Clearwater, Florida 33756

Re: Phase I Environmental Site Assessment Report
Washington Avenue Parcels
205 South Martin Luther King Jr Avenue — Clearwater, Florida

Dear Mr. DiCicco:

EnSafe Inc. is pleased to provide the enclosed Phase I Environmental Site Assessment Report for the above-referenced property.

If you have any questions or require additional information, please contact me at 843-364-1892 or sespinoza@ensafe.com.

Respectfully submitted,

EnSafe Inc.

Sarah C. Espinoza

Environmental Professional Statement:
We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 40 Code of Federal Regulations (CFR) Part 312.10. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Miles Ballogg

EXECUTIVE SUMMARY

EnSafe Inc. performed a Phase I Environmental Site Assessment (ESA) of the Washington Avenue parcels property at 205 South Martin Luther King Jr Avenue, Clearwater, Pinellas County, Florida (subject property), in conformance with the ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation E1527-21 (ASTM E1527-21). This executive summary provides an overview of the Phase I ESA findings with sufficient information to understand the conclusions and environmental professional opinion that resulted from interviews, records review, and a site reconnaissance on October 14, 2025.

Subject Property

- The 3.41-acre subject property comprises a vacant grass lot owned by the Community Redevelopment Agency of the City of Clearwater, Florida. The subject property consists of seven adjoining parcels. No structures are currently on the subject property. Overhead electrical transmission lines run along the east subject property boundary. The subject property is currently unoccupied, except for a truck and trailer parked in the southwest portion.

- The subject property was first developed prior to 1921 as an orchard. A residential structure was first constructed on the subject property in 1923. By 1929, several residences were on the subject property, along with a dry cleaning facility. A metal foundry (Gulf Machinery Company) operated on the subject property from approximately 1949 through 1967. Clearwater Automotive Salvage/Repairs operated an automotive salvage yard on the subject property from 1970 through 2005. In 2006, the subject property was razed, remaining a vacant grassy lot since. The subject property has occasionally been utilized as a laydown yard for City projects and as a Disaster Debris Management Site after natural disasters.

- Site assessment investigations from 2004 through 2006 identified petroleum-related constituents in soil in isolated areas in the shop and storage areas of the salvage yard in the north portion of the subject property. Several iterations of soil excavation occurred in 2007 and 2008. Confirmation sampling conducted on the subject property after excavation activities were completed did not identify concentrations of contaminants of concern above their respective Soil Cleanup Target Levels. The subject property was issued a Site Rehabilitation Completion Order in July 2009.

- The subject property has been used to temporarily store and process debris (construction and demolition debris, yard trash, and mixed debris) after natural disasters, including hurricanes, since 2024. Soil sampling conducted for permit close out in March 2025 yielded a lead concentration of 7.4 milligrams/kilogram. Laboratory analytical results indicated no lead impacts to groundwater. Based on the lack of groundwater impacts, the site was approved for closure in July 2025.

Surrounding Area Properties

- The subject property is in a mixed-use residential, commercial, and light industrial area of Clearwater, Florida. No adjoining or surrounding area properties were identified with releases that have or have likely migrated to the subject property.

Environmental Professional Opinion

This assessment has identified no *recognized environmental conditions* or *controlled recognized environmental conditions* in connection with the subject property.

EnSafe has identified the following *historical recognized environmental condition:*

- Soil contamination from former foundry and drycleaning activities on the subject property that subsequently received a Site Rehabilitation and Completion Order.

EnSafe has identified the following *significant data gap:*

- Limited information was available regarding the historical use of per- and polyfluoroalkyl substance-containing chemicals associated with the past metal foundry operations on the subject property, which constitutes a *significant data gap* in evaluating potential environmental impacts associated with this historical use and precludes EnSafe's ability to identify *recognized environmental conditions.*

This executive summary is an excerpt of a detailed Phase I ESA report that includes elements necessary for proper interpretation, including definitions, limitations, exceptions, and deviations to ASTM E1527-21 and established scope of work. As such, the executive summary should not be used independently of the Phase I ESA report.

1.0 INTRODUCTION

EnSafe Inc. was retained by the City of Clearwater to conduct a Phase I Environmental Site Assessment (ESA) of the Washington Avenue parcels at 205 South Martin Luther King Jr Avenue in Clearwater, Pinellas County, Florida (subject property), as shown in Figure 1 (Appendix A) Site Location Map.

The 3.41-acre subject property, consisting of seven adjoining parcels (Pinellas County Parcel Numbers 15-29-15-65196-000-0030, 15-29-15-65196-000-0063, 15-29-15-65196-000-0035, 15-29-15-65196-000-0034, 15-29-15-65196-000-0062, 15-29-15-65196-000-0061, and 15-29-15-65196-000-0060), is owned by the Community Redevelopment Agency of the City of Clearwater, Florida. The subject property comprises a vacant grass lot with no structures. Figure 2 (Appendix A) is a Site Layout and Vicinity Map, which shows the subject property layout and adjoining properties. Significant features of the subject property are detailed in Sections 2 and 3.

The subject property is adjoined to the north by a car repair facility (AAMCO Transmissions); to the east by South Washington Avenue followed by vacant commercial land and residences; to the south by Gould Street followed by residences and a car repair facility (Mufflers and Brakes Plus); and to the west by South Martin Luther King Jr Avenue followed by (from north to south) a vacant light manufacturing warehouse, a vacant industrial warehouse, residential apartments, and a pest control company (Mosquito Magician).

1.1 Purpose

The subject property was assessed with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) and petroleum products. The ASTM International (ASTM) *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process* Designation E1527-21 (ASTM E1527-21) is the current industry standard used to define good commercial and customary practice for conducting an environmental site assessment of a parcel of commercial real estate. In accordance with ASTM E1527-21, this Phase I ESA is intended to identify evidence of the following.

- *Recognized environmental condition* (REC) — "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment."

- *Controlled recognized environmental condition* (CREC) — "a *recognized environmental condition* affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations)."

- *Historical recognized environmental condition* (HREC) — "a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations). A *historical recognized environmental condition* is not a *recognized environmental condition.*"

- *De minimis condition* — "a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. A condition determined to be a *de minimis condition* is not a *recognized environmental condition* nor a *controlled recognized environmental condition*."

1.2 Scope of Services

The Phase I ESA includes the following elements:

- Reconnaissance of the subject property on October 14, 2025, by Mr. Miles Ballogg of EnSafe under the direction of Environmental Professional Ms. Sarah Espinoza of EnSafe. Select photographs taken during the site reconnaissance are in a Photo Log in Appendix B.

