to render the long-awaited decision by the middle of next week.

The court has under advisement also motions to dismiss both validation suits.

The latest motion was made yesterday by Largo Town Attorney John Rutter in regard to the McKay Creek petition. Rutter argued that the apportion between the monthly revenue and assessment should be revised in line with revisions made in the cost of the project.

If the court decides to validate, Rutter said, the amount of revenue certificates should be cut by $250,000. He said the district has been declared eligible for a federal grant and should be receive this amount toward construction.

Rutter also argued that validation of the McKay district bonds is dependent upon validation of Indian Rocks Beach.

The cases are inter-related since Indian Rocks has run treated in have the district plans treat the sewage collected by its planned system.

A good part of yesterday's hearing was spent in cross-examining Homer of Harry Wild, sewer engineering consultant for the McKay district. Wild established for his patient, Harold Reiter, who has endowment a major operation.

As an earlier hearing, attorney Irving Levin, representing an Indian Rocks property owner, moved for dismissal of that petition on grounds that the petitioner had failed to meet certain technical legal obligations.

Students Elected

TARPON SPRINGS (Special) — Student Council officers recently elected at Tarpon Springs Senior High School are Craig Tippett, president; Cynthia Johns, vice president; Jana Lekos, treasurer and Joan Nygard, secretary.

IN PLAY—Largo — Pretty Ann Miller takes the role of Moonbeam McSwine in the Footlight Theater production of "L'il Abner," scheduled May 14-16 at Largo High School auditorium. Ticket reservations may be made by calling 443-1234 in Clearwater.

Midway Games Policy Discussed—

Group To Advise Keeping Fair at Largo Next Year

NEARING COMPLETION—Safely Harbor Gulf Machinery Co.'s new $300,000 plant here is due for completion the latter part of May. The steel building is 200 by 185 feet. All types of citrus processing machinery and stainless steel fabrication will be turned out at the plant. Gulf Machinery is now operating in Clearwater. The new plant is on State Road 590 here.

Tentative Dates Set In March

By ROBERT LONGSTREET
Tribune Staff Writer

CLEARWATER—The Pinellas County Fair Committee yesterday decided to recommend that county commissioners keep the fair in Largo for the 1965 show, and tentatively set March 3 to 13 as show dates.

Committee also considered eliminating all midway games, but ended up putting this in 1965 plans among alternatives.

The priority ruling included: policy objects from the State Department of Agriculture on which of the midway games can properly be operated; leaving the county adopt its own criteria; barring the games re-

Objectors to complete elimination included fairgoing reviewers from sale of concessions space and the concessions that the skill games are expected and enjoyed by fairgoers.

Committee chairman Lewis Thomas said criteria should be based on making Pinellas the cleanest fair in the state, which, or not it is undertaken by the state agricultural department.

The fair is currently on probation, pending inspection of the midway games on opening day next year. If it is not sanctioned by the state, the fair and fairgoers will be subject to a variety of fees, that are not wanted.

Homer worked out a rough draft of four points of criteria, including:

— All games must be skill games, under unchanging conditions.

—The player must have a reasonable chance to win;

— Equipment must be of a type which can not be rigged during play;

—There must be an element of gambling involved.

However, this criteria will be applied only in event the state does not supply its own criteria. The conference was told there are meetings scheduled at the state level, to try to reach agreement on permissable games, but no guarantee such criteria will be adopted.

The conference also went into the sale of concession space within buildings. A report showed 40,000 square feet given away, against sale of 12,000 square feet at an average price of $1 per foot.

Homer asked Administrator Floyd Gibbons if consideration the promoters of the annual Clearwater and St. Petersburg home shows as to the possibility of obtaining professionals to handle the space sales. Fair Manager Harry Schaber said 60 per cent of commercial space has been sold in the past, but asks the commission not determine the ratio of commercial to free space.

The horse issue, held in some quarters with the fair also got a going over, and also was referred to Gibbons and Schaber. They are to evaluate the horse, analyze deficiencies, and explore the possibility of obtaining a square, such as the Division Service League, horsemen, circus or other charitable organizations that can actively promote ticket sales, procure advertising and entertain with improvements as temporary quarters for the grandstands.

There also was agreement that the fair publicity should be expanded over a longer period of time instead of a last month holdup. No date was set for a report session on the interim.

Committee Named To Find Alternate Boys Town Site

CLEARWATER (By Staff Writer) — Implementing Pinellas County commission directives of last Tuesday, Commission Chairman John Rutter yesterday named Councilwoman Lee Swain to Homer as a committee to County holdings, if redevelopment could be located, are suitable candidates for the proposed boys town of 2,000 persons.

Commissioners Tuesday directed this move given two years ago to the Northside Optimist Club of St. Petersburg, comprised by the gates of land in the would be ideal for the project. Wahnahatch reservoir water shed. Optimists proposed to use the "red for a boys' home ranch and has sand beaches, 30, to 70 brewage input.

The committee was given to understanding the commission the proposed location or other would help find an alternate lands held by the county which also Northeast specifically was urged to be educable for boys' county acreage on Lake Chautauqua.

Horticulture Show Slated At Fairgrounds in Largo

LARGO (Special) — The fifth be about 5,000 rotating feet of annual plant show, sponsored outstanding specimens.

and staged by the Pinellas County Horticulture Club Inc., will be held Saturday, Sunday and Monday at the Pinellas County Fairgrounds.

All groups will go in the Sunday Giant Sub-Tropical Gardens, located at 32nd Street, north of Ridge Road.

A special feature of the show this year will be the herbarium. Three specimens have been collected and prepared by members of the District Eight Florida Federation of Garden Clubs and Circle with more than 50 clubs participating.

When the show is over the herbarium will be given to the Rex Clark Botanical Gardens.

In the same room with the herbarium will be an artistic interpretation of the future development of the Botanical Gardens.

Among the major sections of the show will be the rose Bromeliads will again be shown, a new feature being the Bromeliad study group which will exhibit their training plants. Twenty-four of African violets will be on display, protected by plastic shelves.

Show hanging baskets have again become popular, there will be an extensive exhibit of different classifications of plants can be used, including ferns.

All types of succulents, flowering trees, annuals, fruits and vegetables will be exhibited. All in all, there is expected to be

Gil Whitton, assistant Pinellas County Agricultural Agent, will be show. All potted plants must be entered from 1 to 7 p.m. today and cut specimens must be entered from 8 to 10 a.m. on Saturday).

There will be 20 judges from all over the state, each a specialist in his particular field.

John J. Bingaman, a State Plant Inspector, will have an educational exhibit on insects and diseases common to Florida plants.

The public may exhibit in the show. All potted plants must be entered from 1 to 7 p.m. today and cut specimens must be entered from 8 to 10 a.m. on Saturday).

