A Full Service Environmental Consulting and Contracting Firm

EXECUTIVE SUMMARY

EnviroTrac Ltd. (EnviroTrac) was retained by Mr. Joe DeCicco, Senior Environmental Specialist with the City of Clearwater (User), to perform a *Phase I Environmental Site Assessment* (ESA) in conformance with American Society for Testing and Materials (ASTM) Standard Practice E 1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the 1105 Carlton Street Property located at 1105 Carlton Street, Clearwater, Pinellas County, Florida (herein referred to as the subject property).

The subject property consists of a single parcel totaling approximately 0.09 acres located at 1105 Carlton Street, in Clearwater, Pinellas County, Florida. The parcel is identified by Pinellas County Parcel ID: 10-29-15-33534-003-0150. The subject property is developed with an 1,890-square-foot (sf) two-story, mixed use commercial-residential building, and an 840-sf single-story residence. According to the Pinellas County Property Appraiser website, both buildings were constructed in 1940; however, the western-located 2-story building was constructed sometime between 1957 and 1965. Both buildings are currently residential in use. Additional improvements include municipal utilities.

Based on a review of historical topographic maps and aerials, the subject property was vacant in 1923 and the western portion was developed with a 2-story building occupied by two “stores” by 1929. This building was demolished sometime prior to 1942. The existing eastern-located residence was constructed in 1940 and has been residential in use through the present time. The existing western-located building was constructed sometime between 1957 and 1965 and 1st floor occupants have included Greenwood Sundries Confy, Dew Drop Inn Restaurant, Greenwood Arcade & Restaurant, A&A Café, and private residences on the second floor.

The surrounding area was developed in the early-1920s with scattered residences. By 1929, the east and northeast properties were residentially developed and commercial development was prevalent to the north, south, and southwest. A gasoline station adjoined the subject property to the southwest in the 1950s-1960s. This former gas station does not represent a REC based on information obtained during the regulatory records review. The remaining commercial properties were occupied by restaurants, pool halls, barber shops, various retailers, and offices. Two dry cleaning businesses operated at the former commercial building located approximately 100 feet south of the subject property in the 1940s-1950s (Greenwood Park Cleaners at 1104 Tangerine St.) and the 1960s-1970s (Flair Dry Cleaning at 1102 Tangerine St.). Regulatory information was not identified for the cleaners. The dry cleaners do not represent RECs as summarized throughout the report.

Ms. Kristi Miller, EnviroTrac Site Assessor, performed a site reconnaissance on November 8, 2023. The subject property was developed with a vacant residence in the eastern portion and a multi-use building in the western portion; currently, only the second floor was occupied by

residents and the first floor was vacant. It appears that commercial renovations had begun on the first floor but were not completed. RECs were not identified during the reconnaissance.

EnviroTrac reviewed a regulatory database report provided by Environmental Data Resources, Inc. (EDR). The subject property was not listed on the regulatory databases searched by EDR; however, the subject property and surrounding area are located within the Ulmerton Road Opportunity Corridor and City of Clearwater designated Brownfield Areas.

The following offsite facility was identified on the EDR report:

Blue Chip Bar Site (1317 N. MLK Jr. Ave.) - This US Brownfields facility is located approximately 100 feet south of the subject property. The former Blue Chip Bar building was demolished in 2009-2010; this was the location of two historic dry cleaning businesses (Flair Dry Cleaning and Greenwood Park Cleaners). According to the EDR report, “Phase I and Phase II ESAs completed in 2008 revealed no RECs associated with the property. No further assessment is recommended. Former Use: Historical land use included commercial and residential land use. Site was considered an "eye sore" and had developed a stigma related to excessive crime activity at the site.” The assessments were completed through a US EPA Brownfields Assessment Cooperative Agreement. EnviroTrac requested copies of the 2008 Phase I and Phase II ESAs from the City of Clearwater and USEPA District 4 through a Freedom of Information Act (FOIA) request. At the issuance of this report, the reports have not been provided. The EPA indicated that the request was received and a response is expected within 20 days. The City of Clearwater purchased this property in 2008 after receipt of the aforementioned due diligence reports. Although EnviroTrac has not been provided copies of the Phase I and Phase II reports, it can be presumed that contamination was not identified; therefore, it is unlikely that the current subject property would be affected by the historic dry cleaners. The absence of this information represents a significant data gap. Once the reports are received from the USEPA, EnviroTrac will update any pertinent information as it pertains to the current subject property.

Based on the regulatory records review, the remaining off-site regulatory facilities do not represent RECs based on down-gradient positioning, substantial distance, and/or the absence of releases, as discussed in Section 6.

EnviroTrac did not identify RECs in connection with the subject property during this assessment.

1.0 INTRODUCTION

1.1 Purpose

EnviroTrac Ltd. (EnviroTrac) was retained by Mr. Joe DeCicco, Senior Environmental Specialist with the City of Clearwater (User), to perform a *Phase I Environmental Site Assessment* (ESA) in conformance with American Society for Testing and Materials (ASTM) Standard Practice E 1527-21 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the 1105 Carlton Street Property located at 1105 Carlton Street, Clearwater, Pinellas County, Florida (herein referred to as the subject property). The subject property location is depicted on **Figures 1**-**2**. Photographs taken during the reconnaissance are included in **Appendix A**.

Site Address:	1105 Carlton St., Clearwater, Pinellas County, Florida
Site Name (if applicable):	1105 Carlton Property
Property Type:	Residential and vacant commercial
Site Inspection Date:	November 8, 2023
Report Author:	Ms. Kristi Miller
Report Date:	November 21, 2023
Project No:	02.991455.P1

The purpose of this Phase I ESA was to identify recognized environmental conditions (RECs) at the subject property. According to the ASTM Standard Practice E 1527-21, the term recognized environmental condition (REC) means (1) the presence of hazardous substance or petroleum products in, on, or at the subject property due to any release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.

Controlled recognized environmental conditions (CRECs) are recognized environmental conditions affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example activity and use limitation or other property use limitations).

Per ASTM E 1527-21 de Minimis conditions are conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies. Conditions determined to be de Minimis are not recognized environmental conditions nor controlled recognized environmental conditions.

Per ASTM E 1527-21, a historical recognized environmental condition (HREC) is a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example activity and use limitations or other property use limitations).

ASTM Standard Practice E 1527-21 is intended to permit a user to satisfy one of the requirements to qualify for innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) liability (also referred to as “landowner liability protections” or LLP’s), that is, ASTM Standard Practice E 1527-21 constitutes “all appropriate inquiry” into the previous ownership and uses of the property consistent with good commercial or customary standards and practice as defined by 42 U.S. C. § 9601(35)(b). Per ASTM Standard Practice E 1527-21, Section 6, User Responsibilities, the user of this assessment has specific obligations for performing tasks that will help the Environmental Professional identify the possibility of recognized environmental conditions in connection with the subject property. Failure by the user to fully comply with the requirements may impact their ability to use this report to help qualify for Landowner Liability Protections (LLPs) under CERCLA. EnviroTrac makes no representations or warranties regarding a User's qualification for protection under any federal, state, or local laws, rules, or regulations.

1.2 Scope

This Phase I ESA was conducted in general accordance with ASTM Standard Practice E 1527-21. Significant additions, deletions or exceptions to ASTM Standard Practice E 1527-21 are noted below or in the corresponding sections of this report. The scope of this assessment included an evaluation of the following:

- Physical setting characteristics of the subject property using practically reviewable sources that included topographic maps, geologic maps, hydrologic data and flood maps;

- Usage of the subject property, adjoining properties and surrounding area through a review of referenced historical sources such as land title records, fire insurance maps, city directories, aerial photographs, prior reports and interviews;

- Observations and interviews regarding current subject property usage and conditions including: the use, treatment, storage, disposal or generation of hazardous substances, petroleum products, hazardous wastes, non-hazardous solid wastes and wastewater;

- Usage of adjoining and surrounding area properties and the likely impact of known or suspected releases of hazardous substances or petroleum products from those properties to the subject property;

- Information in referenced environmental agency databases and local environmental records, within the specified approximate minimum search distance from the subject property; and

- Preparation of this report.

As stated in the ASTM Standard Practice E 1527-21, there may be environmental issues or conditions at a subject property that the user may wish to assess in connection with commercial real estate that are outside the scope of the ASTM practice. These "non-scope considerations" or business environmental risks (BERs) may be present on a property in quantities or under conditions that may lead to contamination of the property or of nearby properties but are not included in the CERCLA definition of hazardous substances. EnviroTrac investigated the following non-scope considerations/BER:

- Suspect asbestos containing material (ACM);
- Naturally-occurring radon infiltration;
- PCB-containing building materials;
- Regulatory compliance.

Investigation of the above-mentioned non-scope considerations/BERs consisted of a limited visual inspection during site reconnaissance, professional experience, and review of readily attainable published data sources. It should be noted that unless indicated in this report, no intrusive samples for potential biological agents, indoor air quality, LBP, radon, or mold were collected, and no formal determination of wetlands (using biological surveys or similar techniques) were conducted. Unless indicated in this report, results of the investigation of the non-scope considerations/BERs are not to be construed as compliant with *any* regulation but serve only to assist in assessing commercial business risks. EnviroTrac completed a limited asbestos survey which is submitted under separate cover.

The following is a summary of historical documents that were reviewed in order to complete this Phase I ESA:

- Topographic maps;
- Aerial photographs;
- Fire insurance maps;
- City directories;
- County deed documents;
- Permits

1.3 Significant Assumption

Any assumptions in this report are considered as having insignificant impact on the determination of *RECs* associated with the subject property unless specified.