- Interviews with personnel by Ms. Sarah Espinoza of EnSafe, discussed in Section 2.

- Review of the following standard historical resources for the subject and adjoining properties; select copies are provided in Appendix C or as noted in Table 1.

Table 1 Standard and Other Historical Sources

Notes:
SP = Subject property
AP = Adjoining property
NA = Not available from resources researched
NP = Not provided as an Appendix

- Review of physical setting resources provided by a commercial database search company, which included the most recent United States Geological Survey (USGS) 7.5-Minute topographic map, in Appendix D.

- Review of standard and additional federal, state, and local government records for the subject property and properties within ASTM E1527-21 approximate minimum search distances (AMSDs). Database search information is provided in Appendix E.

- Review of regulatory information available from the United States Environmental Protection Agency (U.S. EPA) Envirofacts website and Florida Department of Environmental Protection websites and files. Select information is provided in Appendix F.

- Review of information from websites and other sources listed in Section 6 excerpted information is provided in Appendix G.

1.3 Client Information and User Responsibilities

EnSafe was retained by the City of Clearwater to conduct the Phase I ESA. According to ASTM, the user shall make known the reason for the Phase I ESA. In contracting EnSafe for the Phase I ESA, and documented in the User Questionnaire included in Appendix G, the City of Clearwater indicated the Phase I ESA was being conducted to establish the innocent landowner defense to CERCLA liability and to sell a property.

This assessment is intended to constitute all appropriate inquiries (AAI) into the previous ownership and uses of the property consistent with good commercial and customary practice as defined in 42 United States Code Section 9601 (35)(B) and promulgated at 40 Code of Federal Regulations Part 312 (AAI Final Rule). As such, the assessment is intended to permit the designated user to satisfy one of the requirements to qualify for the innocent landowner, bona fide prospective purchaser, or contiguous property owner limitations on CERCLA liability (hereinafter, the Landowner Liability Protection).

The AAI Final Rule and ASTM E1527-21 Section 6 describe tasks to be performed by or on behalf of a party seeking to qualify for a Landowner Liability Protection. The information that results from those tasks should be provided to the environmental professional to consider with respect to identifying RECs. Appendix G contains a questionnaire provided to the User outlining those tasks.

The User completed the questionnaire and did not have knowledge related to those tasks.

1.4 Non-Scope Items

At the request of the City of Clearwater, and as documented in Appendix G, EnSafe's Phase I ESA scope of work was not expanded to include consideration of environmental issues that are beyond the scope of ASTM E1527-21.

1.5 Qualifications

Appendix H includes resumes that document the qualifications of the Environmental Professional responsible for this Phase I ESA and for personnel who conducted the site reconnaissance as part of this Phase I ESA.

2.0 INTERVIEWS

2.1 Owners, Operators, Occupants, Key Site Manager, Local Officials

Table 2 lists personnel interviewed, indicates their association with the subject property or this Phase I ESA, and summarizes topics discussed and information provided.

Table 2
Summary of Interviews

Interviewee Name and Title or Affiliation	ASTM E1527-21 Association with Subject Property	Date	Content/Section Discussed
Joseph DiCicco Senior Environmental Specialist City of Clearwater	Key Site Manager/ Current Owner	10/30/2025	Current subject property operations and conditions/Section 2.1.1
Clearwater Fire Station #45	Local Official	11/1/2025	EnSafe attempted to interview fire department officials regarding their knowledge of fire responses and/or hazardous materials incidents at the subject property; however, personnel with that knowledge were unavailable at the time.
Sherry Watkins Planning and Development Department City of Clearwater	Local Official	11/5/2025	Ms. Watkins stated that she had several violation records for the subject property (vehicle parked with no tags, etc.); however, none are indicative of an environmental concern with the subject property.

2.1.1 Key Site Manager Interview

EnSafe interviewed Mr. DiCicco via telephone on October 30, 2025. Mr. DiCicco stated that he has been employed by the City of Clearwater for approximately 17 years and noted that his predecessor facilitated the investigation and remediation of the subject property in the Brownfields program and the subject property received a Site Rehabilitation and Completion Order (SRCO) in 2009. During Mr. DiCicco's employment, the subject property has been an unoccupied vacant lot that is occasionally used as a laydown yard for city projects (e.g. sewer lines). He also noted that the subject property was used as a debris management location after hurricanes, where household refuse (drywall, couches, refrigerators, etc.) was brought and then sorted for disposal. Mr. DiCicco is unaware of any substantial amounts of petroleum products or hazardous substances currently used, stored, or disposed of on the subject property. Mr. DiCicco is unaware of any spills or releases of petroleum products or hazardous substances on the subject property or on any adjoining or surrounding properties since his employment began. Mr. DiCicco stated he is unaware of any wells or septic systems on the subject property. Mr. DiCicco noted that the concrete vault discovered during a 2020 geotechnical investigation of the subject property remains onsite.

2.1.2 Interview Data Gaps

The following data gaps relative to interviews were encountered:

- EnSafe did not interview past owners, past operators, or past occupants of the subject property, as contact information was not provided. The limited amount of information available regarding former foundry operations on the subject property represents a *significant data gap*.

2.2 Helpful Documents

EnSafe requested the following helpful documents from the User on October 20, 2025, from the subject property owner, and key site manager. Table 3 summarizes the interviewed person's knowledge of the availability of such documents and whether copies were provided to EnSafe for review. The User/subject property owner/key site manager indicated that most available documents could be accessed via OCULUS.

Table 3

2.2.1 Phase I ESA (Montrose Environmental Solutions – August 2020)

Montrose Environmental Solutions (Montrose) conducted a Phase I ESA of the subject property in August 2020. The Phase I ESA was conducted in general accordance with ASTM Standard E1527-13, the current standard at the time. Montrose identified the following historical recognized environmental condition:

- "Based on the on-site soil and groundwater assessment activities and source removal conducted in 2004-2008 in response to suspected contamination due to historical site operations that received SRCO by the FDEP, the former discharge associated with the Clearwater Automotive Site represents a HREC."

Montrose did not identify RECs, CRECs, or *de minimis* conditions in connection with the subject property.

2.2.2 Geotechnical Report (ECS Florida, LLC– June 2020)

ECS Florida, LLC (ECS) conducted a geotechnical survey of the subject property in November 2020. Wood, gravel, concrete, and metal debris were found in soil down to 9 feet below ground surface throughout the subject property. A concrete vault measuring 8 feet by 16 feet was discovered in the north-central portion of the subject property. ECS recommended removal of the concrete vault prior to redevelopment of the subject property.