There will be 20 judges from all over the state, each a specialist in his particular field.

3 Educators To Attend Convention

CLEARWATER (By Staff Writer) — Three Pinellas educators will represent the county at the meeting of the Department, of Elementary School Principals in the National Education Association in Minneapolis, Minn., Sunday through Thursday.

They are Mrs. Bessie Pattillo, principal of Tarpon Springs Elementary School; Dr. Carlos Taylor, principal of Pierce Elementary School in Clearwater, and Miss Thomas Glover, principal of Gulfcrest Elementary School.

Administration Building At College Is Dedicated

ST. PETERSBURG (By Staff Writer) — The $180,000 administration building at Florida Presbyterian College was dedicated yesterday in honor of Mr. and Mrs. William W. Upham of St. Petersburg Beach.

Among those participating in ceremonies yesterday morning were Dr. William H. Kadel, college president, the Uphams, large contributors to the building, and Mrs. M. Harry McNeill, who donated $25,000 in memory of her husband for the

The building is part of a planned 30-building complex when

The other two wings will house business offices and the academic administration.

One of the original members of the FPC board of trustees, Upham moved to St. Petersburg in 1929 to form the Upham company with his father and brother.

He served as the first mayor of St. Petersburg Beach, holding office for three terms.

In 1951, Mrs. Upham was awarded the Community Welfare Council award for her "major contribution to the interests of the county in the field of mental health and child guid-

'Back Door Approach'—

Flood Control Agencies Said Trying for Recreation Funds

By EARL WELLS
Tribune Staff Writer

Florida legislators charge organized flood control and water management agencies yesterday for using a "back door approach" to obtain funds revealed in the 1962 recreational referendum.

A meeting of the newly formed outdoor recreational planning committee of the Tampa Chamber of Commerce was attacked by members with flood control and water management interests on the receiving end.

South Central Florida Flood Control District and Southwest Florida Water Management District, were blistered by Polk County Rep. Ray Mercer. He charged they were "going in the back door to secure funds that were voted solely for recreational purposes."

Mercer's lashing of the two groups was followed by another from his home colleague, Polk Rep. Lawton Chiles Jr. similar statements were voiced by Manatee County Rep. Walter Boyd, Sen. G. W. (Doc) Williams Wauchula, representing the 27th District, continued where house members left off.

Mercer's explosive opening statements set off a three and half hour session designed for discussing plans and requests for recreational facilities in a nine-county region. The region is made up of Hillsborough, Polk, Pasco, Highlands, Manatee, Sarasota, Hardee, DeSoto and Pinellas Counties.

Mercer declared his stand was brought on by recent statements indicating part of the recreational funds would be used to purchase large tracts of land in the reservoirs for flood control and water management.

He said Florida voters had one purpose in mind when they overwhelmingly approved the referendum — for recreational use only. To divert from this use by thinking and apply these funds to flood control or water management, Mercer said, would be to exempt the same as taking educational funds for other purposes.

Mercer, seeking his 10th term in Tallahassee, asserted that legislators had primary recreational use in mind when they approved the bill. He declared that such right any proposal that called for spending funds for flood or water management purposes, even though they may be under the guise that recreational facilities would be coupled by such practices.

Land Acquisition Fund

The outdoor recreational referendum provided for establishment of a land acquisition trust fund and approved beyond a 5 per cent excise tax on most sporting goods. Authorization for bonded revenue certificates was also included in the referendum. To date however, no bonds have been issued.

Funds derived from these sources are slated to be used to purchase of land to expand the state's recreational program and improve existing facilities.

Expenditure of the funds rests with an outdoor recreational development council composed of the governor and his cabinet. A recreational planning committee, made up of heads of state agencies, submits recommendations to the council.

Yesterday, recreational boards, county and city groups from throughout the region made requests, pending the day when the state-wide program is implemented.

Hillsborough County proposed four new parks and improvements existing facilities. The county planning commission and directors of parks made the plea.

Hillsborough Rep. Woodie Liles said "every tenth veteran and fixed control can be combined, it will save the taxpayers money."

Manatee County planning officials advocated improvement of a gulf beach state and setting up a multi-purpose project consisting of 32,000 acres. The latter would serve as a water supply project and at the same time provide additional recreational facilities.

A delegation from Pinellas County entered a series of maps in the record the study and proposed that emphasis be placed on improving the gulf beaches in that area.

Polk County's representatives pointed up need for additional campsite facilities under capable supervision. Haines City entered a recommendation for acquiring a 25,000-acre plot of un-

Mercer's meeting was the second of 10 scheduled throughout the state. Ny Landrum, director of the outdoor recreation planning committee, presided, assisted by K. E. (Bill) Stiller, director of Florida Park Service.

Three Check Cases Bring Prison Term

CLEARWATER (By Staff Writer) — A 24-year-old Belleair dance instructor, charged with three counts of worthless checks, was sentenced to serve six months to two years in state prison yesterday by Circuit Court Judge R. J. Driver.

The defendant, Harvey J. Stanton, pleaded for probation telling the court he has a wife and baby and later lost employment.

He was charged with two counts of obtaining property in return for a worthless check and one count of uttering a forged check. The two year prison terms were imposed on each count, but allowed to run concurrently.

In handing down the sentence, Driver observed, "As my former instructor, charged with three counts of worthless checks, was sentenced to serve six months to two years in state prison yesterday by Circuit Court Judge R. J. Driver.

— All games must be skill games, under unchanging conditions.

—The player must have a reasonable chance to win;

— Equipment must be of a type which can not be rigged during play;

—There must be an element of gambling involved.

However, this criteria will be applied only in event the state does not supply its own criteria. The conference was told there are meetings scheduled at the state level, to try to reach agreement on permissable games, but no guarantee such criteria will be adopted.

The conference also went into the sale of concession space within buildings. A report showed 40,000 square feet given away, against sale of 12,000 square feet at an average price of $1 per foot.

Homer asked Administrator Floyd Gibbons if consideration the promoters of the annual Clearwater and St. Petersburg home shows as to the possibility of obtaining professionals to handle the space sales. Fair Manager Harry Schaber said 60 per cent of commercial space has been sold in the past, but asks the commission not determine the ratio of commercial to free space.

The horse issue, held in some quarters with the fair also got a going over, and also was referred to Gibbons and Schaber. They are to evaluate the horse, analyze deficiencies, and explore the possibility of obtaining a square, such as the Division Service League, horsemen, circus or other charitable organizations that can actively promote ticket sales, procure advertising and entertain with improvements as temporary quarters for the grandstands.

There also was agreement that the fair publicity should be expanded over a longer period of time instead of a last month holdup. No date was set for a report session on the interim.