1.4 Limitations and Exceptions

As per ASTM E 1527-21, a data gap is defined as a lack of or inability to obtain information required by the ASTM E 1527-21 practice despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness in any of the activities required by ASTM E 1527-21 practice, including, but not limited to, site reconnaissance (for example, an inability to conduct the site visit), and interviews (for example, an inability to interview the key site manager, regulatory officials, etc.). A significant data gap is a data gap that affects the ability of the environmental professional to identify a REC.

As per ASTM E 1527-21, a data failure is the failure to achieve the historical research objective (compiling and analyzing historical property information and developing a history of the previous uses of the subject property, adjoining properties, and surrounding area to identify RECs at the subject property) even after reviewing the standard historical resources (topographic maps, aerial photographs, fire insurance maps, and city directories) that are reasonably ascertainable and likely to be useful. A data failure is a type of data gap.

The following is a summary of significant data gaps, if any, identified in this report.

SIGNIFICANT DATA GAP AND DATA FAILURE SUMMARY		
Report Section		**Description**
3.4	**Methodology and Limiting Conditions**	No ***significant data gap*** identified.
4.0	**Current Area Characteristics**	No ***significant data gap*** identified.
5.0	**Site History**	No ***significant data gap*** identified.
7.0	**Site Regulatory Information and Records Review**	Phase I and II reports for an offsite regulatory facility (former dry cleaning use) were requested from the US EPA. The absence of this information represents a significant data gap.
10.0	**Interviews**	No ***significant data gap*** identified.
11.0	**User Provided Information - Environmental Liens or AULs**	No ***significant data gap*** identified.

The ASTM Standard Practice E 1527-21 recognizes inherent limitations for Phase I ESAs, including, but not limited to:

- *Uncertainty Not Eliminated* - A Phase I ESA cannot completely eliminate uncertainty regarding the potential for *recognized environmental conditions* in connection with any subject property;

- *Not Exhaustive* - A Phase I ESA is not an exhaustive investigation of the subject property and environmental conditions on such subject property; and

- *Past Uses of the Subject Property* - Phase I requirements only require review of standard historical sources at five-year intervals. Therefore, past uses of subject property at less than five-year intervals may not be discovered.

Users of this report may refer to ASTM Standard Practice E 1527-21 for further information regarding these and other limitations. This report is not definitive and should not be assumed to be a complete and/or specific definition of all conditions above or below grade. Current subsurface conditions may differ from the conditions determined by surface observations, interviews, and reviews of historical sources. The most reliable method of evaluating subsurface conditions is through intrusive techniques, which are beyond the scope of this report. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, or other subject property construction purposes. Any use of this report by any party, beyond the scope and intent of the original parties, shall be at the sole risk and expense of such user.

EnviroTrac makes no representation or warranty that the past or current operations at the subject property are, or have been, in compliance with all applicable federal, state, and local laws, regulations and codes. This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated. Regardless of the findings stated in this report, EnviroTrac is not responsible for consequences or conditions arising from facts not fully disclosed to EnviroTrac during the assessment.

An independent data research company provided the government agency database referenced in this report. Information on surrounding area properties was requested for approximate minimum search distances and is assumed to be correct and complete unless obviously contradicted by EnviroTrac's observations or other credible referenced sources reviewed during the assessment. EnviroTrac shall not be liable for any such database firm's failure to make relevant files or documents properly available, to properly index files, or otherwise to fail to maintain or produce accurate or complete records.

EnviroTrac used reasonable efforts to identify evidence of above ground and underground storage tanks and ancillary equipment on the subject property during the assessment. "Reasonable efforts" were limited to observation of accessible areas, review of referenced

public records, and interviews. These reasonable efforts may not identify subsurface equipment or evidence hidden from view by things including, but not limited to, snow cover, paving, construction activities, stored materials, and landscaping.

Any estimates of costs or quantities in this report are approximations for commercial real estate transaction due diligence purposes and are based on the findings, opinions, and conclusions of this assessment, which are limited by the scope of the assessment, schedule demands, cost constraints, accessibility limitations and other factors associated with performing the Phase I ESA. Subsequent determinations of costs or quantities may vary from the estimates in this report. The estimated costs or quantities in this report are not intended to be used for financial disclosure related to the Financial Accounting Standards Board (FASB) Statement No. 143, FASB Interpretation No. 47, Sarbanes/Oxley Act or any United States Securities and Exchange Commission reporting obligations and may not be used for such purposes in any form without the express written permission of EnviroTrac.

EnviroTrac is not a professional title insurance or land surveyor firm and makes no guarantee, express or implied, that any land title records acquired or reviewed in this report, or any physical descriptions or depictions of the subject property in this report, represent a comprehensive definition or precise delineation of subject property ownership or boundaries.

The Environmental Professional Statement in Section 14.0 of this report does not "certify" the findings contained in this report and is not a legal opinion of such Environmental Professional. The Environmental Professional Statement is intended to document EnviroTrac's opinion that an individual meeting the qualifications of an Environmental Professional was involved in the performance of the assessment and that the activities performed by, or under the supervision of, the Environmental Professional were performed in conformance with the standards and practices set forth in 40 CFR Part 312 per the methodology in ASTM Standard Practice E 1527-21 and the scope of work for this assessment.

In accordance with the ASTM Standard Practice E 1527-21, this report is presumed to be valid for a six-month period. If the report is older than six months, the following information must be updated in order for the report to be valid: (1) regulatory review, (2) site visit, (3) interviews, (4) specialized knowledge, and (5) environmental liens search. Reports older than one year may not meet the ASTM Standard Practice 1527-21 and therefore, the entire report must be updated to reflect current conditions and subject property-specific information.

The Phase I Report will remain viable if it was completed no more than 180 days prior to the date of acquisition, or up to one year, if five specific components of the Report have been updated (the five components include: interviews, searches for recorded environmental cleanup liens, review of government records, site reconnaissance of the subject property and the Environmental Professional [EP] Declaration). In addition, the E1527-21 Standard requires that

the dates in which each of the components were completed be identified in the Phase I Report, and that the 180 day or 1-year time period begins with the date upon which the first of these components was completed: **Viability Date: April 22, 2024**

1.5 Special Terms and Conditions (User Reliance)

This report is for the use and benefit of and may be relied upon by The City of Clearwater (User). Any party using this report agrees that by accepting this report any use or reliance on this report shall be limited by the exceptions and limitations in this report, and with the acknowledgment that actual site conditions may change with time, and that conditions may exist at the subject property that were not discovered within the authorized scope of the assessment. Any use by or distribution of this report to third parties, without the express written consent of EnviroTrac, is at the sole risk and expense of such third party.

EnviroTrac makes no other representation to any third party except that it has used the degree of care and skill ordinarily exercised by environmental consultants in the preparation of the report and in the assembling of data and information related thereto. No other warranties are made to any third party, either expressed or implied.

2.0 PREVIOUS ENVIRONMENTAL SITE ASSESSMENT SUMMARY

The following section discusses previous environmental site assessments that were provided to EnviroTrac for review.

2.1 Previous Environmental Reports

Although requested, previous environmental reports were not provided to EnviroTrac for review.

3.0 CURRENT SITE CHARACTERISTICS

3.1 Site Ownership and Location

Site Owner:	Anna P. Birt
Site Occupant:	Western building 2nd floor is occupied by various resident tenants Western building 1st floor is unoccupied Eastern building is unoccupied
Date of Ownership:	Unknown, deed documentation is not available online. (**Appendix B**)
Site Location and Legal Description:	Southeast corner of N. Martin Luther King Jr. Ave. and Carlton St., 1105 Carlton St., Clearwater City Limits "GREENWOOD PARK BLK C, LOT 15"
Tax Map No.	10-29-15-33534-003-0150
Zoning:	C – Commercial City of Clearwater
County:	Pinellas
USGS Quadrangle:	Clearwater, Florida

3.2 Site Description and Operations

Size of Property (approximate)	0.088 acres
General Topography of Property	Elevation is ~20 feet NVGD and the land slopes to the east-northeast
Adjoining or Access/Egress Roads	Carlton St. to the north and N. MLK Jr. Ave. to the west
Paved or Concrete Areas	NA
Surface Water	NA
Storm Sewer Utility	City of Clearwater
General Building Description	2-story concrete block building, 1st floor commercial, 2nd floor residential 1-story wood frame residence with concrete porch addition
Number of Floors	1 and 2
Construction Completion Date	Residence ~1940 2-story building = between 1957 and 1965
Construction Type	Concrete slab on grade and wood frame
Hazardous Waste Materials Storage	None observed
Petroleum Materials Storage	None observed

3.3 Site Utilities

Potable Water Source	City of Clearwater
Sanitary Sewer Utility	City of Clearwater
Electrical Utility	Duke Energy
Heating and Cooling System Type	Electric – heating oil tanks/gas not utilized. A heating oil tank was historically located on the south side of the western 2-story building. Information regarding the tank was not identified. Evidence of a tank was not observed during the reconnaissance.