The former use/purpose of the concrete vault is unknown; however, site investigation activities did not identify contaminants of concern at concentrations above their respective Soil Cleanup Target Levels (SCTLs).

3.0 SUBJECT PROPERTY

Subject property information discussed below was obtained from historical resources identified in Section 1.2 and referenced in Section 6.

3.1 Historical Records Review

The historical records review was conducted to identify evidence of RECs in connection with past uses of the subject property.

3.1.1 Historical Development

Table 4 summarizes subject property development based on review of historical resources listed in Section 1.2/Table 1.

Table 4
Historical Development

Date Range	Resource(s) Used	Observations
1917	Fire insurance map	The subject property is not depicted on the 1917 fire insurance map.
1921	Topographic map	The subject property appears to be depicted as part of an orchard.
1923	Fire insurance map	A residence is depicted in the southeast portion of the subject property. Greenwood Avenue adjoins the subject property to the west and Gould Street adjoins the subject property to the south.
1929-1943	Fire insurance map, aerial photograph, and topographic map	A shed is depicted in the vicinity of the residence in the southeast portion. A structure labeled "drycleaning" is depicted in the northwest portion of the subject property along with a second, smaller structure.
1949-1951	Fire insurance map and aerial photograph	The residence and small structure in the southeast portion are visible. An additional residence is depicted in the southwest portion along Greenwood Avenue. The small additional structure in the northwest portion appears to have been razed. The drycleaning structure is now labeled as a machine shop. A larger structure adjoins the machine shop to the north and is labeled as "welding." A small structure apparently labeled as a furnace is just outside the machine shop to the east. A large structure labeled "Foundry" is just south of the machine shop. Two additional smaller structures are depicted in the northwest corner of the subject property.
1957-1999	Aerial photographs, topographic maps, Google Earth imagery, and fire insurance maps	Additions appear to have been made to the foundry and machine shop structures, and they now occupy the majority of the north portion of the subject property. Vehicle parking areas are visible around the foundry and machine shop structures. Two duplexes are depicted in the east-central portion of the subject property. A residential structure is depicted along Gould Street. A welding shop, store, and warehouse are depicted in the southwest corner of the subject property in 1965.
2006-2016	Aerial photograph, Google Earth imagery, and topographic maps	Subject property structures appear to be razed and graded by 2006. Revegetation with grass occurs through 2015.
2017-2019	Aerial photograph and Google Earth imagery	Land disturbance activities are visible in the south portion of the subject property. Pipes, tubes, and machinery are visible in the south portion.

Table 4 Historical Development		
Date Range	**Resource(s) Used**	**Observations**
2020-2024	Aerial photographs and Google Earth imagery	The machinery, tubing, and pipes are no longer in the south portion of the subject property. The south portion of the subject property revegetates with grass over the years.
2025	Google Earth imagery	Land disturbance and grading activities are visible throughout the subject property.

3.1.2 Historical Uses

Table 5 describes obvious historical uses of the subject property, based on review of historical resources listed in Section 1.2/Table 1.

Table 5 Historical Uses			
Date Range	**Resources Used**	**Occupant(s)**	**Uses/Operation(s)**
1921	Topographic map	Unoccupied	The subject property appears to be part of a larger orchard.
1923	Fire insurance map	Residents	A residential structure is on the subject property.
1929-1931	Fire insurance map and city directory	Carmack Drycleaning Company Residents	Drycleaning. No other information regarding site operations is available.
1939	City directory	Greenwood Auto Parts Residents	No information regarding site operations is available.
1949-1967	Fire insurance map, city directory, newspaper article	Gulf Machinery Company Residents	A metal foundry for stainless steel fabrication. No specific information regarding site operations is available. Residents are listed at the duplex addresses of 308A and 308B South Washington Avenue.
1970-2005	City directory and regulatory reports	Clearwater Automotive Salvage/Repairs Residents	Automotive salvage and repair facility

The subject property was used as a metal foundry from 1949 through 1967. Although there are no specific references made to PFAS compounds at the subject property associated with metal foundry operations, based on the operations and time frame (1949 to 1967), there is a potential for the historical use of PFAS-containing wetting agents/fume suppressants or other formulations.

Current operations are discussed in Sections 3.2 and 3.3.

3.1.3 Data Failure

ASTM E1527-21 Section 8.3.8 requires identifying all obvious uses of the subject property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. The earliest useful historical resource that shows the subject property is the 1921 topographic map which depicts the subject property as an orchard. The failure to obtain historical documentation dating back to the property's first developed use is considered a data failure; however, based on the agricultural development of the subject property and the residential development of the surrounding area, preceding industrial development indicative of RECs is unlikely.

Table 6 identifies standard historical resources that were not obtained or reviewed and explains why.

Table 6
Historical Resources Not Reviewed

Standard Historical Source	Reason(s) Not Reviewed
Interviews with former owners, operators, or occupants	No contact information available.

3.2 Site Reconnaissance — Current Subject Property Uses

The subject property was visually assessed on October 14, 2025, by Mr. Miles Ballogg of EnSafe unaccompanied. The purpose of the reconnaissance was to determine current uses and to identify evidence of RECs in connection with the subject property. EnSafe personnel walked throughout the subject property. The subject property was also viewed from adjacent public thoroughfares. Observations made of adjoining properties during the subject property reconnaissance are discussed in Section 4.1.

Representative photographs taken during the site visit are in Appendix B.

The subject property comprises a vacant grass lot with no permanent structures; however, during the site reconnaissance, several trucks and trailers were observed in the southwest portion of the subject property. South Washington Avenue adjoins the subject property to the east, Gould Street adjoins the subject property to the south, and South Martin Luther King Jr Avenue adjoins the subject property to the west.

No utilities are currently available at the subject property; however, overhead electrical transmission lines run along the east subject property boundary.

3.3 Interior and Exterior Observations

Table 7 lists features, activities, uses, and conditions applicable to the subject property based on EnSafe's visual observations of the interior and exterior and interviews.