Overloaded Trucks To Be Charged

TALLAHASSEE (AP) — Operators of overloaded or oversized vehicles will have to pay fees ranging from $5 to $25 to operate them over state highways beginning June 1.

The road board adopted yesterday the proposed fee schedule by which the state proposes not only to get some revenue but also to regulate the unusually heavy or large vehicles more closely.

The 1963 legislature directed the road department to start charging fees for the use of the highways. But vehicles owned and operated by federal, state or local governments were declared exempt.

Florida has never charged fees before, but it did require permits that allowed state authorities to route the extra heavy or large loads over the proper roads.

In other actions at its monthly meeting, the board authorized a $12,500 wayside park near Bunkin.

Florida Auto Toll

TALLAHASSEE (AP) — The state patrol reported two fatalities on the Florida highways during the 24 hours ended at 6 a.m. yesterday.

Louis E. Kirr, 30, of Jacksonville died in an accident three miles north of Leland.

Thomas A. Bean, 40, of Palm Beach, was killed in Palm Beach County.

The summary:

Killed	2
Injured	241
Killed to date this yr.	447
Killed to date last yr.	405
Injured to date this yr.	21,488
Injured to date last yr.	20,186

Free Symposium on Art Will Be Held Tomorrow

PINELLAS PARK (Special) — A free symposium of the Society of Fine Arts will be held tomorrow at 8 p.m. at the Beach Arts Gallery here, with Edna Johnson Larson, author and editor of "The Charlestonian," serving as chairman of the open forum.

The forum will open to the public through April 22. Entitled "The Artist in Society."

Included in the round table talks will be Thomas Reinecke, economist and director of the St. Petersburg Philharmonic Orchestra, and Wade Van Dore of Clearwater Beach, poet and music authority.

The art group's current exhibition of nearly 300 works of art which are hanging in the gallery to honor the Festival of States for the 12th year, will continue on show free to the public through April 22. Engraved plaques will be awarded winning paintings and sculptures.

Tolls Stay

TALLAHASSEE (AP) — Atty. Gen. James Kynes said yesterday Manatee County could not remove tolls from two bridges under a new bond issue until Aug. 1, the date of the last payment of principal.

Earl Mendell, the county said $4.8 million in bonds to retire the bond issues on the Anna Maria Island and Cortez Bridges and make them toll free.

College Gets Loan

WASHINGTON (AP) — The Health Facilities Administration announced yesterday that Florida Presbyterian College in St. Petersburg, Fla., will receive a $650,000 loan to expand the college's facilities for student activity and recreation. The project will include an addition to the Student Union building.

Bear Creek and Toytown Agreement at Standoff

CLEARWATER (By Staff Writer) — The City of St. Petersburg and Pinellas County reportedly reached a standoff on compromise the Bear Creek Sanitary District and Toytown sewer bill agreements.

The county has asked the city to treat Bear Creek district sewage and has accepted the city price of $107 per million gallons.

The city has asked the county for a five year lease on Toytown sewage now used as a city sanitary garbage fill, replacing the present agreement that has a one year cancellation clause. The county has countered with a proposal the city buy the Toytown tract outright as an incinerator site.

Yesterday, letters from City Manager Lynn Andrews and Mayor Herman Goldner advised Commissioner Chairman John Bonney the city does not favor

The letter on Toytown development was city wants to incinerated in the property if the price is right, but not for an incinerator.

Bonney declared that under these terms he would favor granting the city the five year lease. He said an appraisal of Toytown in its present state of mixed and tract yets would likely be low. The county would benefit from allowing the fill to continue to improve the tract for later sale and consequent revenue benefit to the park program, which will receive the money from the property sale.

He said he would make the recommendation in the full commission on Tuesday that the five year lease be permitted.

USER QUESTIONNAIRE AND PROPOSAL CHECKLIST
ASTM E1527-21 Phase I Environmental Site Assessment

1. Applicability — Per ASTM E1527-21, if the reason for the Phase I ESA is not provided, EnSafe shall assume the purpose is to qualify for one of the landowner liability protections listed in a., b., or c. (below).

Please identify from the lists below all applicable reasons for requesting this Phase I Environmental Site Assessment:

Reasons applicable to the "All Appropriate Inquiries" Final Rule (40 Code of Federal Regulations Part 312):

- ☑ a. Person seeking to establish the innocent landowner defense to CERCLA liability
- ☐ b. Person seeking to establish bona fide prospective purchaser landowner liability protection to CERCLA liability
- ☐ c. Person seeking to establish the contiguous property owner landowner liability protection to CERCLA liability
- ☐ d. Person conducting site characterization and assessments with the use of a CERCLA grant (Brownfields)

If one of the above is applicable, please complete the "User Responsibilities" questions in Section 2.

Additional reasons for performing a Phase I Environmental Site Assessment:

- ☐ e. As part of due diligence prior to purchase
- ☐ f. Obtaining financing
- ☑ g. Selling a property
- ☐ h. Originating or renewing a lease
- ☐ i. Terminating a lease or vacating a property
- ☐ j. In anticipation of a property/business ownership transaction
- ☐ k. Establishing baseline conditions at a property
- ☐ l. Identifying potential business environmental risks associated with a property

A business environmental risk is defined by ASTM E1527-21 as a risk that can have a material environmental or environmentally driven impact on the business associated with the current or planned use of commercial real estate, not necessarily related to required components within the scope of an ASTM Phase I ESA. Business environmental risks are commonly associated with ASTM "non-scope issues" listed in Section 4. If Box l. is selected in this section, please complete Section 4.

Yes	No	**2. User Responsibilities**

These are tasks under the "All Appropriate Inquiries" Final Rule at 40 Code of Federal Regulations Part 312 that must be performed by or on behalf of the party seeking to qualify for a landowner liability protection to CERCLA liability. EnSafe is required to request the intended "User" of the Phase I ESA provide the information from those tasks, as it may be material in identifying recognized environmental conditions. Although the User of the Phase I ESA is not required to provide that information to EnSafe, the User remains responsible for their completion. For any boxes that are checked "Yes" please provide the additional information that you would like EnSafe to consider as part of the Phase I ESA. If the User of the Phase I ESA is not seeking a landowner liability protection to CERCLA liability but has pertinent information, answering the following questions will assist EnSafe.

☐	☑	a. Are there any environmental cleanup liens or activity and land-use limitations in place or filed or recorded against the property under federal, tribal, state, or local law, based on review of recorded land titles and judicial lien records? *If you haven't obtained the information through transaction-related title insurance documents, title abstracts, etc., would you like EnSafe to obtain and review land title records and judicial records at an additional cost (determined based on the number of parcels)? If so, please contact us for a quote.*
☐	☑	b. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?
☑	☐	c. Does the purchase price being paid for this property reasonably reflect the fair market value of the property? In other words, what is the relationship of the purchase price to the fair market value of the property, if the property were not contaminated? If you conclude that there is a difference, is the lower purchase price related to contamination that is known or believed to be present at the property?