3.4 Site Reconnaissance

Methodology	
Site Inspector:	Kristi Miller
Site Reconnaissance Date:	November 8, 2023
Weather:	Sunny and clear
Temperature:	80° F
Site Representative:	Mr. Chuck Lane, Clearwater Economic Development
Limiting Conditions:	Select bedrooms were not accessible on the second floor
Physical Characteristics	
Vegetation	Low lying grass/weeds
Topography	Relatively flat
Visual Observations	
Significant Staining	None observed
Petroleum Products Use, Storage, Disposal	None observed
Hazardous Substance Use, Storage, Disposal	None observed
Floor Drains/Sumps/Lagoons Discharge Pipes/Discharge Areas	None observed
Grease Trap	Although not observed during the reconnaissance, a grease trap is reportedly present south-adjacent to the western building and serviced former onsite restaurants
Catch Basins/Stormwater Drywells	None observed
Dumping of Petroleum or Hazardous Substances	None observed
Dumpster	None observed
Soil/Surface Water/Groundwater	None observed

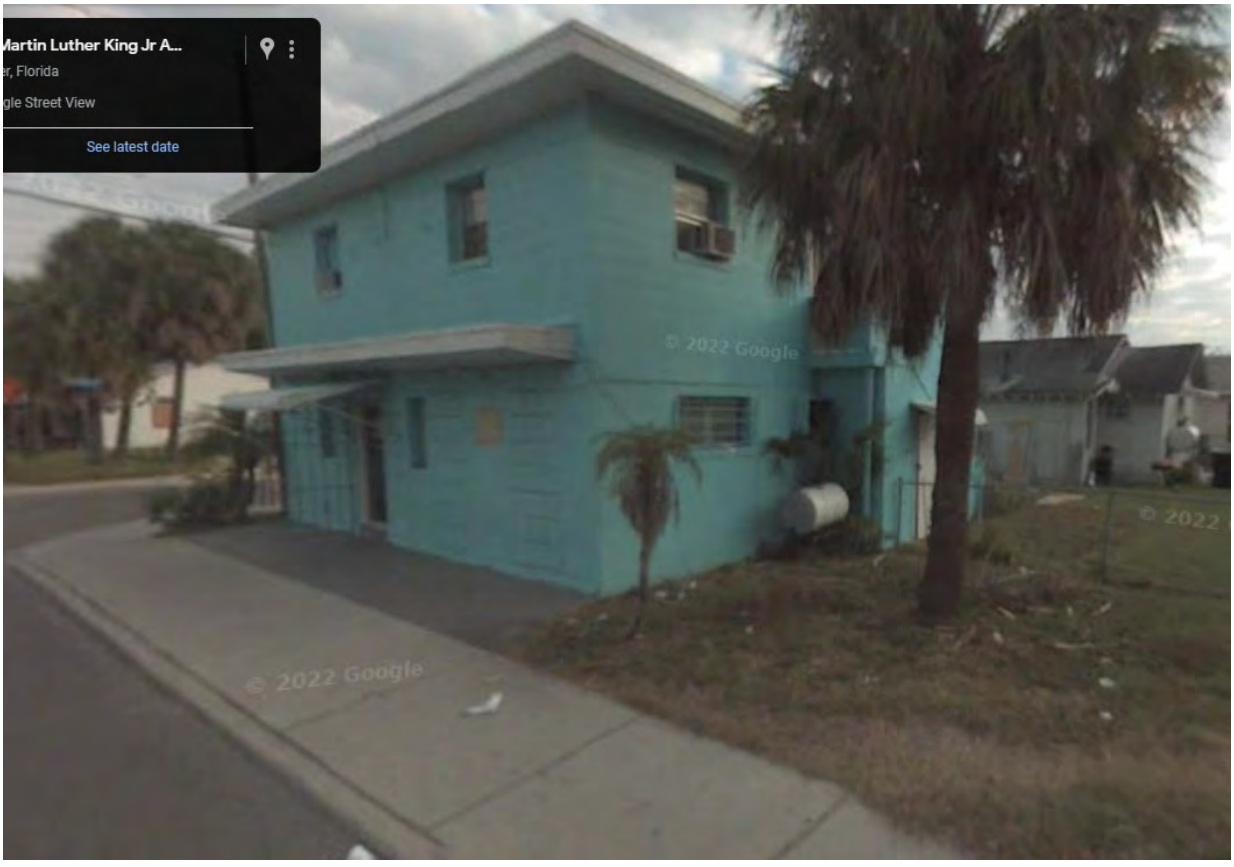

Contamination/Staining	
Stressed Vegetation	None observed
Potable/Monitoring Wells	One monitoring well was observed in the sidewalk north-adjacent to the western portion of the subject property

Subject property and adjoining properties photographs are provided in **Appendix A**.

3.5 Underground and Above-Ground Storage Tanks (USTs and ASTs)

There was no visual evidence of former or current USTs or ASTs at the subject property.

EnviroTrac reviewed Google street view images from 2007 through the present time. An apparent heating oil tank was observed in the 2007 street view photo. The tank was situated approximately 2' above the ground, adjacent to the south side of the western building, and appeared to be approximately 100 gallons in volume. No further information was identified regarding the tank. Evidence of the tank was not observed during the reconnaissance. See 2007 street view photo below.

3.6 Polychlorinated Biphenyls (PCBs)

Polychlorinated biphenyls (PCBs) are toxic chemicals that were historically used in electrical equipment (e.g., transformers, fluorescent lamp ballasts, and capacitors) as well as hydraulic fluids. As per USEPA regulation 40 CFR, Part 761, there are three categories of PCB containing equipment: “Non-PCB” (containing <50 part per million [ppm] PCBs); “PCB Contaminated” (containing between 50 and 500 ppm PCBs); and “PCB-Containing” (containing >500 ppm PCBs). Pursuant to 15 U.S.C. 2605(e)(2)(A), the manufacture, process, or distribution in commerce or use of any PCBs other than in a completely enclosed manner was prohibited after January 1, 1977. Transformers were not observed at the subject property.

3.7 Wetlands

As part of the Phase I ESA, EnviroTrac reviewed available Federal, State and local wetland databases, which did not identify onsite wetlands. Included in the EDR query was the National Wetland Inventory which did not identify wetlands at the subject property or adjoining properties. Standing water or wetland type vegetation was not observed during the site reconnaissance. The nearest body of water is Stevenson Creek located approximately 1,600 feet to the northeast.

3.8 Radon

Radon is a naturally occurring colorless, odorless gas that is a by-product of the decay of radioactive materials potentially present in bedrock and soil. The United States Environmental Protection Agency (USEPA) guidance action level for annual residential exposure to radon is 4.0 Pico curies per liter of air (pCi/L). According to USEPA, the subject property is located within Zone 3, indicating a low potential for elevated indoor radon levels. The subject property is located in an area of Pinellas County where passive radon controls are generally unnecessary, according to Florida DOH Radon Protection Maps. 97% of residential buildings tested in zip code 33755 reported radon levels < 4 pCi/L.

3.9 Asbestos

ACM in buildings is currently regulated under the following programs:

OSHA

For buildings constructed prior to 1981, the Code of Federal Regulations (29 CFR 1926.1101 and 29 CFR 1910.1001) define presumed asbestos-containing material (PACM) as 1. Thermal System Insulation (TSI), e.g., boiler insulation, pipe lagging, fireproofing; and 2. Surfacing Materials, e.g., acoustical ceilings. Building owners/employers are responsible for locating the presence and quantity of PACM. Building Owners/employers can rebut installed material as PACM by either having an inspection in accordance with Asbestos Hazard Emergency Response Act (AHERA) (40 CFR Part 763, Subpart E) or hiring an accredited inspector to take bulk samples of the suspect material.

Typical materials not covered by the presumptive rule include but are not limited to, floor tiles and adhesives, wallboard systems, siding and roofing. Building materials such as wallboard systems may contain asbestos but unless a building owner/employer has specific knowledge or should have known through the exercise of due diligence that these other materials contain asbestos, the standard does not compel the building owner to sample these materials.

NESHAP

The applicability of the EPA's National Emission Standards for Hazardous Air Pollutants (NESHAP, 40 CFR Chapter 61, Subpart M) apply to the owner or operator of a facility where an inspection for the presence of asbestos-containing materials (ACM), including Category I (asbestos containing packings, gaskets, resilient floor coverings and asphalt roofing products), and Category II (all remaining types of non-friable asbestos containing material not included in Category I that when dry, cannot be crumbled, pulverized or reduced to powder by hand pressure), non-friable ACM must occur prior to the commencement of demolition or renovation activities. NESHAP defines ACM as any material or product that contains greater than 1% asbestos. It should be noted that the NESHAP regulation applies to all facilities regardless of construction date, including: 1. Any institutional, commercial, public, industrial, or residential structure, installation, or building; 2. Any ship; and 3. Any active or inactive waste disposal site. This requirement is typically enforced by the EPA or by local air pollution control/air quality management districts.

A limited asbestos survey was completed on November 8, 2023. The report is submitted under separate cover.

3.10 Lead Paint

Lead-based paint (LBP) is defined as any paint, varnish, stain, or other applied coating that has ≥1 mg/cm^2 (5,000 µg/g or 5,000 ppm) or more of lead by federal guidelines; state and local definitions may differ from the federal definitions but are generally more stringent. Section 1017 of the Housing and Urban Development (HUD) Guidelines, Residential Lead-Based Paint Hazard Reduction Act of 1992, otherwise known as "Title X", defines a LBP hazard is "any condition that causes exposure to lead that would result in adverse human health effects" resulting from lead-contaminated dust, bare, lead-contaminated soil, and/or lead-contaminated paint that is deteriorated or present on accessible, friction, or impact surfaces.

Under Title X, intact lead-based paint on most walls and ceilings would not be considered a "hazard," unless peeling or deteriorating conditions occur, thus existing painted surfaces should be maintained and its condition monitored to ensure that a hazard does not develop. Additionally, Section 1018 of this law directed the HUD and EPA to require the disclosure of known information on lead-based paint and lead-based paint hazards before the sale or lease of most housing built before 1978. Most private housing, public housing, federally owned or subsidized housing are affected by this rule.

Lead-containing paint (LCP) is defined as any paint with any detectable amount of lead present in it. It is important to note that LCP, even if not qualifying as LBP, may still create a lead hazard if it is subject to abrading, sanding, torching and/or cutting during demolition or renovation activities. Thus, LCP and LBP should be identified prior to and monitoring during any proposed renovations or demolition proposed at the subject property to ensure proper removal.