Table 7
Site Reconnaissance — Summary of Observations and Interviews

Features, Activities, Uses, and Conditions	Observed Yes/No	Identified by Interview Yes/No	Comment/Report Section
Hazardous substances and petroleum products	**Yes**	No	3.3.1
Storage tanks	No	No	—
Strong, pungent, or noxious odors and their sources	No	No	—
Standing surface water, pools, or sumps	No	No	—
Drums, totes, and intermediate bulk containers	No	No	—
Unidentified substance containers	No	No	—
Electrical or hydraulic equipment known to contain or likely to contain polychlorinated biphenyls	No	No	—
Means of heating and cooling subject property buildings, including fuel source(s)	No	No	—
Stains or corrosion on floors, walls, and ceilings	No	No	—
Drains and sumps	No	No	—
Pits, ponds, or lagoons	No	No	—
Stained soil or pavement	No	No	—
Stressed vegetation	No	No	—
Solid waste indicative of onsite disposal	No	No	—
Water/wastewater	No	No	—
Wells	No	No	—
Septic systems or cesspools	No	No	—

3.3.1 Hazardous Substances and Petroleum Products

Three 5-gallon containers of gasoline and an automotive battery were observed on a flatbed trailer in the southwest portion of the subject property. No leaks or stains were observed in the vicinity of the gasoline containers or battery.

3.4 Environmental Records Review

EnSafe obtained standard environmental record resource information directly from a commercial service. The subject property is listed on several environmental databases researched.

Clearwater Auto Salvage/Clearwater Automotive Site is listed in the Contaminated Sites, Environmental Restoration Integrated Cleanup, Federal Brownfields, Voluntary Cleanup Sites, Waste Cleanup Responsible Party Sites, and Facility Registry Service/Facility Index (FRS/FINDS) databases.

Phase II/Brownfields Site Assessment investigations in 2004 yielded soil samples with reported concentrations of total recoverable petroleum hydrocarbons (TPRH), arsenic, barium, polycyclic aromatic hydrocarbons (PAHs), and three naphthalene/methylnaphthalene isomers above their respective SCTLs. Impacted soils appeared to occur in isolated areas of limited areal extent throughout the shop and storage areas of the salvage yard in the north portion of the subject property. Naphthalene exceeded its respective Groundwater Cleanup Target Level (GCTL) in one groundwater monitoring well sampled in August 2004.

Brownfields Site Rehabilitation Agreement BF529701004 was executed by the FDEP on September 26, 2005, to address onsite contamination. Automotive salvage operations ceased at the subject property in November 2005. No groundwater samples exceeded GCTLs during groundwater sampling in July 2006, and groundwater monitoring wells were abandoned in August 2006. Remaining buildings on the subject property were demolished in 2006. Two building foundations discovered during excavation activities were also removed, including several sumps and pipes associated with a storm drainage system, as well as a presumed oil/water separator.

Interim source removal activities were conducted in February 2007, and approximately 506 cubic yards of soil, along with concrete, sludge, and liquid waste (generated from cleaning sumps), were removed from the subject property. Post-excavation sampling identified an estimated 370 cubic yard of PAH- and arsenic-impacted soil along the north boundary of the subject property remained after the initial excavation activities in 2007. An additional estimated 4,906 tons of impacted soil and debris were removed in August 2008. Confirmation sampling conducted on the subject property after excavation activities were completed did not yield concentrations of contaminants of concern above their respective SCTLs. The subject property was issued a SRCO in July 2009. As such, the FDEP noted that no further action is required to ensure that the land use/redevelopment identified in the Brownfields Site Rehabilitation Agreement is consistent with existing and proposed uses of the subject property.

City of Clearwater is listed in the Brownfield Area database. The Clearwater Brownfield Area, which includes the subject property, was first designated a Brownfield Area in October 1997. In March 2002, Resolution 02-15 was passed, expanding the Brownfield Area to include additional properties within Clearwater. Brownfields are defined by FDEP as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination.

City of Clearwater Disaster Debris Management Site is listed in the Solid Waste Facilities and Landfills database as a disaster debris management site. The subject property was approved as a Disaster Debris Management Site in 2024 for the storage processing of construction and demolition debris, yard trash, and mixed debris after natural disasters, including hurricanes. Soil sampling conducted for permit close out in March 2025 yielded a lead concentration of 7.4 milligrams/kilogram. Further testing of the sample using the Synthetic Precipitation Leaching Procedure indicated that lead had the potential to leach out of the soil and into the groundwater. A groundwater monitoring well was installed in the location of the soil sample and was sampled for lead. Laboratory analytical results indicated no lead impacts to groundwater. Based on the lack of groundwater impacts, the site was approved for closure in July 2025.

EnSafe requested regulatory records/files for the subject property from agencies listed in Table 8. Table 8 lists the agency from which information was requested, date of request, date of response, and information provided or not available, as indicated by the agency response.

Table 8
Summary of Records Requests

Agency	Records Requested	Request Date	Response Date	Response/Section Discussed
City of Clearwater	Building department records for the subject property	10/28/2025	—	No response received to date; however, some information is available in online databases.
Mid-County Health Department, Florida Department of Health	Septic system records for the subject property	10/30/2025	10/30/2025	Health Department personnel stated that there are no septic records for the subject property; however, their record databases only dates back to 1991, therefore, any records prior to 1991 are unavailable.

3.4.1 City of Clearwater

Records available from the City of Clearwater indicate that the subject property was previously connected to the municipal sewer supply as the supply line was capped during City-ordered demolition activities in 2006. A duplex in the east portion of the subject property was demolished in 2004, reportedly addressed as 308A and 308B South Washington Avenue.

3.5 Physical Setting Resources

Based on review of the 2023 United States Geological Survey 7.5-minute topographic map, the subject property elevation ranges from approximately 30 feet above mean sea level in the northwest to 40 feet above mean sea level in the southeast. Overall topography at the subject property and surrounding area generally slopes downward to the west toward St. Joseph Sound/the Gulf of Mexico.

Review of the Geotechnical Report (ECS 2020) indicates that the geology underlying the subject property consists of three sedimentary layers: the surficial layer consists of sand with varying amounts of silt and clay, which is underlain by the Hawthorn Group (consisting of clay, clayey sand, phosphate, and limestone), which is then underlain by limestone. Based on groundwater sampling at the subject property conducted during site investigation activities, depth to groundwater at the subject property ranges from 3 feet to 8 feet below ground surface at the subject property.

3.6 Activity and Use Limitations

EnSafe reviewed federal, state, and tribal standard environmental record resources obtained directly from a commercial service. The subject property is not listed with activity and use limitations.

The User did not provide EnSafe with land title records and did not identify AULs or environmental liens for the subject property.

4.0 AREA RECONNAISSANCE

The current and historical uses of adjoining and surrounding area properties described in this section are based upon visual observations during the site reconnaissance and information obtained from interviews and historical and environmental records review. Historical records obtained for the subject property, listed in Section 1.2/Table 1, that also cover adjoining properties include aerial photographs, topographic maps, city directories, and fire insurance maps.