USER QUESTIONNAIRE AND PROPOSAL CHECKLIST ASTM E1527-21 Phase I Environmental Site Assessment	
☑ ☐	d. Are you aware of commonly known or reasonably ascertainable information about the property that would help EnSafe identify conditions indicative of releases or threatened releases? For example, (i.) The past uses of the property? (ii.) Specific chemicals are or have been used or stored at the property? (iii.) Spills or other chemical releases that have occurred at the property? (iv.) Environmental cleanups that have taken place at the property? (v.) Do you have other information relevant to the Phase I ESA?
☑ ☐	e. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?
	3. Special Reporting Requirements (if applicable)
	Specify whether you, your client, and/or lender have special requirements for the Phase I ESA?
☐	a. No additional requirements apply to this Phase I ESA.
☐	b. Additional requirements apply and have been attached or discussed.
	4. ASTM Non-Scope Considerations
	If you would like EnSafe to include any of the following issues as part of the Phase I ESA, please check the appropriate box, and an EnSafe representative will contact you, as necessary, to discuss further and determine whether modifications to the attached cost estimate will be necessary.
☐	a. Asbestos-Containing Materials
☐	b. Radon
☐	c. Lead-Based Paint
☐	d. Lead in Drinking Water
☐	e. Wetlands
☐	f. Regulatory Compliance — Environmental
☐	g. Regulatory Compliance — Health and Safety
☐	h. Indoor Air Quality
☐	i. Mold
☐	j. Substances not Defined as Hazardous Substances (aka emerging contaminants like PFAS)
☐	k. Vapor Intrusion
☐	l. Biological Agents
☐	m. Cultural and Historic Resources
☐	n. Ecological Resources
☐	o. Endangered Species
☐	p. Industrial Hygiene
☐	q. Other (please specify)
Yes **No**	**5. Additional Requirements**
	Is this Phase I ESA being conducted:
☐ ☐	a. To satisfy environmental policy requirements of the Small Business Administration (SBA), or is SBA otherwise involved in lender or development aspects of this property?
☐ ☐	b. To document compliance with Housing and Urban Development standards at 24 Code of Federal Regulations 58.5(i)(2) or 50.3(i)?

EHS Outsourcing, Bluegrass Ingredients, Inc., Glasgow, KY (2024)
As Environmental Scientist for Phase I of an industrial warehouse property used to store raw finished food products in Glasgow, Kentucky, Sarah conducted regulatory and historical research and prepared the report.

Phase I ESA Camelback, Energy Storage Resources, LLC, Maricopa County, AZ (2024)
As Environmental Scientist for Phase I of an undeveloped desert property in Maricopa County, Arizona, Sarah conducted regulatory and historical research and prepared the report.

Phase I ESA Coconino, Energy Storage Resources, LLC, Navajo County, AZ (2024)
As Environmental Scientist for Phase I of an undeveloped desert property in Navajo County, Arizona, Sarah conducted regulatory and historical research and prepared the report.

Phase I ESA Cortaro, Energy Storage Resources, LLC, Pima County, AZ (2024)
As Environmental Scientist for Phase I of an undeveloped desert property in Pima County, Arizona, Sarah conducted regulatory and historical research and prepared the report.

Phase I ESA Heber, Energy Storage Resources, LLC, Navajo County, AZ (2024)
As Environmental Scientist for Phase I of an undeveloped desert property in Pima County, Arizona, Sarah conducted regulatory and historical research and prepared the report.

Tradeport Dr Phase I ESA, Mercedes Benz USA, LLC, Jacksonville, FL (2024)
Sarah served as the environmental professional for Phase I of a 100,000-square-foot distribution warehouse in Jacksonville, Florida. Duties included coordination of the site visit, interviews with the property owner and property management company, regulatory and historical research, and report preparation.

NAVFAC MidLant_MCRD Sites 1-3 and UST 2 Maintenance and Monitoring and Basewide ER N Support, DO and Mod 01, MSE Group, Parris Island, SC (2021-2024)
As Environmental Scientist, Sarah researched the history of MCRD Parris Island to identify potential contaminant sources that have caused elevated chromium concentrations in sediment at two (2) stormwater outfall discharge points at the facility.

***Environmental Project Manager, Kleinfelder, Inc, Charleston, SC (2015-2024)**
As an Environmental Project Manager, Sarah managed a portfolio of retail fuel facility remediation sites throughout the state of Florida with purchase orders totaling over $226k. She was responsible for delivering project submittals, securing subcontractors, scheduling field staff, tracking project budgets, overall project efficiency, and project billing. She was accountable for maintaining the health and safety of all personnel on job sites, coordinating with regulators, landowners, field staff, and subcontractors, and assisting clients to meet their regulatory compliance requirements while implementing strategies to enhance cost savings and significantly reduce their liability and risk. She was also responsible for maintaining working relationships with existing clients and developing future business opportunities. She has conducted over 200 ASTM-compliant Phase I Environmental Site Assessments throughout the United States (with the majority conducted in the East/Southeast) for a variety of commercial properties and clients (aggregate/sand mines, asphalt plants, shopping centers, retail fuel facilities, agricultural/silvicultural land, and more). During these Phase I investigations, she identified and documented recognizable environmental concerns (RECs) and proposed locations for Phase II sampling. She also prepared numerous Phase II ESA reports and groundwater monitoring reports and am familiar with SPCC plans, transaction screens, and source removal reports.

***Project Geologist, AECOM, Charleston, SC (2012-2012)**
As a Project Geologist, Sarah provided technical and regulatory support and guidance for private clients, as well as the Department of the Navy under the Navy CLEAN contract. She performed numerous field tasks throughout the southeast United States including site assessments/characterizations, soil and groundwater sampling, monitoring well installations, methane monitoring, bioremediation injections, and post closure care monitoring. She also prepared technical documents, including quarterly and annual monitoring and compliance reports for submission to regulatory agencies and clients. Sarah ensured quality work was performed safely by coworkers and subcontractors She actively participated in business development activities, proposal preparation, and subcontractor procurement.