Based on the age of the buildings (1940, ~1960), it is possible that LBP is present in the buildings.

3.11 Site Hydrology and Geology

3.11.1 Surface Water and Surficial Soil Characteristics

Soil at the subject property is classified as Immokalee soils and Urban land (100%). The Immokalee soil component is found on flatwoods on marine terraces. The parent material consists of sandy marine deposits and depth to a restrictive layer is greater than 80 inches. This poorly drained soil has a moderately high to high water capacity. This soil is not flooded nor ponded. A seasonal zone of water saturation is 6 to 18 inches below land surface. This soil does not meet hydric criteria.

3.11.2 Groundwater Characteristics

Groundwater data is not available for the subject property or immediate surrounding area. Groundwater levels and/or flow direction(s) may vary due to seasonal fluctuations in precipitation, local usage demands, soil and bedrock geology, underground structures, or dewatering operations. Groundwater flow direction likely parallels the topographic gradient which slopes to the north-northeast.

The subject property is underlain by the Intermediate Confining Aquifer. In west-central Florida, aquifers that lie between the surficial aquifer system and the Floridan aquifer system are collectively referred to as the intermediate aquifer system. This aquifer system starts in Hillsborough and Polk Counties and extends south through Collier County. The intermediate aquifer system is under confined conditions and is mainly comprised of permeable layers of sand, shell and limestone separated by clay confining units. It is the main source of water supply for Sarasota, Charlotte and Lee Counties where the underlying Floridan aquifer contains brackish water. Much of the water pumped from this aquifer system is used for agriculture. In most places, water percolates down from the surficial aquifer system above to the intermediate aquifer system. Lateral flow is generally from a high area in Polk County towards major surface water features and the Gulf of Mexico.

3.11.3 Geological Characteristics

According to the Geological Map of Florida, the subject property and surrounding areas are underlain by the Undifferentiated Hawthorn Group. The undifferentiated Hawthorn Group

occurs at or near the surface near the southern flank of the Ocala Platform from Gilchrist County southward to Pasco County with isolated occurrences in Pinellas County. There is little to no phosphate present in these sediments and fossils are rare. These sediments may be residual from the weathering and erosion of the Hawthorn Group. The undifferentiated Hawthorn Group sediments are light olive gray and blue gray in unweathered sections to reddish brown in deeply weathered sections, poorly to moderately consolidated, clayey sands to silty clays and relatively pure clays. These sediments are part of the intermediate confining unit/aquifer system and provide an effective aquitard for the FAS, except where perforated by karst features. The hard rock phosphate deposits were formed by the dissolution of phosphate in the Hawthorn sediments and redeposition in karst features.

As specified in ASTM Standard Practice E 1527-21 § 8.2.3., the USGS 7.5-minute topographic maps of Clearwater, Florida (dated 1943, 1947, 1974, 1987, 1995, 2012, 2015, and 2018) showing the subject property location were reviewed. According to the topographic maps, the subject property is approximately 20 feet above mean sea level (MSL). The topographic gradient in the vicinity slopes to the northeast. A building is depicted onsite in 1943 and 1947. The remainder of the maps show urban built up land with few features. A sewage disposal facility is depicted approximately 1,200+ feet to the northeast. The nearest water body is Stevenson Creek approximately 1,600 feet to the northeast. The topographic maps are included in **Appendix C**.

The subject property is located within Federal Emergency Management Agency (FEMA) Zone X (not in a flood zone). FEMA flood zones were included in the EDR report provided in **Appendix G**.

4.0 CURRENT AREA CHARACTERISTICS

On November 8, 2023, Ms. Kristi Miller, EnviroTrac Site Assessor, conducted a site visit and area reconnaissance. Visual observations were made of the subject property and improvements, and adjoining properties, as viewed from the subject property.

4.1 Adjoining Properties

Current uses of the adjoining properties are as follows:

Direction from Property	Address	Occupant's Name	Current Use
West	1400 N. MLK Jr. Ave.	No signage (LeeRoy Bell Discount Store)	Commercial
Northwest	1402 N. MLK Jr. Ave.	A Spiritual Change Community Empowerment Center	Commercial

Direction from Property	Address	Occupant's Name	Current Use
North	1400 N. MLK Jr. Ave.	Private	Residential
Northeast	1106 Carlton St.	Private	Residential
East	1107 Carlton St.	Private	Residential
South	No address	Vacant lot	Vacant
Southwest	1310 N. MLK Jr. Ave.	United Way Suncoast Resource Center at North Greenwood, Clearwater Police Department	Commercial, City agency

4.2 Area Utilities

Area Utilities Observed During Site Reconnaissance	
Utility	**Provider**
Electric	Duke Energy
Natural Gas	Not provided
Potable Water	City of Clearwater
Sanitary	City of Clearwater

Summary of Communication:	Records are not available.

5.4 Subject Property and Area Aerial Photographs

EnviroTrac obtained copies of the 1942, 1951, 1957, 1970, 1976, 1984, 1986, 1993, 1995, 1997, 1999, 2007, 2010, 2015, and 2019 aerial photographs of the subject property and surrounding areas from EDR. Google Earth aerials from 1995 through the present were also reviewed to supplement the EDR aerials. The following are descriptions and interpretations from the aerial photograph review. Aerial photographs provided by EDR are included in **Appendix D**.

AERIAL PHOTOGRAPH SUMMARY		
Year	**Scale**	**Comments**
1943-1951	**1"=500'**	**Subject Property**: Poor photo quality; appears to be one building onsite **Surrounding Area**: Poor photo quality; small buildings to the north, west and larger buildings to the south and southwest
1957	**1"=500'**	**Subject Property**: The east-located residence is present **Surrounding Area**: Appears to be commercial buildings to the north and south and residential to the east and northeast. Potential gas station to the southwest
1970	**1"=500'**	**Subject Property:** Both existing buildings are present **Surrounding Properties:** Mixed use commercial and residential. Gas station is not apparent to the southwest
1976	**1"=500'**	**Subject Property:** No significant change **Surrounding Properties:** Building to the south is no longer present.
1984-2023	**1"=500'**	**Subject Property:** No significant change **Surrounding Properties:** No significant changes.

5.5 Site and Area Fire Insurance Maps

Fire Insurance Maps are a comprehensive source of historical information for urban centers. The fire insurance maps were produced for urban areas from the late 1800s until approximately 1976. The EDR provided Sanborn maps for the years 1917, 1923, 1929, 1949, and 1965. The EDR Certified Sanborn® Map Report is included in **Appendix E**.

SANBORN MAPS SUMMARY		
Year	**Scale**	
1917	**1"=500'**	Unmapped area
1923	**1"=500'**	**Subject Property**: Vacant **North:** Vacant **West:** Greenwood Ave. and two dwellings, Washington (street) extends to the west **South:** Vacant **East:** Vacant
1929	**1"=500'**	**Subject Property**: 2 stores in the western portion (1327-1331 Greenwood Ave.) **North:** Washington (Action Pl.) to the north followed by a store (1401), auto garage, and dwellings **West:** Greenwood Ave N. followed by a dwelling, 2 stores to the southwest **South:** 2 stores (1325)

SANBORN MAPS SUMMARY		
Year	**Scale**	
		East: Dwellings
1949	**1"=500'**	**Subject Property**: Stores are gone, dwelling in the eastern portion, vacant land in the western portion **North:** Washington (street) to the north followed by a store (1401) and dwellings **West:** Greenwood Ave N. followed by a dwelling, a restaurant (1316) and stores to the southwest and a store to the west (1400) **South:** 2 stores (1325) **East:** Dwellings
1965	**1"=500'**	**Subject Property**: Two-story (5 dwelling) building in the west portion and dwelling in the east portion **North:** Store/dwelling (1401) and dwellings to the northeast **West:** Filling station (1320 Greenwood Ave. North or 1013 Carlton St.) to the southwest, stores (1400/1402) to the west **South:** Stores (1325) and restaurants **East:** Dwellings

5.6 City Directories

EnviroTrac reviewed a City Directory report provided by EDR for the subject property and surrounding area encompassing the years 1966 to 2020. A copy of the EDR-City Directory Abstract report is included as **Appendix F**.

1105 Carlton Street (Subject property)

- 1966-2020 – Private residential listings (Anna Birt, Annie Willbright)

1329 Greenwood Ave. (Subject property)

- 1966, 1971 – Greenwood Sundries Confy, Releford Yvonne/Albritton Charles
- 1980 – Dew Drop Inn Restaurant
- 1985 – Greenwood Arcade & Restaurant

1104 Carlton Street (North-adjoining property)

- 1966-2020 – Private residential listings

1106 Carlton Street (Northeast-adjoining property)

- 1966-2020 – Private residential listings

1107 Carlton Street (East-adjoining property)

- 1966-2020 – Private residential listings

1325 Greenwood Ave. (South-adjoining property)

- 1966 – Nichols Pool Hall, Paige's Barber Shop
- 1971 – Paige's Barber Shop

1320 Greenwood Ave. (Southwest-adjoining property)

- 1966 – Daniels Service Station, Carlton Intersection

1310 Greenwood Ave. / N. MLK Jr. (Southwest-adjoining property)

- 1966, 1971 – Wonderland Beer Garden
- 1975 – Greenwood Development Center
- 1980, 1985 – VFW Post
- 2014-2020 – Operation Graduate

1400 N. MLK Jr. (West-adjoining property)

- 2010, 2022 – Eva Barber, Eva Beauty Box

1402 N. MLK Jr. (West-adjoining property)

- 2010, 2014 – A Spiritual Change
- 2020 – Greenwood Grove

5.7 Topographic Maps

USGS 7.5-minute topographic maps of Clearwater, Florida (dated 1943, 1947, 1974, 1987, 1995, 2012, 2015, and 2018) showing the subject property location were reviewed. According to the topographic maps, the subject property is approximately 20 feet above mean sea level (MSL). The topographic gradient in the vicinity slopes to the northeast. A building is depicted onsite in 1943 and 1947. The remainder of the maps show urban built up land with few features. A sewage disposal facility is depicted approximately 1,200+ feet to the northeast. The nearest water body is Stevenson Creek approximately 1,600 feet to the northeast. The topographic maps are included in **Appendix C**.