4.1 Adjoining Properties — Historical Development and Uses

During EnSafe's site reconnaissance, discussed in Sections 3.2 and 3.3, adjoining properties were visually assessed from the subject property boundaries and from nearby roads and driveways.

The subject property is adjoined to the north by a car repair facility (AAMCO Transmissions); to the east by South Washington Avenue followed by vacant commercial land and residences; to the south by Gould Street followed by residences and a car repair facility (Mufflers and Brakes Plus); and to the west by South Martin Luther King Jr Avenue followed by (from north to south) a vacant light manufacturing warehouse, a vacant industrial warehouse, residential apartments, and a pest control company (Mosquito Magician). Historical resources indicate that adjoining properties were primarily residential through at least the 1940s. Commercial/industrial development began to the north and west of the subject property in the 1950s and 1960s.

Table 9 provides a summary of development and current and historical uses of notable adjoining properties, including date ranges, features, activities, and conditions; uses/activities with the potential for releases to have occurred may be discussed here, with supporting regulatory research discussed in Section 4.2.

Table 9
Current and Historical Development and Uses of Adjoining Properties

Date Range	Development	Uses, Activities, Features, and Conditions
NORTH/15-29-15-65214-002-0260/201 SOUTH MARTIN LUTHER KING JR AVENUE		
1923-1957	Undeveloped	The property is shown as undeveloped land in a partially developed residential city block.
1962-1965	Commercial warehouse structure and fencing	A commercial warehouse structure is in the west portion of the property. City directories list the occupant as Thayer MTR Warehouse, which is likely the former Thayer Motor Company (an automobile dealer).
1969-2025	Same commercial structure	Property operated as an automotive/transmission repair facility. City directories list the occupants as AAMCO Transmissions (1970-2024) and Suncoast Industries in 1979 and 2024. Internet research indicates these companies are related and provided automotive repair services.

Table 9 Current and Historical Development and Uses of Adjoining Properties		
Date Range	**Development**	**Uses, Activities, Features, and Conditions**
WEST/15-29-15-16830-002-0140/380 SOUTH MARTIN LUTHER KING JR AVENUE (also addressed as 400 South Martin Luther King Jr Avenue)		
1921-1942	Undeveloped and residential	The property is shown as multiple residential lots, some developed with residences and others undeveloped with Gould Street trending east to west through the south portion.
1949-1962	Undeveloped and residential	The property is shown as multiple residential lots, some developed with residences and others undeveloped; however, Gould Street is no longer shown transecting the property.
1965-1980	Residential and commercial	Residences are shown in the northeast and southwest portions of the property. An electrical supply storage structure is in the west portion and an electrical office/warehouse structure is shown in the southeast portion. City directories list the occupants as Hart Electric Inc (1965-1975) and Aneco Electric Construction (1979-2024); an electric estimating company.
1986-2017	Commercial	An additional commercial warehouse structure is present on the property.
2019-2025	Residential	The present-day residential apartment structure is present on the property.
NORTHWEST/15-29-15-16830-002-0060/951 PIERCE STREET		
1921-1965	Undeveloped and residential	The property is shown as multiple residential lots, some developed with residences and others undeveloped.
1969-2025	Commercial warehouse structure	The present-day warehouse structure is present on the property. City directories list the occupants as Hughes Supply Inc Plumbing/Hughes Supply Electrical Equipment from 1970 through 2003, a wholesale distributor of plumbing and heating/ventilation/air conditioner supplies.

4.2 Adjoining Properties — Regulatory Agency File and Environmental Records Review

EnSafe used a commercial service company to obtain an environmental database search report that made environmental records reasonably ascertainable for adjoining and surrounding area properties. Standard environmental records source listings and regulatory agency files and records reviewed for adjoining properties are discussed in this section. Surrounding area sites identified on standard environmental records resources within ASTM-defined AMSDs are discussed in Section 4.3.

North — 201 South Greenwood Avenue/201 South Martin Luther King Jr Avenue

AAMCO Transmission (Facility ID 8630822) is listed in the Contaminated Sites, Environmental Restoration Integrated Cleanup, Leaking Storage Tank, Potentially Responsible Parties List, Storage Tank/Contaminated Facility Search (STCS), Underground Storage Tank (UST), Waste Cleanup Responsible Party Sites, and Well Surveillance databases.

One 1,000-gallon UST of waste oil was removed in the north portion of the site in December 1997. Petroleum-contaminated soils were observed within the excavation pit but were left in place and covered with clean fill. Laboratory analytical results indicated petroleum hydrocarbon, metals,

solvents, and polychlorinated biphenyls had impacted soil and groundwater at the site. Approximately 67 tons of impacted soils were later removed from the site and "biological fluids" were added to treat the soil and groundwater contamination. The southeast portion of the site was excavated in 2008 in conjunction with excavation activities on the subject property. Confirmatory sampling in the southeast portion of the site indicated no contaminants of concern remain above residential direct exposure Cleanup Target Levels. The site continues to undergo monitored natural attenuation. Groundwater flow at the site is reported to be to the west/northwest (cross-gradient to the subject property). Onsite soil contamination remains in front of the service entrance to the building in the north portion of the site. Based on the 2024 Annual Long-Term Natural Attenuation Monitoring Report (Value Environmental Services 2024), benzene and chlorobenzene remain in groundwater at the site at concentrations above their respective GCTLs; however, there have been no reported offsite impacts to groundwater.

South — 405 South Martin Luther King Jr Avenue

Mufflers and Brakes Plus Inc is listed in the Resource Conservation and Recovery Act Generators database as a very small quantity generator. The facility was listed as a small quantity generator in 1991 and a very small quantity generator in 2014 for ignitable waste and lead. No releases are reported with this facility.

Southwest — 404-410 South Greenwood Avenue/South Martin Luther King Jr Avenue

Street addresses of 404-406 and 408-410 South Greenwood Avenue are listed in the Federal Brownfields database.

Anderson Auto Parts Co Inc at 404 South Greenwood Avenue is listed in the RCRA Generators database as a small quantity generator in 1990 and a non-generator in 2010 for corrosive waste. No releases are reported in connection with this facility.

Sprinkler Magician LLC at 404 South Martin Luther King Jr Avenue is listed in the Section Seven Tracking System database as a registered pesticide and/or device-producing establishment. Sprinkler Magician LLC is also listed in the Integrated Compliance Information System database with Administrative – Formal enforcement actions in 2024 and 2025 from the U.S. EPA for unregistered pesticides ("Mosquito Magician"). Final Orders have been issued in reference to the violations: Sprinkler Magician was ordered to stop the use and/or sale of and remove the product as well as pay a fine. No releases are reported in connection with this facility.