***Phase I ESA, US Army Corps of Engineers, Charleston, SC (2011-2012)**
As an Environmental Scientist, Sarah coordinated and executed Phase I Environmental Site Assessments of current and former military installations involved in Base Realignment and Closure (BRAC) throughout the United States, compiled historic records and photos, conducted site visits, and interviewed personnel on-site. Her findings were presented in final reports and provided to all parties to allow for the transfer of real property. As a member of the Post 45 Project Delivery Team, she assisted in data collection and entry and report preparation for the Charleston Harbor Post 45 Dredging Feasibility Study and Draft Environmental Impact Statement (DEIS) as required by the National Environmental Policy Act (NEPA). She contributed to report sections regarding environmental justice, essential fish habitat, endangered species, Coastal Barrier Resources Act (CBRA) Zones, and harbor sedimentology/stratigraphy. She also participated in and was the scribe for the planning charrette for the Post 45 Study attended by high-ranking team members from all agencies and organizations involved.

***GIS Model for Watershed Preservation, US Army Corps of Engineers, Charleston, SC (2010-2011)**
Within a short time of joining the Corps, Sarah co-managed a pilot watershed study in South Carolina involving stakeholders from governmental agencies at federal, state, and local levels, non-governmental organizations (NGOs), educational institutions, and members of the community. She coordinated meetings and organized

resources from the different agencies and organizations involved and began building a GIS model to determine the best locations in the watershed for preservation, conservation, and restoration to maintain/improve water quality and quantity. Due to federal budget shortfalls at the time, this project was put on hiatus but remains poised and ready to springboard future efforts once funding is available. As an Interagency Review Team Member, she participated in mitigation banking procedures throughout the state. She reviewed proposals and documents and provided feedback as an agent of the USACE, conducted stream and wetland site visits to ensure compliance with federal and state stream and wetland jurisdictional environmental regulations, and developed and launched the Charleston District's mitigation banking website, Regulatory In-lieu Fee and Bank Information Tracking System (RIBITS) for public viewing to provide public access to mitigation banking information and locations in South Carolina. As a Project Manager in the Regulatory Division, she also assisted with wetland jurisdictional determinations and reviewed permit applications for approval.

MILES BALLOGG
NATIONAL BROWNFIELDS PRACTICE LEAD

EDUCATION

BA, Environmental Science & Biology, North Carolina Wesleyan College, 1984

AFFILIATIONS/ ORGANIZATIONS

National Brownfields Coalition, Steering Committee & Environmental Justice & Public Health Committee Co-Chair

National Academy for the Peoples Health, Fellow

Brownfields-to-Healthfield's Initiative, Founder

Florida Brownfields Association, Founding Board Member & Co – Chair Environmental Justice & Public Health Committee,

Agency for Toxic Substance Disease Registry, BROWN - Inaugural Member

Urban Land Institute's Land Rescue Inaugural Member

Florida Redevelopment Association (FRA) Board Member

Florida Community Development Association (FCDA) – Board of Directors

As National Brownfields Practice Leader, Miles has assisted hundreds of clients throughout the Southeast to leverage more than $250M in EPA Brownfields and other redevelopment-related grants and incentives. His experience includes program support, technical assistance, and project coordination for many Brownfields projects using EPA Brownfields grant funding and has obtained and implemented EPA Brownfields Assessment, Area Wide Planning, Multi-Purpose, Cleanup and Revolving Loan Fund, Workforce Development and Targeted Brownfields Assessment Grants and other Regional, State, and Local economic development or redevelopment grants and incentives. He has a particular passion for restoring environmentally blighted areas and advocating for underserved communities and he has been recognized by the USEPA and other organizations as a prominent national leader of the "Heathfield's Movement," which uses brownfields to reduce health disparities and creates visible outcomes in underserved communities, including jobs in healthcare, remediation, and redevelopment of environmentally contaminated sites into free health clinics (9 federally qualified), safe and affordable housing, community green spaces, and easier access to fresh food. He has written extensively on Brownfields, has been published in multiple publications, and has also earned numerous awards for his work in Brownfields, including the Florida Brownfields Association's Carousel of Progress Award, the Dr. Martin Luther King Jr. Brotherhood Award, and the EPA Region IV Brownfields Award for Outstanding Brownfields Program Performance. He is a long-time Environmental Justice, Health Equity, and Equitable Development advocate.

RELEVANT EXPERIENCE

***Robles Park / Historical Zion Cemetery, Tampa Housing Authority, Tampa, FL (2019-2021)**

Miles served as the Principal-in-Charge for Phase I Environmental Site Assessments, as well as NEPA evaluations, for properties located within, or near, the West River Redevelopment area. The NEPA evaluation utilized the guidelines contained in the Environmental Review for Activity/Project that is Categorically Excluded Subject to Section 58.5 (pursuant to 24 CFR 58.35(a). The project also required Phase I ESA services for the Robles Park Village development, which included assistance with identifying the potential location(s) of the former Zion Cemetery and cultural resource investigations pertaining to a historic graveyard on site.

***Environmental Assessment/NEPA Review, Housing and Urban Development, Kissimmee, FL (2021-2022)**

Miles served as the Principal-in-Charge for a HUD Environmental Assessment/NEPA evaluation utilizing the guidelines contained in the Environmental Review for Activity/Project that is Categorically Excluded Subject to Section 58.5 (pursuant to 24 CFR 58.35(a).

***Professional Environmental Services, University Area Community Development Corporation (UACDC), Tampa, FL (2019-2022)**

Miles served as Principal-in-Charge for EPA Brownfields Area-Wide Planning Activities including a Brownfields Site Inventory for the UACDC to identify properties that may constitute an environmental risk or perceived to have resulted in environmental impairment with the CDC's target area. The inventory consisted of the identification of regulated sites per ASTM-established search distances, compilation of the data in GIS format (geodatabase and shapefiles), development of a summary of findings with a map showing the locations of the regulated site (as well as water well facilities). Other services include brownfields and public meeting support, Health Impact Assessment support as well as assisting the UACDC to provide assessment and grant consultation services. The UACDC obtained a $300,000 EPA Brownfields Community-Wide Assessment Grant in 2019. The project required multiple Phase I and Phase II Environmental Site Assessments and Brownfields Reuse planning activities to support a wide range of affordable Housing Projects and the development of the UACDC Cultural Resource Center supported with Hillsborough County Housing Department funds.

***Environmental Assessment and Brownfields Redevelopment, Contemporary Housing Alternatives of Florida - Carr Landing Site, Bradenton, FL (2021-2022)**

Miles served as the Principal-in-Charge for environmental assessment and Brownfields redevelopment activities for a HUD Funded Affordable Housing project including providing public outreach and engagement and required documentation to support as FDEP Brownfields designation, Brownfields Site Rehabilitation Agreement, and Brownfields Site Assessment Report.