5.8 Historical Records Sources Summary

Based on a review of historical topographic maps and aerials, the subject property was vacant in 1923 and the western portion was developed with a 2-story building occupied by two "stores" by 1929. This building was demolished sometime prior to 1942. The existing eastern-located residence was constructed in 1940 and has been residential in use through the present time. The existing western-located building was constructed sometime between 1957 and 1965 and 1st floor occupants have included Greenwood Sundries Confy, Dew Drop Inn Restaurant, Greenwood Arcade & Restaurant, A&A Café, and private residences on the second floor.

The surrounding area was developed in the early-1920s with scattered residences. By 1929, the east and northeast properties were residentially developed and commercial development was prevalent to the north, south, and southwest. A gasoline station adjoined the subject property to the southwest in the 1950s-1960s. This former gas station does not represent a REC based on information obtained during the regulatory records review. The remaining commercial properties were occupied by restaurants, pool halls, barber shops, various retailers, and offices. Two dry cleaning businesses operated at the former commercial building located approximately 100 feet south of the subject property in the 1940s-1950s (Greenwood Park Cleaners at 1104 Tangerine St.) and the 1960s-1970s (Flair Dry Cleaning at 1102 Tangerine St.). Regulatory information was not identified for the cleaners. The dry cleaners do not represent RECs as summarized throughout the report.

6.0 SITE REGULATORY INFORMATION AND RECORDS REVIEW

6.1 Federal, State, Local, and Tribal Environmental Review

Information from standard federal, state, county and city environmental records sources was provided to EnviroTrac by Environmental Data Resources (EDR) using the ASTM definition of migration, EnviroTrac considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor. Unplottable facilities were not listed. The EDR Database Report is provided in **Appendix G**.

6.2 Federal, State, Local, and Tribal Site Records

The subject property was listed on the Brownfields databases searched by EDR. Both the Ulmerton Road Opportunity Corridor (UROC) Area-Wide Brownfield Expansion and City of Clearwater Brownfields encompass the subject property and surrounding area. These listings in

themselves do not indicate the presence of contamination. The FDEP defines Brownfields as "any real property where the expansion, redevelopment, or reuse is complicated by actual or perceived contamination." Site specific reports were not identified as related to Brownfield assessments.

6.3 Federal, State, Local, and Tribal Adjoining Property Records

Regulated facilities identified in the immediate vicinity of the subject property are listed below in the order they appear on the EDR database report.

City of Clearwater City Police Substation/MLK Jr. Police Substation (1310/1400 N. MLK Jr. Ave.)

This LUST/TANK/Eng Controls/Inst Control/DWM Contam facility adjoins the subject property to the southwest (location of the filling station depicted on the 1965 Sanborn map). While excavating trenching for new utilities along MLK Jr. Avenue in June 2002, City contractors encountered soil with strong petroleum odors. Excavated soil removed from the construction zone was placed on Visqueen and a soil sample collected for lab analysis yielded Total Recoverable Petroleum Hydrocarbons (TRPH) in excess of FDEP's Soil Cleanup Target Level (SCTL). A discharge report form (DRF) was filed on June 3, 2002, and 39.5 tons of impacted soil was transported for offsite disposal. A Site Assessment Report (SAR) was completed by TBE Group Inc., dated February 2003, which indicated the presence of impacted soil, mainly beneath MLK Jr. Ave., and groundwater contamination in a single well (MW-4). MW-4 was installed at the southwest-adjacent sidewalk (near the source area), MW-6 was installed in the sidewalk immediately north of the subject property and MW-5 was installed at the west-adjacent sidewalk. TBE recommended monitoring only; however, additional assessment was requested by the Pinellas County Health Department and Brownfield funding was implemented. Additional assessment identified minimal soil impacts beneath the street/asphalt but no groundwater contamination. MW-4 through MW-6 were sampled three additional times and GCTL exceedances were not reported. Shallow groundwater flow direction was reported to the north, northeast, and northwest. Final soil delineation was completed in 2007. Petroleum impacted soil was left in place beneath N. MLK Jr. Avenue and the facility received a Conditional Site Rehabilitation Completion Order (C-SRCO) on May 13, 2011, through a deed restriction/Declaration of Restrictive Covenant (DRC). The area of soil covered by the DRC is located beneath the MLK southbound lane, approximately 20 feet west of the subject property. Three soil samples collected in the northbound lane, closer to the subject property, did not exhibit SCTL exceedances. Based on the absence of documented historic or current contamination at the subject property, this offsite contamination does not represent a REC, CREC, or HREC.

Flair Dry Cleaning (1102 Tangerine St.)

According to the EDR report, this facility operated from 1966 through 1974 and is listed as "cleaners and dyers" and "power laundries, family and commercial." The facility was located

100 feet south of the subject property in the same building as Greenwood Park Cleaners. Regulatory information was not identified for the former dry cleaner.

Greenwood Park Cleaners/Nealys Cleaners (1104 Tangerine St.)

According to the EDR report, this facility operated from 1947 through 1958 and is listed as “clothes pressers and cleaners” and “cleaners and dyers.” The facility was located 100 feet south of the subject property in the same building as Flair Dry Cleaning. Regulatory information was not identified for the former dry cleaner.

Blue Chip Bar Site (1317 N. MLK Jr. Ave.)

This US Brownfields facility is located approximately 100 feet south of the subject property. The former Blue Chip Bar building was demolished in 2009-2010; this was the location of two historic dry cleaning businesses (Flair Dry Cleaning and Greenwood Park Cleaners). According to the EDR report, “Phase I and Phase II ESAs completed in 2008 revealed no RECs associated with the property. No further assessment is recommended. Former Use: Historical land use included commercial and residential land use. Site was considered an "eye sore" and had developed a stigma related to excessive crime activity at the site.” The assessments were completed through a US EPA Brownfields Assessment Cooperative Agreement. EnviroTrac requested copies of the 2008 Phase I and Phase II ESAs from the City of Clearwater and the USEPA District 4 through a Freedom of Information Act (FOIA) request. At the issuance of this report, the reports have not been provided. The EPA indicated that the request was received and a response is expected within 20 days. The City of Clearwater purchased this property in 2008 after receipt of the aforementioned due diligence reports. Although EnviroTrac has not been provided copies of the Phase I and Phase II reports, it can be presumed that contamination was not identified; therefore, it is unlikely that the current subject property would be affected by the historic dry cleaners. The absence of this information represents a significant data gap. Once the reports are received from the USEPA, EnviroTrac will update any pertinent information as it pertains to the current subject property.

MLK Fr. Police Sub Station (1310 N. MLK Jr. Ave.)

This US Brownfields facility is located adjoining the subject property to the southwest, as discussed earlier in this section under the title “City of Clearwater City Police Substation/MLK Jr. Police Substation.” According to the EDR report, “The property is the former gas station facility where the existing police substation is located. Contamination was discovered during the installation of underground utilities associated with the revitalization of the North Greenwood Community. Currently, the Pinellas County Pollutant Storage Tank Program is reviewing the assessment conducted on this facility (PPF attached to QR 5, 10/1/04-12/31/04). This property has a monitoring only status. (PPF - MLK Jr. Police Substation - Former Gas Station Property, 4/30/07) Former Use: Former gasoline service station; currently a police substation and community job skills center.” Based on the absence of documented historic or current

contamination at the subject property, this offsite contamination does not represent a REC, CREC, or HREC.

Sunny Side Cleaners (1009 Engman St.)

This former dry cleaning facility was located approximately 400 feet south-southwest of the subject property. According to the EDR report and city directory listings, the business operated from at least 1947 through 1958. Regulatory documents are not available for the facility. Based on distance and the short duration of operations, Sunny Side Cleaners does not represent a REC.

The remaining facilities listed on the EDR report do not represent RECs based on substantial distance, down-gradient positioning, and/or facility status.

Supporting documents and regulatory agency responses are included in **Appendix H**.

7.0 VAPOR ENCROACHMENT SCREENING (VES)

EnviroTrac conducted a Tier 1 Vapor Encroachment Screening (VES) as part of this ESA, using the general methodology outlined in ASTM E-2600-10, to determine if a potential *vapor encroachment condition* (VEC) exists at the subject property. The VES included a review of reasonably ascertainable information for the subject property and nearby properties contained in the ERIS Database Report (See Section 6.0.) as well as professional judgment. Based on the results of the Tier 1 VES, a VEC was not identified at the subject property due to the absence of documented VOC contamination.

8.0 INTERVIEWS

The following person(s) were interviewed to obtain information in connection with the subject property:

Name	Role/Position	Contact	Date
John Jenkins	Owner representative	727-804-1549	11/20/23

Subject property owner representative, Mr. John Jenkins, reported the following:

- He has been familiar with the subject property for approximately 50 years as his god mother owned the property while he grew up;
- Anna Birt is the current owner of record and she received the property from her mother, also Anna Birt;
- The property has been in the family for approximately 100 years;
- The only uses of the subject property that Mr. Jenkins is aware of is residential and restaurants/cafes;
- He is unaware of any previous Phase I ESAs or environmental reports prepared for the subject property;
- The City of Clearwater provides water and sewer service;
- Duke Energy provides electric service;
- Natural gas is provided by City of Clearwater;
- Water wells, irrigation wells, and monitoring wells are not present to his knowledge;
- A grease trap is located on the south side of the 2-story building;
- He is unaware of any current or former USTs or ASTs at the subject property;
- He is unaware of any spills or releases of hazardous materials or petroleum products at the subject property;
- He is unaware of any illegal dumping or landfilling at the subject property at the subject property;
- He is unaware of any environmental concerns associated with the subject property or surrounding area;
- He is unaware of any pending, threatened, or past environmental litigations, proceedings or notices of possible violation in connection with the subject property.