West — 380 South Martin Luther King Jr Avenue / 400 South Martin Luther King Jr Avenue

Aneco Co is listed in the Contaminated Sites, Well Surveillance, Leaking Storage Tank, UST, and STCS databases. One 1,000-gallon leaded gasoline UST was closed in place in August 1991. Petroleum–contaminated soil and groundwater were reported during tank closure activities. Additional soil sampling in 2016 and 2017 indicated no contaminants of concern above their respective SCTLs on site. The site underwent monitored natural attenuation for groundwater until 2024. No Further Action has been provisionally approved pending well abandonment.

Northwest — 951 Pierce Street

Clearwater Electric-Plumbing is listed in the Aboveground Storage Tank, UST, and STCS databases. This facility currently maintains one 525-gallon aboveground storage tank of vehicular diesel. One 2,000-gallon unleaded gasoline UST was installed in July 1967 and removed in April 1990. No closure documentation is available for the UST; however, the facility is downgradient from the subject property and groundwater sampling conducted on the subject property in July 2006 indicated no contaminants of concern above their respective GCTLs. Therefore, this facility does not appear to have impacted the subject property and the lack of closure documentation for the UST does not constitute a significant data gap.

4.3 Surrounding Area Properties

The subject property is in a mixed use residential, commercial, and light industrial area of Clearwater, Florida. The surrounding area generally consisted of agricultural and residential land with scattered commercial properties through the 1930s. Additional residential, commercial, and light industrial development started in the 1940s and continued through the 1980s.

The environmental database search identified 118 sites beyond the subject property and adjoining properties. Of those sites, 76 are within the ASTM-defined AMSDs for their respective listings. Based on information obtained from standard government environmental record sources, regulatory agency files, and/or records review, none of the sites were identified as having releases that have migrated, have likely migrated, or have the potential to migrate to the subject property.

5.0 RESULTS OF THE PHASE I ENVIRONMENTAL SITE ASSESSMENT

EnSafe performed a Phase I ESA of the Washington Avenue Parcels property at 205 South Martin Luther King Jr Avenue in Clearwater, Pinellas County, Florida, in conformance with the scope and limitations of ASTM E1527-21. Any exceptions to, or deletions from, this practice mentioned throughout the report are described in Section 5.3.

5.1 Findings and Environmental Professional Opinion

This Phase I ESA identified the following:

- The 3.41-acre subject property comprises a vacant grass lot owned by the Community Redevelopment Agency of the City of Clearwater, Florida. No structures are currently on the subject property. Overhead electrical transmission lines run along the east subject property boundary. The subject property is currently unoccupied, except for trucks and trailers parked in the southwest corner.

- The subject property was first developed prior to 1921 as an orchard. A residential structure was first constructed on the subject property in 1923. By 1929, several residences were on the subject property, along with a dry cleaning facility. A metal foundry (Gulf Machinery Company) operated on the subject property from approximately 1949 through 1967. Clearwater Automotive Salvage/Repairs operated an automotive salvage yard on the subject property from 1970 through 2005. In 2006, the subject property was razed, remaining a vacant grassy lot since. The subject property has occasionally been utilized as a laydown yard for City projects and as a Disaster Debris Management Site after natural disasters.

- Site assessment investigations from 2004 through 2006 identified petroleum-related constituents in soil in isolated areas in the shop and storage areas of the salvage yard in the north portion of the subject property. No groundwater impacts on the subject property were identified. Several iterations of soil excavation occurred in 2007 and 2008. Confirmation sampling conducted on the subject property after excavation activities were completed did not identify concentrations of contaminants of concern above their respective SCTLs. The subject property was issued a SRCO in July 2009.

- The subject property has been used to temporarily store and process debris (construction and demolition debris, yard trash, and mixed debris) after natural disasters, including hurricanes, since 2024. Soil sampling conducted for permit close out in March 2025 yielded a lead concentration of 7.4 milligrams/kilograms, a concentration with the potential to leach into

groundwater. Laboratory analytical results indicated no lead impacts to groundwater. Based on the lack of groundwater impacts, the site was approved for closure in July 2025.

- The subject property is in a mixed-use residential, commercial, and light industrial area of Clearwater, Florida. No adjoining or surrounding area properties were identified with releases that have or have likely migrated to the subject property.

5.2 Conclusions

5.2.1 Recognized Environmental Conditions, Controlled Recognized Environmental Conditions, and Significant Data Gaps

This assessment has revealed no RECs or CRECs in connection with the subject property.

EnSafe identified the following *significant data gap* in connection with the subject property:

- Limited information was available regarding the historical use of PFAS-containing chemicals associated with the past metal foundry operations on the subject property, which constitutes a *significant data gap* in evaluating potential environmental impacts associated with this historical use and precludes EnSafe's ability to identify *recognized environmental conditions*.

5.2.2 Historical Recognized Environmental Conditions and *de minimis conditions*

This assessment has revealed no *de minimis conditions* in connection with the subject property.

EnSafe identified the following HREC:

- Soil contamination from former foundry and drycleaning activities on the subject property that subsequently received a SRCO.

5.3 Data Gaps, Limiting Conditions, and Deviations

EnSafe's Phase I ESA conforms to ASTM E1527-21. EnSafe did not sample soil, soil vapor, groundwater, or surface water as part of the Phase I ESA. Assessment of these items is based upon visual observations and sources as referenced throughout the report. This report should not be construed as verifying the present property owner or operator's compliance with federal, state, and local regulations or as a recommendation to purchase, sell, or develop the subject property. The following data gaps apply to this Phase I ESA:

- Absence of septic records prior to 1991.

- The failure to obtain historical documentation dating back to the property's first developed use is considered a data failure.

5.4 Significant Assumptions

This report is a prudent, reasonable evaluation of the subject property's observed environmental condition. EnSafe assumes no responsibility for conditions or information not practically reviewable, or information not accurately disseminated by any party. EnSafe can neither warrant nor guarantee that environmental database information is accurate and complete. The following significant assumptions were used to formulate the conclusions and opinions contained in this report:

- Conditions at the time of the site visit were representative of ordinary conditions at the subject property.

- Persons interviewed answered questions in good faith and to the extent of their knowledge.

- The subject property boundaries depicted on figures and described herein are accurate.

5.5 User Reliance and Continued Viability of Environmental Site Assessment

The assessment was prepared under contract for the exclusive use of the City of Clearwater. Any other party's reliance on this report is at risk unless EnSafe grants authorization. In accordance with ASTM E1527-21, this Phase I ESA is presumed to be viable for 180 days prior to the date of acquisition or intended transaction (e.g., lease or refinance). An ASTM-compliant Phase I ESA may be used for 1 year from the date of acquisition or intended transaction, provided all the components listed in Table 10 are conducted or updated within 180 days prior to the date of acquisition or intended transaction.