***Feeding Northeast Florida Environmental Due Diligence Support, Florida Community Loan Fund, Jacksonville, FL (2019-2022)**

Miles served as the Principal-In-Charge for the environmental due diligence needed to support Florida Community Loan Funds New Market Tax Credit Funding for multiple properties for the Feeding Northeast Florida project, including the completion of Phase I Environmental Site Assessments, Phase II Environmental Assessment Review and completion and other activities to allow for funding in a prominent non-profit within Jacksonville Florida.

***Former H.D. King Power Plant Site Assessment and Targeted Remediation, City of Ft. Pierce/Ft. Pierce Redevelopment Agency (FPRA), Fort Pierce, FL (2017-2019)**

Miles served as the Brownfields Project Director for initial site assessment and targeted remediation utilizing grant funding provided by the Treasure Coast Regional Planning Council's (TCRPC) Brownfields Program. The City of Ft. Pierce/Ft. Pierce Redevelopment Agency (FPRA) needed assistance with finalizing the brownfield site assessment, conducting a structured multi-year contaminated soil removal plan and successfully obtaining site closure for each of the three former power plant parcels. This work and subsequent design and replacement of 1,100 feet of seawall adjacent to the former power plant site was conducted as part of an aggressive downtown revitalization effort by the City of Fort Pierce.

After the initial TCRPC funding source was expended, the FPRA secured three (3) EPA cleanup grants totaling $600,000. This additional funding along with ARRA grant funding and three (3) Revolving Loan Fund (RLF) loans through TCRPC was used in conjunction with City funding from the sale of Voluntary Cleanup Tax Credit (VCTC) certificates to continue remedial efforts.

Contaminants of concern included PCBs, metals, volatile and semi-volatile organic compounds, and total recoverable petroleum hydrocarbons related to over 100 years of power plant operation. Due to the presence of high levels of PCB contamination, A TSCA PCB removal work plan was developed, and 178 tons of soil were removed, exceeding the TSCA threshold of 50 mg/kg. Utilizing the various funding sources noted above, approximately 40,000 tons of petroleum-, metals-, and low-level PCB-impacted soils were removed for off-site disposal during multiple ISR events, which were structured to maximize VCTC recovery for the city. The City received a total of approximately $4,725,000 in tax credits, which were used to repay the RLF loans and fund additional remedial efforts.

Unconditional site rehabilitation completion orders (SRCOs) for two of the three former power plant parcels were obtained, as well as a conditional SRCO with groundwater use restrictions for the main power plant parcel with limitations on the area of the groundwater use restriction to maximize the redevelopment potential of the parcel.

***General Environmental and Brownfields Services, Multiple Clients, Manatee County, FL (2015-2018)**
Miles served as Principal-in-Charge for numerous successful projects, including an EPA Brownfields Coalition Assessment Grant. This included assistance in obtaining the $600,000 grant in partnership with the Cities of Bradenton and Palmetto. He was responsible for planning and executing contaminated site management and safety evaluations and oversaw numerous brownfield site assessments throughout the County, including:

- Unincorporated Manatee County: Haben Blvd (Proposed Hotel Site), Former D&L Automotive, Proposed Oneco (2324 20th Street E), Former Groover Market, HTG – 53rd Avenue
- Bradenton: Grocery Store Site (Minnie Rogers), 9th Avenue East Properties, South Florida Museum, Former Chemistry Hall Labs (Housing Trust Group Site at 6th Avenue)
- Palmetto Sites: Shell Station, HHHT Auto, Former Heartland Fertilizer, Riverside North Properties, 1620 8th Avenue, Former Edenfield Property, 4th Street Parcel, 600 8th & 525 7th Avenues, Covey Trailer, Pinzon LLC Site, 102 1st Street E, 1009 8th Street, 8th Avenue Boatyard (314 8th Ave & 711 3rd Street), GB Stoneworks

***Brownfields Program, City of Clearwater, Clearwater, FL (2003-2021)**
As Project Manager, Miles developed an approved EPA Brownfields Quality Assurance Management Plan and provided technical assistance in the development of numerous QAPPs in accordance with the terms and conditions of EPA Brownfields Assessment Grants, provided technical assistance and project coordination for numerous Brownfield Assessments utilizing EPA grant funding, prepared property profile and US EPA MBE/WBE Utilization forms, developed grant work plans, provided required EPA Quarterly reports, and developed Florida Brownfields Site Rehabilitation Agreements for the City. He also assisted in obtaining over $2.5 million in EPA/FDEP Brownfields & UST fields Assessment Grant Funding.

***Revolving Loan Fund Services, City of Mulberry, Mulberry, FL (2014-2016)**
As Project Manager, Miles provided the City of Mulberry professional services as a Qualified Environmental Professional (QEP) for the EPA Brownfields Revolving Loan Fund Subgrant awarded to the City from the CFRPC for the remediation of the Mulberry Community Center. He served as the Brownfields Project Director providing insight and technical assistance to the City of Mulberry with the successful transformation of the bottom floor of the Mulberry Community Center into a "State of the Art" Mulberry Public Library. The project also required other programmatic support including Davis-Bacon Reporting and grant coordination between the city and the EPA grant recipient the CFRPC. An additional noteworthy project for the city through EPA grants included the transformation of vacant land next to an active service station into the Central Florida Health Care Federally Qualified Health Center. This project now provides health care for many formerly medically underserved residents.

***Revolving Loan Fund Services, City of Bartow, Bartow, FL (2012 – 2014)**
As Project Manager, Miles oversaw this project providing RLF services under a subgrant from the CFRPC for the environmental clean-up of the historic Bartow Cigar Factory. A broad range of services have been provided including grant programmatic support, Davis-Bacon Act compliance, QEP, and subcontractor oversight – asbestos, lead-based paint, mole and pathogen abatement, and hazardous substance impacted soil removal concluding with confirmatory sampling.

***Revolving Loan Fund Services, Palm Beach County, Palm Beach, FL (2013- 2021)**
As Project Manager, Miles performed programmatic and QEP support for this RLF program and assisted the County in the identification of key projects leading to the success of their Brownfields RLF Grant. He provided

technical assistance with several successful Brownfields RLF projects to date. The County received a $1M USEPA Brownfields RLF Grant in 2013 and a supplemental $300k RLF in 2015.