City personnel interviewed during the site reconnaissance were not aware of environmental issues pertaining to the subject property.

9.0 USER PROVIDED INFORMATION

The following section summarizes information (if any) provided by the User regarding the Phase I ESA. Mr. Chuck Lane, of the City of Clearwater Economic Development department provided the following information (**Appendix I**).

9.1 Title Records

The User did not provide EnviroTrac with a copy of a chain of title report. EnviroTrac assumes the client is evaluating title records outside the scope of this Phase I ESA.

9.2 Environmental Liens or Activity and Use Limitations (AULs)

The User is unaware of environmental liens or activity use limitations against the subject property filed or recorded under federal, state or local law.

9.3 Specialized Knowledge

The User did not provide information regarding specialized knowledge pertaining to the subject property other than it was used for residences and a restaurant.

9.4 Significant Valuation Reduction for Environmental Issues

Information regarding a significant valuation reduction for environmental issues associated with the subject property was not provided by the User. The purchase price is slightly above fair market value.

9.5 Owner, Property Manager and Occupant Information

The subject property is owned by Anna Birt.

9.6 Reason for Performing Phase I ESA

It is EnviroTrac's understanding, the ESA was requested for due diligence purposes prior to purchase by the City.

9.7 Other User Provided Documents

Per the ASTM Standard Practice E 1527-21, EnviroTrac requested information from the User and the subject property owner representative.

10.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Recognized Environmental Conditions
RECs were not identified.

Historical Recognized Environmental Conditions
HRECs were not identified.

Controlled Recognized Environmental Conditions
CRECs were not identified.

De Minimis Conditions
De minimis conditions were not identified for the subject property.

Data Gaps
Blue Chip Bar Site (1317 N. MLK Jr. Ave.) - This US Brownfields facility is located approximately 100 feet south of the subject property. The former Blue Chip Bar building was demolished in 2009-2010; this was the location of two historic dry cleaning businesses (Flair Dry Cleaning and Greenwood Park Cleaners). According to the EDR report, “Phase I and Phase II ESAs completed in 2008 revealed no RECs associated with the property. No further assessment is recommended. Former Use: Historical land use included commercial and residential land use. Site was considered an "eye sore" and had developed a stigma related to excessive crime activity at the site.” The assessments were completed through a US EPA Brownfields Assessment Cooperative Agreement. EnviroTrac requested copies of the 2008 Phase I and Phase II ESAs from the City of Clearwater and the USEPA District 4 through a Freedom of Information Act (FOIA) request. At the issuance of this report, the reports have not been provided. The EPA indicated that the request was received and a response is expected within 20 days. The City of Clearwater purchased this property in 2008 after receipt of the aforementioned due diligence reports. Although EnviroTrac has not reviewed the Phase I and Phase II reports, it can be presumed that contamination was not identified; therefore, it is unlikely that the current subject property would be affected by the historic dry cleaners. The absence of this information represents a significant data gap. Once the reports are received from the USEPA, EnviroTrac will update any pertinent information as it pertains to the current subject property.

Non-Scope Conditions

Potable Water Wells – During the site reconnaissance, EnviroTrac did not observe any potable water wells on the subject property.

Septic Systems – During the site reconnaissance, EnviroTrac did not observe septic systems at the subject property.

Wetlands - According to State and federal sources reviewed by EnviroTrac, wetlands are not present at the subject property.

Per the request of the City of Clearwater, EnviroTrac completed a limited asbestos survey of the two (2) subject property buildings, and is submitted under separate cover.

11.0 RECOMMENDATIONS

EnviroTrac recommends no further assessment at this time.

12.0 DEVIATIONS

No deviations from ASTM 1527-21 occurred for this Phase I ESA.

14.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONAL (EP), EP STATEMENT, PRIMARY AUTHOR REQUIREMENT

Qualifications of the Environmental Professional and Senior Reviewer are provided in **Appendix J**.

Environmental Professional Statement

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional(s)* as defined in § 312.10 part of 40 CFR 312. We have the specific qualifications based on education, training and experience to assess a property of the nature, history and setting of the host property. We have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Copies of the Environmental Professionals' qualifications are provided in **Appendix J**.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by EnviroTrac Environmental Svcs. were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EnviroTrac Environmental Svcs. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at approximately five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1921 through current. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

Summary information obtained is provided in the text of this report.

RECORD SOURCES

The EDR City Directory Report accesses a variety of business directory sources, including Haines, InfoUSA, Polk, Cole, Bresser, and Stewart. Listings marked as EDR Digital Archive access Cole and InfoUSA records. The various directory sources enhance and complement each other to provide a more thorough and accurate report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal RCRA generators

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 07/24/2023 has revealed that there are

3 RCRA-VSQG sites within approximately 0.25 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

Lists of state and tribal leaking storage tanks

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Department of Environmental Protection's PCTO1--Petroleum Contamination Detail Report.

A review of the LUST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 15 LUST sites within approximately 0.5 miles of the target property.

LAST: The file for Leaking Aboveground Storage Tanks. Please remember STCM does not track the source of the discharge so the agency provides a list of facilities with an aboveground tank and an open discharge split by facilities with aboveground tanks only and facilities with aboveground and underground tanks.

A review of the LAST list, as provided by EDR, and dated 07/24/2023 has revealed that there are 2 LAST sites within approximately 0.5 miles of the target property.

Lists of state and tribal registered storage tanks

UST: The Underground Storage Tank database contains registered USTs. Shortly after the September 11 event, the DEP was instructed to remove the detail about some of the storage tank facilities in the state from their reports. Federal-owned facilities and bulk storage facilities are included in that set.

A review of the UST list, as provided by EDR, has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 07/24/2023 has revealed that

there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

DORADO POWERBOATS IN EPA ID:: FLR000010272	1401 N MYRTLE AVE	W 1/8 - 1/4 (0.243 mi.)	F20	101

PFAS ECHO: Regulators and the public have expressed interest in knowing which regulated entities may be using PFAS. EPA has developed a dataset from various sources that show which industries may be handling PFAS. Approximately 120,000 facilities subject to federal environmental programs have operated or currently operate in industry sectors with processes that may involve handling and/or release of PFAS.

A review of the PFAS ECHO list, as provided by EDR, and dated 07/05/2023 has revealed that there is 1 PFAS ECHO site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 3 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

US BROWNFIELDS:
Name: MLK JR. POLICE SUB STATION-FORMER GAS STATION
Address: 1310 NORTH MARTIN LUTHER KING JR. AVENUE
Recipient name: Clearwater, City of
Grant type: Assessment
Region: 4
Property Number: 1.02915E+16
Parcel size: 0.31
Latitude: 27.97941
Longitude: -82.79198
HCM Label: Interpolation-Map
Map Scale: 1.708333333
Point of Reference: Center of a Facility or Station
Highlights: The property is the former gas station facility that the existing police substation was built on. Contamination was discovered during the installation of underground utilities associated with the revitalization of the North Greenwood Community. Currently, the Pinellas County Pollutant Storgage Tank Program is reviewing the assessment conducted on this facility. (PPF attached to QR 5, 10/1/04-12/31/04) This property has a monitoring only status. (PPF - MLK Jr. Police Substation - Former Gas Station Property, 4/30/07) Former Use: Former gasoline service station; currently a police substation and community job skills center.

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:
Registry ID: 110038699307

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on Brownfields properties assessed or cleaned up with grant funding, as well as information on Targeted Brownfields Assessments (TBA) performed by EPA Regions.
Registry ID: 110015724787

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Florida Integrated Environmental System Today (FIESTA) Data Maintenance (FDM) System maintains entity, environmental interest, and affiliation data.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/19/2023

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State and tribal institutional control / engineering control registries

ENG CONTROLS: Institutional Controls Registry

The registry is a database of all contaminated sites in the state of Florida which are subject to engineering controls. Engineering Controls encompass a variety of engineered remedies to contain and/or reduce contamination, and/or physical barriers intended to limit access to property. ECs include fences, signs, guards, landfill caps, provision of potable water, slurry walls, sheet pile (vertical caps), pumping and treatment of groundwater, monitoring wells, and vapor extraction systems.

Lists of state and tribal brownfield sites

BSRA: Brownfield Site Rehabilitation Agreements Listing

The BSRA provides DEP and the public assurance that site rehabilitation will be conducted in accordance with Florida Statutes and DEP's Contaminated Site Cleanup Criteria rule. In addition, the BSRA provides limited liability protection for the voluntary responsible party. The BSRA contains various commitments by the voluntary responsible party, including milestones for completion of site rehabilitation tasks and submittal of technical reports and plans. It also contains a commitment by DEP to review technical reports according to an agreed upon schedule. Only those brownfield sites with an executed BSRA are eligible to apply for a voluntary cleanup tax credit incentive pursuant to Section 376.30781, Florida Statutes.