Table 10
Report Viability Dates

Component	Date(s) or Date Range Completed	Indicate the Reason if Not Completed
Interviews with owners, operators, occupants	October 30, 2025	—
Reviews of federal, tribal, state, and local government records	October 10, 2025	—
Visual inspection of the subject and adjoining properties	October 14, 2025	—
Declaration by the Environmental Professional responsible for the assessment or update	November 12, 2025	—

RE: CITY DIRECTORY RESEARCH
Washington Avenue
Clearwater,FL 33756

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:
All of Gould St
800-1135 of Pierce St
110-420 of S Martin Luther King Jr Ave
beg-350 of S Washington Ave

Search Notes:
S Martin Luther King Jr Ave is also known as S Greenwood Ave in Clearwater. S Martin Luther King Jr Ave is also known as 110-420 S Greenwood Ave in Clearwater.

Summary....18
Detail Report....58
Radon Information....1438
Appendix....1439
Liability Notice....1442

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

ERIS

Geologic Information

The previous page shows USGS geology information. Detailed information about each unit is provided below.

Geologic Unit Th

Unit Name:	Hawthorn Group, Undifferentiated
Unit Age:	Miocene
Primary Rock Type:	Sand
Secondary Rock Type:	Clay
Unit Description:	The undifferentiated Hawthorn Group occurs at or near the surface near the southern flank of the Ocala Platform from Gilchrist County southward to Pasco County with isolated occurrences in Pinellas County. Correlation of these sediments to the formations of the Hawthorn Group exposed to the east and in the subsurface is uncertain. There is little to no phosphate present in these sediments and fossils are rare. Ages have not been documented but stratigraphic position suggests inclusion in the Hawthorn Group. These sediments may be residual from the weathering and erosion of the Hawthorn Group. The Hawthorn Group sediments on the Brooksville Ridge are deeply weathered and in some outcrops look like Cypresshead Formation siliciclastics. The undifferentiated Hawthorn Group sediments are light olive gray and blue gray in unweathered sections to reddish brown in deeply weathered sections, poorly to moderately consolidated, clayey sands to silty clays and relatively pure clays. These sediments are part of the intermediate confining unit/aquifer system and provide an effective aquitard for the FAS, except where perforated by karst features. Hard-rock phosphate deposits are associated with the undifferentiated Hawthorn Group sediments on the eastern flank of the Brooksville Ridge. The hard rock phosphate deposits were formed by the dissolution of phosphate in the Hawthorn sediments and redeposition in karst features.

Geologic Unit Qu

Unit Name:	Undifferentiated sediments
Unit Age:	Pleistocene/Holocene
Primary Rock Type:	Sand
Secondary Rock Type:	Clay
Unit Description:	Undifferentiated Quaternary Sediments - Much of Florida's surface is covered by a varying thickness of undifferentiated sediments consisting of siliciclastics, organics and freshwater carbonates. Where these sediments exceed 20 feet (6.1 meters) thick, they were mapped as discrete units. In an effort to subdivide the undifferentiated sediments, those sediments occurring in flood plains were mapped as alluvial and flood plain deposits (Qal). Sediments showing surficial expression of beach ridges and dunes were mapped separately (Qbd) as were the sediments composing Trail Ridge (Qtr). Terrace sands were not mapped (refer to Healy [1975] for a discussion of the terraces in Florida). The subdivisions of the Undifferentiated Quaternary Sediments (Qu) are not lithostratigraphic units but are utilized in order to facilitate a better understanding of the State's geology. The siliciclastics are light gray, tan, brown to black, unconsolidated to poorly consolidated, clean to clayey, silty, unfossiliferous, variably organic-bearing sands to blue green to olive green, poorly to moderately consolidated, sandy, silty clays. Gravel is occasionally present in the panhandle. Organics occur as plant debris, roots, disseminated organic matrix and beds of peat. Freshwater carbonates, often referred to as marls in the literature, are scattered over much of the State. In southern Florida, freshwater carbonates are nearly ubiquitous in the Everglades. These sediments are buff colored to tan, unconsolidated to poorly consolidated, fossiliferous carbonate muds. Sand, silt and clay may be present in limited

quantities. These carbonates often contain organics. The dominant fossils in the freshwater carbonates are mollusks.

This maps shows SSURGO soil units around the target property. Please refer to the report for detailed soil descriptions.

ERIS

Soil Information

The previous page shows a soil map using SSURGO data from USDA Natural Resources Conservation Service. Detailed information about each unit is provided below.

Map Unit 16 (0.73%)

Map Unit Name:	Matlacha and St. Augustine soils and Urban land
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	69cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	B - Soils in this group have moderately low runoff potential when thoroughly wet. Water transmission through the soil is unimpeded.
Major components are printed below	
Matlacha(33%)	
horizon C(0cm to 107cm)	Sand
horizon A/Eb(107cm to 203cm)	Fine sand
St. Augustine(32%)	
horizon A(0cm to 20cm)	Sand
horizon C1(20cm to 84cm)	Loamy fine sand
horizon C2(84cm to 122cm)	Fine sand
horizon C3(122cm to 159cm)	Sandy loam
horizon C4(159cm to 203cm)	Sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 16 - Matlacha and St. Augustine soils and Urban land

Component: Matlacha (33%)
The Matlacha component makes up 33 percent of the map unit. Slopes are 0 to 2 percent. This component is on fills on ridges on marine terraces on coastal plains. The parent material consists of sandy mine spoil or earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 30 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 0 percent. Nonirrigated land capability classification is 6s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: St. Augustine (32%)
The St. Augustine component makes up 32 percent of the map unit. Slopes are 0 to 2 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of sandy mine spoil or earthy fill. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 27 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 7s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Urban land (31%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Wulfert (2%)
Generated brief soil descriptions are created for major soil components. The Wulfert soil is a minor component.

Component: Kesson (2%)
Generated brief soil descriptions are created for major soil components. The Kesson soil is a minor component.