***General Brownfields Services, City of Tampa, Tampa, FL (2003 - 2022)**
As Brownfields Director, Miles provided the City of Tampa CRAs and the East Tampa Community Redevelopment Agency with ongoing Brownfields Redevelopment Program Services since 2003. To date, more than 125 projects have been completed. Project responsibilities included:

- General Brownfield Support
- Brownfields Funding Support
- Community Involvement and Engagement
- Brownfields Inventory and Environmental Database Search
- Brownfield Environmental Assessment and Redevelopment Assistance
- Phase I/II ESAs
- Storage Tank Removal
- Indoor Air Quality
- Asbestos/Lead-Based Paint
- Community Outreach/Workshops
- Property Identification
- Database Development and GIS Inventory
- Soil and Groundwater Remediation
- Construction

***Brownfield Program, City of Cocoa, Cocoa, FL (2003- 2017)**
Miles served as Brownfields Director for ongoing Brownfields consulting to the City of Cocoa, obtaining $1.4 million in grant funding to date. Brownfield grant awards and tasks included:

- $200,000 EPA Brownfields Hazardous Waste Assessment Grant
- $200,000 EPA Brownfields Petroleum Assessment and $200,000 Hazardous Substance Assessment Grants
- $200,000 EPA Petroleum Assessment and $200,000 Hazardous Substance Assessment Grant
- $200,000 EPA Brownfields Petroleum Assessment and $200,000 Hazardous Substance Assessment Grants
- Completed EPA Brownfields Approved Quality Assurance Management Plan
- Completed Numerous EPA Brownfields Quality Assurance Project Plans
- Completed an EPA Brownfields Area-Wide Environmental Database and GIS Database search for regulatory listed sites and potential Brownfields Redevelopment opportunities within the City of Cocoa's Brownfields and Community Redevelopment Areas.
- Post Office Site: EPA Brownfields/ASTM Phase I/II Environmental Site Assessment of former post office property, now LEED-certified City Hall building.
- Completed Phase I and Phase II Environmental Site Assessments on 12 potential redevelopment sites.

***General Brownfields Services, Central Florida Regional Planning Council (CFRPC), Central, FL (2009-2019)**
As Brownfields Director, Miles provided Brownfields Consulting and Assessment Services to the Central Florida Regional Planning Council (CFRPC) under a Coalition Assessment and Revolving Loan Fund Grant(s). He assisted the council in obtaining their grant funding and provided Programmatic Grant Support Services. Work included completing Area-Wide Environmental Database and Brownfields Inventory for seven areas within the Planning Council's area. These regions included Eloise, Highland City Town Center, Mulberry, US 92 Center Auburndale, US 98 Polk Parkway, Wabash, and Wahneta. Properties located within the defined CFRPC redevelopment areas were susceptible to the impacts related to historic phosphate mining. Close collaboration with the Florida Department of Health (DOH) Radiation Monitoring Division to develop procedures to screen properties for radiation in soil and groundwater as part of the assessment process. Key services include:

- Phase I/II ESAs
- Indoor Air Quality
- Asbestos/Lead-Based Paint
- Community Outreach/Workshops
- Property Identification
- Database Development/GIS Inventory
- Quality Assurance Project Plans
- Programmatic Support

***Brownfield Redevelopment Services, Pasco County, Pasco County, FL (2011-2018)**
As Brownfields Director, Miles assisted Pasco County in obtaining their 2015 EPA Brownfields Grant Award of $600,000. In 2011, they were also the recipient of a $1 million EPA Brownfields Assessment Coalition Grant. These grants have empowered the County to conduct site-specific assessments, conduct site inventories, develop clean-up plans, conduct public health monitoring, and support community outreach programs. Key focus areas and associated projects to date have included:

- Lacoochee: Phase I/II ESA of proposed community center site (which acted as the catalyst for a site-specific EPA Clean-up Grant), Phase I ESAs on potential affordable housing sites, and Contamination Screenings/Limited Phase II ESAs for four proposed infrastructure improvement areas.
- Zephyrhills: Phase I and Phase II ESA of former retail gasoline facility (including asbestos and lead screening services), Phase I ESA and asbestos screening of potential affordable housing sites.
- Dade City: Phase I ESAs with asbestos screenings of five proposed affordable housing sites. Phase I, II, and Supplemental Phase II ESAs, as well as reuse planning, for the former Pasco Motors properties in the heart of Dade City for potential redevelopment.
- New Port Richey & Port Richey: Extensive assessment and reuse planning of the former Community Hospital site in New Port Richey. Phase I ESAs with asbestos screenings of ten proposed affordable housing sites. Phase I ESAs with demolition asbestos screening for properties included in the planned US/Main Street redevelopment (seven properties)

Key Services included:
- Environmental Assessment
- Site Characterization
- Community Involvement Plans
- Redevelopment Service (including reuse planning)
- Brownfield Programmatic Support

***TOHO Plaza, Mosaic Development, Kissimmee, FL (2015-2017)**
As Brownfields Director, Miles provided site/civil and structural engineering, environmental, and Brownfields assistance to Mosaic Development to help the City of Kissimmee realize its redevelopment plans. The Plan focused on the creation of commercial uses capable of attracting permanent jobs while providing rental and for-sale housing, commercial public/private space, as well as the economic infusion created by a hotel that embraces the existing marina and events that are already achieving great success in the area. To accomplish this, the Mosaic Team developed a mixed-use master development comprised of 260 market-rate apartments, 16 for-sale townhomes, 21 flat apartment units, a 120 key boutique hotel, 15,000 square feet of neighborhood commercial, and 3,500 square feet of community spaces. This new development helped establish Kissimmee as a destination and create an essential link between the city's waterfront and downtown core and the new Lakefront Park.

***Brownfields Consulting Services, City of Gulfport, Gulfport, FL (2013-2016)**
As Brownfields Director, Miles provided Brownfields Program Assistance to the City of Gulfport including community outreach to inform and educate stakeholders within the community, including the City Council, on

the benefits of the State and Federal Brownfields grants and incentives. A "Brownfield Designation Program Document" was developed for the city. Grant writing and Work Plan development for the current $400,000 EPA Brownfields Assessment Grant were provided.