BROWNFIELDS AREAS: Brownfields Areas Database

A "brownfield area" means a contiguous area of one or more brownfield sites, some of which may not be contaminated, that has been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. This layer provides a polygon representation of the boundaries of these designated Brownfield Areas in Florida.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facilitys name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset. as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration?s document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

FL Cattle Dip. Vats: Cattle Dipping Vats

From the 1910's through the 1950's, these vats were filled with an arsenic solution for the control and eradication of the cattle fever tick. Other pesticides, such as DDT, were also widely used. By State law, all cattle, horses, mules, goats, and other susceptible animals were required to be dipped every 14 days. Under certain circumstances, the arsenic and other pesticides remaining at the site may present an environmental or public health hazard.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

RESIDENTIAL/COMMERCIAL PROPERTY
1105 CARLTON ST
CLEARWATER, FL 33755

TARGET PROPERTY COORDINATES

Latitude (North):	27.979593 - 27° 58' 46.53''
Longitude (West):	82.791653 - 82° 47' 29.95''
Universal Tranverse Mercator:	Zone 17
UTM X (Meters):	323787.4
UTM Y (Meters):	3096063.0
Elevation:	19 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	11509875 CLEARWATER, FL
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

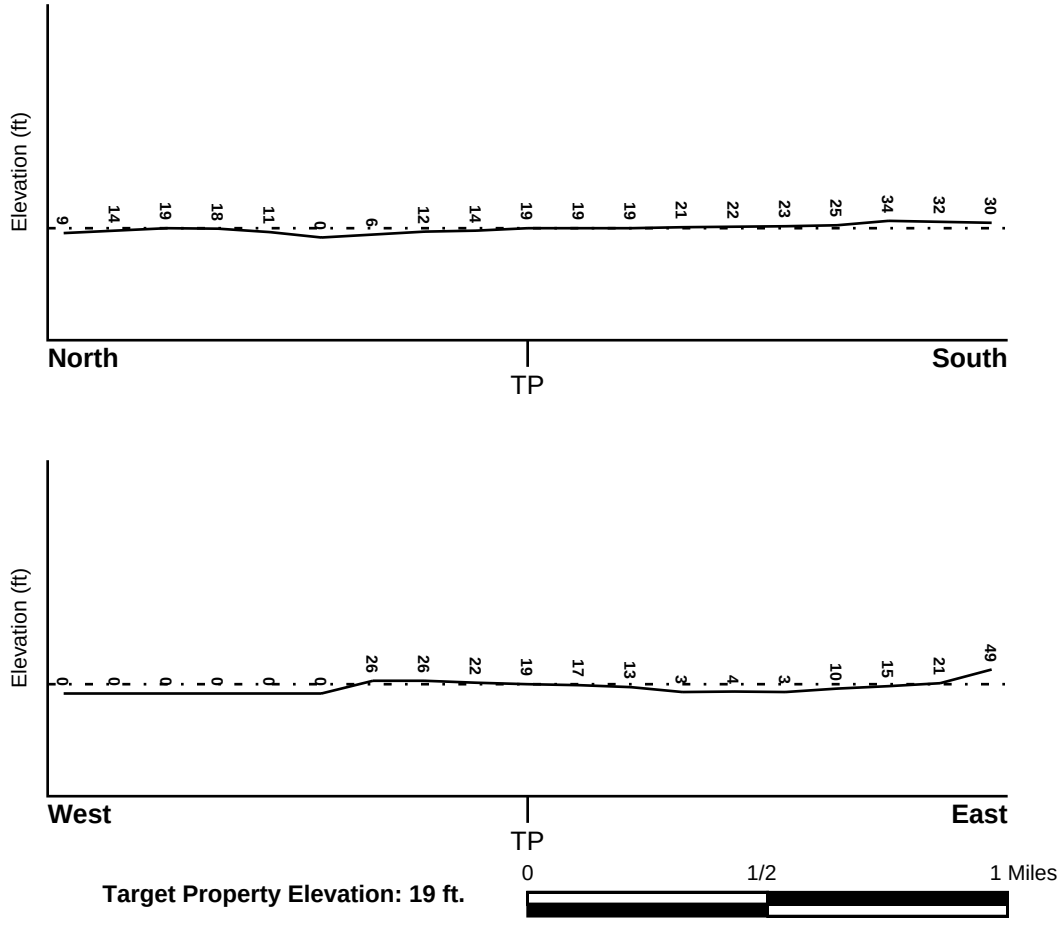

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Target Property Elevation: 19 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
12103C0106H	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
12103C0107H	FEMA FIRM Flood data
12103C0109H	FEMA FIRM Flood data
12103C0108H	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CLEARWATER	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
4	1/4 - 1/2 Mile South	ESE
C10	1/2 - 1 Mile SSW	W
1G	1/4 - 1/2 Mile South	ESE
3G	1/2 - 1 Mile SSW	W

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site−specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Immokalee

Soil Surface Texture: fine sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sand	Not reported	Not reported	Max: 141.176 Min: 42.3528	Max: 6 Min: 3.6
2	5 inches	35 inches	fine sand	Not reported	Not reported	Max: 141.176 Min: 42.3528	Max: 6 Min: 3.6
3	35 inches	50 inches	fine sand	Not reported	Not reported	Max: 141.176 Min: 42.3528	Max: 6 Min: 3.6
4	50 inches	79 inches	fine sand	Not reported	Not reported	Max: 141.176 Min: 42.3528	Max: 6 Min: 3.6

Soil Map ID: 2

Soil Component Name: Astatula

Soil Surface Texture: fine sand

Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
	Boundary			Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil		
1	0 inches	3 inches	fine sand	Not reported	Not reported	Max: 352.85 Min: 141.176	Max: 6.5 Min: 4.5
2	3 inches	79 inches	fine sand	Not reported	Not reported	Max: 352.85 Min: 141.176	Max: 6.5 Min: 4.5

Soil Map ID: 3

Soil Component Name: Urban land

Soil Surface Texture: fine sand

Hydrologic Group: Not reported

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Urban land

Soil Surface Texture: fine sand

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 69 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005, 2010 and 2015 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

The Fire Marshal researched the Pinellas County 911 database for calls to this address. He had access to the last 10 years. Two incidents were found and they are for emergency medical services. All emergency medical service calls (patient care reports) are managed by Pinellas County. You will need to contact them if you would like those reports.
Records requests:
727-582-2008
https://pinellas.gov/medical-records-requests/
Thank you
Additionally, if you want information more than 10 years ago, you can ask Pinellas County 911 if they have saved that information and can research further for you.

Good morning Ms. Miller,

This email relates to your request for (1105 Carlton Street, Clearwater, Florida). The Florida Department of Environmental Protection would like to inform you that no records were found matching the provided criteria.

Please be advised that name variations, misspellings and incorrect addresses may not indicate the existence of actual files, and the Department will not be responsible for records not retrieved based on such information being submitted to us. Although we have made a diligent search to fulfill your request, files may still exist in other agencies of which we are not the records custodian that may contain information related to your request. Therefore, please reach out to the respective county as applicable.

Pinellas- http://www.pinellascounty.org/

Pinellas County Health Department http://pinellas.floridahealth.gov/

If you have any questions, please feel free to contact us.

Thank you for contacting DEP. Have a great day!

Susan Stephens

Did you know you can access many public records from your personal computer using our free public online resources? The Florida Department of Environmental Protection has several public online databases where records are stored: OCULUS, DEP Information Portal and Map Direct.

Please look below for more information on each database. For your future records needs, you might try checking out one of these databases before submitting a request.

To whom it may concern:

The Florida Department of Health in Pinellas County, Division of Disease Control & Health Protection is providing the following information in response to your November 2, 2023 request for the following address:

1105 Carlton St. Clearwater

- Storage Tank Program – The Florida Department of Environmental Protection (FDEP), Storage Tank Program, has a database searchable by a specific facility address. A search of the database indicates no registered facilities at the address provided.

- OSTDS – There are no septic records for the address provided.

- Community Environmental Health – The Environmental Health Database indicates no permits at the address provided. A review of available records does not indicate any Lead, Indoor Air Quality, or Sanitary Nuisance Complaint investigations at the address provided.

- Super Act – There are no registered wells at the address provided.

The following information is not available at our office and it is suggested you contact the following agencies as noted:

- Air Permits, inspections, and violations – Pinellas County Air Quality – 727-464-4761
- Water/Wastewater permits, inspections, violations – DEP Southwest – 813- 470-5700
- Hazardous waste inspections and violations – DEP Southwest – 813- 470-5700
- Spills of petroleum or hazardous materials – DEP Southwest – 813- 470-5752
- Site specific reports of asbestos – Pinellas County Air Quality – 727-464-4761
- Site specific reports of hazardous materials – DEP Southwest – 813- 470-5700
- Records associated with water supply wells – DEP Southwest – 813- 470-5700
- Fires & Emergency Response – Pinellas County Fire Administration - (727) 582-2000

Please let us know if we can be of additional assistance.

CERTIFIED MAIL #7010 1870 0000 1329 5589
RETURN RECEIPT REQUESTED

Mr. William Horne
City Manager
Clearwater City Hall, 3rd Floor
112 South Osceola Avenue
Clearwater, Florida 33756

Subject: Conditional Site Rehabilitation Completion Order
Clearwater City - Police Substation
1400 North Martin Luther King Avenue
Clearwater, Pinellas County
FDEP Facility ID# 529804856
Discharge Date: June 3, 2002 (Non-program)

Dear Mr. Horne:

The Pinellas County Health Department, on behalf of the Florida Department of Environmental Protection (Department), has reviewed the Site Rehabilitation Completion Report (SRCR) and No Further Action Proposal (NFAP) with Conditions dated February 4, 2008 (received February 5, 2008), prepared and submitted by URS Corporation for the petroleum product discharge referenced above. Documentation submitted with the SRCR/NFAP confirms that criteria set forth in Subsection 62-770.680(2), Florida Administrative Code (F.A.C.), effective 12/27/07, have been met. Please refer to the attached maps of the source property and analytical summary tables. The SRCR/NFAP is hereby incorporated by reference in this Site Rehabilitation Completion Order (Order). A declaration of restrictive covenant has been recorded with the deed for this property. Therefore, you are released from any further obligation to conduct site rehabilitation at the facility for petroleum product contamination associated with the discharge referenced above, except as set forth below. Failure to abide by the following requirements will result in the revocation of this Order.