Soil Information

Map Unit 17 (59.63%)

Map Unit Name:	Myakka soils and Urban land
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	31cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	A/D - These soils have low runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Myakka(50%)

horizon A(0cm to 10cm)	Fine sand
horizon E(10cm to 56cm)	Fine sand
horizon Bh(56cm to 91cm)	Fine sand
horizon C(91cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 17 - Myakka soils and Urban land

Component: Myakka (50%)
The Myakka component makes up 50 percent of the map unit. Slopes are 0 to 2 percent. This component is on flatwoods on marine terraces on coastal plains. The parent material consists of sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 12 inches during June, July, August, September, October, November. Organic matter content in the surface horizon is about 4 percent. Nonirrigated land capability classification is 4w. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Urban land (45%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Adamsville (3%)
Generated brief soil descriptions are created for major soil components. The Adamsville soil is a minor component.

Component: Pomello (2%)
Generated brief soil descriptions are created for major soil components. The Pomello soil is a minor component.

Map Unit 26 (0.73%)

Map Unit Name:	Pomello soils and Urban land, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	91cm
Drainage Class - Dominant:	Somewhat poorly drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Pomello(46%)

horizon A(0cm to 8cm)	Fine sand
horizon E(8cm to 112cm)	Fine sand
horizon Bh(112cm to 150cm)	Fine sand
horizon C(150cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Soil Information

Map Unit: 26 - Pomello soils and Urban land, 0 to 5 percent slopes

Component: Pomello (46%)
The Pomello component makes up 46 percent of the map unit. Slopes are 0 to 2 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is somewhat poorly drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 36 inches during June, July, August, September, October, November. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 6s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Urban land (44%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Immokalee (4%)
Generated brief soil descriptions are created for major soil components. The Immokalee soil is a minor component.

Component: Placid (3%)
Generated brief soil descriptions are created for major soil components. The Placid soil is a minor component.

Component: Myakka (3%)
Generated brief soil descriptions are created for major soil components. The Myakka soil is a minor component.

Map Unit 29 (25.03%)

Map Unit Name:	Tavares fine sand-Urban land complex, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	76cm
Drainage Class - Dominant:	Moderately well drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Tavares(43%)	
horizon A(0cm to 15cm)	Fine sand
horizon C(15cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 29 - Tavares fine sand-Urban land complex, 0 to 5 percent slopes

Component: Tavares (43%)
The Tavares component makes up 43 percent of the map unit. Slopes are 0 to 5 percent. This component is on hills on marine terraces on coastal plains. The parent material consists of eolian or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is moderately well drained. Water movement in the most restrictive layer is high. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 30 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 2 percent. Nonirrigated land capability classification is 3s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Urban land (37%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Pomello (6%)
Generated brief soil descriptions are created for major soil components. The Pomello soil is a minor component.

Component: Cassia (5%)
Generated brief soil descriptions are created for major soil components. The Cassia soil is a minor component.

Component: Apopka (4%)
Generated brief soil descriptions are created for major soil components. The Apopka soil is a minor component.

Component: Astatula (3%)
Generated brief soil descriptions are created for major soil components. The Astatula soil is a minor component.

Component: Adamsville (2%)
Generated brief soil descriptions are created for major soil components. The Adamsville soil is a minor component.

Map Unit 30 (7.97%)

Map Unit Name: Urban land, 0 to 2 percent slopes

Bedrock Depth - Min:

Watertable Depth - Annual Min:

Drainage Class - Dominant:

Hydrologic Group - Dominant:

Major components are printed below

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 30 - Urban land, 0 to 2 percent slopes

Component: Urban land (85%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Matlacha (3%)
Generated brief soil descriptions are created for major soil components. The Matlacha soil is a minor component.

Component: St. Augustine (3%)

Soil Information

Map Unit 31 (0.13%)

Map Unit Name:	Wabasso soils and Urban land
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	31cm
Drainage Class - Dominant:	Poorly drained
Hydrologic Group - Dominant:	C/D - These soils have moderately high runoff potential when drained and high runoff potential when undrained.

Major components are printed below

Wabasso(50%)

horizon A(0cm to 12cm)	Fine sand
horizon E(12cm to 66cm)	Fine sand
horizon Bh(66cm to 91cm)	Fine sand
horizon Bt(91cm to 126cm)	Sandy clay loam
horizon C(126cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 31 - Wabasso soils and Urban land

Component: Wabasso (50%)
The Wabasso component makes up 50 percent of the map unit. Slopes are 0 to 2 percent. This component is on flatwoods on marine terraces on coastal plains. The parent material consists of sandy and loamy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is poorly drained. Water movement in the most restrictive layer is moderately low. Available water to a depth of 60 inches (or restricted depth) is low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. A seasonal zone of water saturation is at 12 inches during June, July, August, September, October. Organic matter content in the surface horizon is about 3 percent. Nonirrigated land capability classification is 3w. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Urban land (45%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Adamsville (3%)
Generated brief soil descriptions are created for major soil components. The Adamsville soil is a minor component.

Component: Pomello (2%)
Generated brief soil descriptions are created for major soil components. The Pomello soil is a minor component.

Map Unit 4 (5.77%)

Map Unit Name:	Astatula soils and Urban land, 0 to 5 percent slopes
Bedrock Depth - Min:	
Watertable Depth - Annual Min:	
Drainage Class - Dominant:	Excessively drained
Hydrologic Group - Dominant:	A - Soils in this group have low runoff potential when thoroughly wet. Water is transmitted freely through the soil.

Major components are printed below

Astatula(50%)

horizon A(0cm to 8cm)	Fine sand
horizon C(8cm to 203cm)	Fine sand

Component Description:

Minor map unit components are excluded from this report.

Map Unit: 4 - Astatula soils and Urban land, 0 to 5 percent slopes

Soil Information

Component: Astatula (50%)
The Astatula component makes up 50 percent of the map unit. Slopes are 0 to 5 percent. This component is on ridges on marine terraces on coastal plains. The parent material consists of eolian or sandy marine deposits. Depth to a root restrictive layer is greater than 60 inches. The natural drainage class is excessively drained. Water movement in the most restrictive layer is very high. Available water to a depth of 60 inches (or restricted depth) is very low. Shrink-swell potential is low. This soil is not flooded. It is not ponded. There is no zone of water saturation within a depth of 72 inches. Organic matter content in the surface horizon is about 1 percent. Nonirrigated land capability classification is 6s. This soil does not meet hydric criteria. There are no saline horizons within 30 inches of the soil surface. The soil has a maximum sodium adsorption ratio of 1 within 30 inches of the soil surface.

Component: Urban land (45%)
Generated brief soil descriptions are created for major soil components. The Urban land is a miscellaneous area.

Component: Adamsville (3%)
Generated brief soil descriptions are created for major soil components. The Adamsville soil is a minor component.

Component: Tavares (2%)
Generated brief soil descriptions are created for major soil components. The Tavares soil is a minor component.