*ADDITIONAL SIGNIFICANT PROJECTS

- Treasure Coast Regional Planning Council (TCRPC) EPA Brownfields Assessment and Clean-up Revolving Loan Fund (RLF) Grants, Project Director
- Central Florida Regional Planning Council (CFRPC) – EPA Assessment, Clean-up Revolving Loan Fund and Area-Wide Planning Grants, Project Director
- City of Clearwater – EPA Brownfields Assessment, Clean-up Revolving Loan Fund and Workforce Development Grants, Project Director
- City of Cocoa EPA Brownfields Assessment, Clean-up Grants, Project Director
- City of Ft. Pierce (HD King Power Plant) EPA Brownfields Clean-up and Clean-up Revolving Loan Fund Grants, Project Director
- City of Gulfport EPA Brownfields Assessment Grant, Project Director
- Pasco County EPA Brownfields Assessment and Clean-up Grants, Project Director
- City of Tampa EPA Brownfields Assessment, Clean-up and Multipurpose Grants, Project Director
- Sarasota-Manatee Metropolitan Planning Organization (MPO) – EPA Brownfields Coalition Assessment Grant, Project Director
- City of Lake Worth EPA Brownfields Assessment Grant, Project Director
- Seminole Tribe of Florida EPA Brownfields Assessment Grant and Arsenic Remediation Project, Project Director
- Anchorage Park Redevelopment Project, Village of North Palm Beach, Project Director
- Rio Civic Center- Brownfields Redevelopment Project, City of Jenson Beach, FL, Project Director
- Pahokee Plaza Redevelopment Project, Pahokee FL, Project Director
- 480 U.S Highway 27- Brownfields Redevelopment Project, City of South Bay, Project Director
- Northwood Brownfields Redevelopment Project, City of West Palm Beach, FL, Project Director
- Encore Brownfields Redevelopment Project, Tampa, FL, Project Director
- Prospect Lake Brownfields Redevelopment Project, Clearwater, FL, Project Director
- Robinson Preserve EPA Brownfields Assessment – Manatee County, Project Director
- Lacoochee EPA Brownfields Assessment and Clean-up Community Center Project – Lacoochee, FL, Project Director
- Premiere Health Care Center, EPA Brownfields to Health fields Redevelopment Project - Lacoochee, FL, Project Director
- Central Florida Health Care Facility- EPA Brownfields to Health fields Redevelopment Project – Mulberry, FL, Project Director

*BROWNFIELDS PROGRAM MANAGEMENT

- Project Director assisting communities receiving EPA Brownfields funding; providing comprehensive project management and programmatic support. Including Cities of Clearwater, Cocoa, Edgewater, Gulfport, Lake Worth, Palmetto, Tampa, Winston Salem NC, CFRPC, TCRPC, Sarasota -Manatee MPO, Metropolitan Planning and Development Agency (Nashville TN), Seminole Tribe of Florida, and multiple other Brownfields grant recipients
- Assisted in developing local Brownfields redevelopment programs for the City of Clearwater, City of Gulfport, CFRPC, Pinellas County, East Tampa Redevelopment Area, Central Florida Regional Planning Council, and other local governments and entities
- Assisted in the development of Brownfields Site Rehabilitation Agreements for Tampa Shipbuilders and Repair, Greenwood Community Health Resource Center, Banc of America Riverfront Project, Banc of America Encore Project, City of Tampa 12th Street Yard, Dimmitt Property, Northwood Redevelopment

Area (Anchor Project), Clearwater Automotive Salvage Yard, and numerous other public and private clients.

- Assisted with Local Government State Brownfields Area Designations including STAR Center, Lealman Brownfields Area, City of Clearwater Brownfields Area, Banc of America- Riverfront Project, City of Tampa 12th Street Yard, City of Cocoa Brownfields Area, Banc of America -Encore Project City of Ft. Mead Brownfields Areas, and multiple other state-designated Brownfields areas
- Provided extensive EPA Brownfields Clean-up Revolving Loan Fund assistance to local governments throughout the southeast including – City of Clearwater, CFRPC, Hillsborough County, Treasure Coast Regional Planning Council, and South Florida Regional Planning Council
- Brownfields Project Director for numerous Health fields projects including – Willa Carson Community Health Resource Center- Clearwater FL, Tampa Family Health Center, Premiere Health Center – Lacoochee Florida, Central Florida Health Center, and Mulberry Florida
- Completed the First Health Impact Assessment (HIA) utilizing EPA Brownfields Funds for the Lacoochee Community Center Project in Pasco County and assisted in multiple Health Impact Assessments for Cities of New Smyrna Beach, Edgewater, Oak Hill, Tampa, Clearwater, and the University Area Community Development Corporation
- Assisted in the first Florida Brownfields Designation for the Clearwater Brownfields Area

*TECHNICAL PROJECT MANAGEMENT

- Project Director/Manager for over 1,500 Brownfields site assessment and clean-up projects
- Served as EPA /FDEP liaison for local governments & provides technical assistance pertaining to Brownfields Assessment and Brownfields Clean-up and Brownfields Clean-up RLF Grant requirements, and Quality Assurance issues
- Assisted in the development of Quality Assurance Management Plans (QAMP) for Pinellas County, City of Tampa, City of Clearwater, City of St. Petersburg and TCRPC. Also assisted in developing various EPA and/or site-specific Quality Assurance Project Plans (QAPPs) for the Cities of Clearwater and Tampa including - Joe DiMaggio Field, Phillip Jones Field, Clearwater Automotive & Community Sports Complex, Tampa Shipbuilders, Tampa Scrap, and other grant recipients
- Provided area-wide identification of potential Brownfields sites and inventories and GIS databases within the TCRPC, Cross Bayou Watershed, and Lealman Communities within Pinellas County, Clearwater Brownfields Area, City of Cocoa, City of Gulfport, City of Tampa, and many others throughout Florida
- Assisted with Brownfields Targeted Site Assessment Applications for the City of Clearwater, City of St. Pete Beach, Tampa Port Authority, City of Tampa, and the City of Gulfport Florida, CFRPC, University Area Community Development Corporation and other communities within Florida
- Project Manager for EPA-funded regional Public Health Monitoring Plan for the City of Clearwater and City of Tampa

*REPRESENTATIVE REDEVELOPMENT ASSISTANCE

- Assisted Banc of America with state and federal Brownfield's redevelopment designations and grant funding for the proposed $50 million mixed-use Riverfront and $600 million Encore Project
- Provided environmental and Brownfields oversight for the development of a $16 million residential townhome project on a former auto dealership property.
- Assisted private sector client in receiving first Florida Brownfields Loan Guarantee for $11 million Urban Infill (Publix) Shopping Center
- Provided environmental due diligence support for an $8 Million New Market Tax Credit Application to expand five Federally Qualified Health Centers in Central Florida
- Environmental due diligence to support the development of a grocery store anchored mixed-use redevelopment in Bradenton, FL

- Currently assisting private sector clients with Brownfields redevelopment projects in Kissimmee, Clearwater, Jacksonville, and Sanford, FL

*GRANT FUNDING AND EPA DESIGNATION SUPPORT

- Assisted in securing over $75 million in Brownfields and other redevelopment grants and incentives since 2001 for clients.
- Initiated and worked closely with the most successful Brownfields Grant Writing Team in Florida.
- Obtained the only EPA Multi-Purpose Grant for the City of Tampa awarded in EPA Region IV (to date)
- Obtained one of 10 nationwide EPA One Clean-up/Land Revitalization Designations for Pinellas County for the Cross Bayou Watershed
- Obtained one of two EPA Region IV Brownfields Petroleum Corridor Designations for the Sarasota/Manatee County MPO – Tamiami Trail Scenic Highway
- Facilitated award of one of three nationwide NOAA Portfield's Designations for the Tampa Port Authority