(1) You must comply with the provisions contained within the Declaration of Restrictive Covenant filed prior to the execution of this Order (Exhibit A). If at a

later date you propose to remove the institutional controls or engineering controls you must obtain prior written approval from the Department. The removal of the controls must be accompanied by the immediate resumption of site rehabilitation, or implementation of other approved controls, unless it is demonstrated to the Department that the criteria of Subsection 62-770.680(1), F.A.C., are met.

(2) In the event concentrations of petroleum products' contaminants of concern increase above the levels approved in this Order, or if a subsequent discharge of petroleum or petroleum product occurs at the facility, the Department may require site rehabilitation to reduce concentrations of petroleum products' contaminants of concern to the levels approved in the SRCR/NFAP or otherwise allowed by Chapter 62-770, F.A.C.

(3) Additionally, you are required to properly abandon all monitoring wells within 60 days of receipt of this Order. The monitoring wells must be plugged and abandoned in accordance with the requirements of Subsection 62-532.500(5), F.A.C.

Legal Issues

The Department's Order shall become final unless a timely petition for an administrative hearing is filed under Sections 120.569 and 120.57, Florida Statutes (F.S.), within 21 days of receipt of this Order. The procedures for petitioning for an administrative hearing are set forth below.

Persons affected by this Order have the following options:

(A) If you choose to accept the Department's decision regarding the SRCR/NFAP you do not have to do anything. This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order.

(B) If you choose to challenge the decision, you may do the following:

(1) File a request for an extension of time to file a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order; such a request should be made if you wish to meet with the Department in an attempt to informally resolve any disputes without first filing a petition for an administrative hearing; or

(2) File a petition for an administrative hearing with the Department's Agency Clerk in the Office of General Counsel within 21 days of receipt of this Order.

Please be advised that mediation of this decision pursuant to Section 120.573, F.S., is not available.

How to Request an Extension of Time to File a Petition for an Administrative Hearing

For good cause shown, pursuant to Subsection 62-110.106(4), F.A.C., the Department may grant a request for an extension of time to file a petition for an administrative hearing. Such a request must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from City of Clearwater, shall mail a copy of the request to City of Clearwater at the time of filing. Timely filing a request for an extension of time tolls the time period within which a petition for an administrative hearing must be made.

How to File a Petition for an Administrative Hearing

A person whose substantial interests are affected by this Order may petition for an administrative hearing under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) by the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, within 21 days of receipt of this Order. Petitioner, if different from City of Clearwater, shall mail a copy of the petition to City of Clearwater at the time of filing. Failure to file a petition within this time period shall waive the right of anyone who may request an administrative hearing under Sections 120.569 and 120.57, F.S.

Pursuant to Subsection 120.569(2), F.S. and Rule 28-106.201, F.A.C., a petition for an administrative hearing shall contain the following information:

(a) The name, address, and telephone number of each petitioner; the name, address, and telephone number of the petitioner's representative, if any; the facility owner's name and address, if different from the petitioner; the FDEP facility number, and the name and address of the facility;

(b) A statement of when and how each petitioner received notice of the Department's action or proposed action;

(c) An explanation of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;

(d) A statement of the disputed issues of material fact, or a statement that there are no disputed facts;

(e) A statement of the ultimate facts alleged, including a statement of the specific facts the petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the Department to take with respect to the Department's action or proposed action.

This Order is final and effective on the date filed with the Clerk of the Department, which is indicated on the last page of this Order. Timely filing a petition for an administrative hearing postpones the date this Order takes effect until the Department issues either a final order pursuant to an administrative hearing or an Order Responding to Supplemental Information provided to the Department pursuant to meetings with the Department.

Judicial Review

Any party to this Order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110 of the Florida Rules of Appellate Procedure with the Department's Agency Clerk in the Office of General Counsel at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida, 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within 30 days after this Order is filed with the Department's clerk (see below).

Questions

Any questions regarding the Pinellas County Health Department's review of your SRCR/NFAP should be directed to Andrew Moore at (727) 538-7277, extension 1108. Questions regarding legal issues should be referred to the Department's Office of General Counsel at (850) 245-2242. Contact with any of the above does not constitute a

petition for an administrative hearing or a request for an extension of time to file a petition for an administrative hearing.

The FDEP Facility Number for this facility is 529804856. Please use this identification on all future correspondence with the Department or the Pinellas County Health Department.

Sincerely,

Charles T. Williams, Acting Chief
Bureau of Petroleum Storage Systems

LEGAL NOTICE

STATE OF FLORIDA
DEPARTMENT OF ENVIRONMENTAL PROTECTION
NOTICE OF PROPOSED AGENCY ACTION

The Department of Environmental Protection (FEDP) gives notice that it proposes to approve a No Further Action Proposal with institutional controls or with engineering and institutional controls and issue a Site Rehabilitation Completion Order with Controls for a contaminated site. The City of Clearwater is seeking this Order in reference to Clearwater Police Substation (FDEP Facility Identification Number 529804856) and intends to restrict exposure to contamination under the pavement along portions of North Martin Luther King Avenue and Carlton Street in the following manner:

A.) The area of soil contamination as located on the Property shall remain permanently covered and maintained with an impermeable material that prevents human exposure and limits water infiltration.

B.) Excavation and construction below two feet surface elevations is not prohibited within the areas containing soils contaminated with petroleum products' chemicals of concern provided any soils contaminated with petroleum products' chemicals of concern that are excavated are removed and properly disposed of pursuant to Chapter 62-770 F.A.C. (or subsequent contamination site cleanup criteria rule(s)). Nothing herein shall limit or conflict with any other legal requirements regarding construction methods and techniques that must be taken to minimize risk of exposure while conducting work in contaminated areas. For any dewatering activities, a plan must be in place to address and ensure the appropriate handling, treatment, and disposal of any extracted groundwater that may be contaminated.

C.) Nothing in Declaration shall prevent, limit or restrict any excavation or construction at or below the surface outside the boundary of soils contaminated with petroleum products' chemicals of concern.

D.) Generally, there shall be no agricultural use of the land including forestry, fishing and mining; no hotels or lodging; no recreational uses including amusement parks, parks, camps, museums, zoos, or gardens; no residential uses; and no educational uses such as elementary and secondary schools, or day care services. These prohibited uses are specifically defined by using the North American Industry Classification System, United States, 2007 (NAICS), Executive Office of the President, Office of Management and Budget. The prohibited uses by code are: Sector 11 Agriculture, Forestry, Fishing and Hunting; Subsection 212 Mining (except Oil and Gas); Code 512132 Drive-In Motion Picture Theaters; Code 51412 Libraries and Archives; Code 53111 Lessors of Residential Buildings and Dwellings; Subsector 611 Elementary and Secondary Schools; Subsector 623 Nursing and Residential Care Facilities; Subsector 624 Social Assistance; Subsector 711 Performing Arts, Spectator Sports and Related Industries; Subsector 712 Museums, Historical Sites, and Similar Institutions; Subsector 713 Amusement, Gambling, and Recreation Industries; Subsector 721 Accommodation (hotels, motels, RV parks, etc.); Subsector 813 Religious, Grantmaking, Civic, Professional, and Similar Organizations; and Subsection 814 Private Households.

Complete copies of the No Further Action Proposal, the draft restrictive covenant, and the Department's preliminary evaluation are available for public inspection during normal business hours 8:00 a.m. to 5:00 p.m. Monday through Friday, except legal holidays at:

Pinellas County Health Department
Environmental Engineering Division
4175 E. Bay Drive, Suite 300
Clearwater, Florida 33764

Local governments with jurisdiction over the property subject to the institutional control, real property owner(s) of any property subject to the institutional control, and residents of any property subject to the institutional control have 30 days from publication of this notice to provide comments to the Department. Such comments must be sent to:

Pinellas County Health Department
Environmental Engineering Division
4175 E. Bay Drive, Suite 300
Clearwater, Florida 33764

Post Office Box 4748
Clearwater, FL 33758-4748

DECLARATION OF RESTRICTIVE COVENANT

THIS DECLARATION OF RESTRICTIVE COVENANT (hereinafter "Declaration") is made this 28 day of February, 2010 by the City of Clearwater, (hereinafter GRANTOR), whose address is Post Office Box 4748, Clearwater, Florida 33758-4748, and the Florida Department of Environmental Protection (hereinafter "FDEP").

RECITALS

A. GRANTOR is the fee simple owner of that certain real property situated in the County of Pinellas, State of Florida, more particularly described in **Exhibit A** attached hereto and made a part thereof (hereinafter the "Property").

B. The FDEP Facility Identification Number for the Property is **529804856.** The facility name at the time of this Declaration is Clearwater Police Substation;

C. The discharge of petroleum products' chemicals of concern on the Property is documented in the following report that is incorporated by reference:

1. Soil Assessment Report (hereinafter the "Report") dated February, 2008, submitted by URS Corporation

D. The Report noted in Recital C sets forth the nature and lateral extent of impacted soil on the Property. This Report confirms that soil contaminated with petroleum products' chemicals of concern, as defined by Chapter 62-777, Florida Administrative Code remains beneath the Right-of-Way in front (east) and to the side (north) of the Property and that no groundwater contamination exists. The area of impacted soil delineated on Figure 4 in the Report will be addressed by restriction.

EXHIBIT A

E. It is the intent of the restrictions in this Declaration to reduce or eliminate the risk of exposure of the contaminants to the environment and to users or occupants of the Property and to reduce or eliminate the threat of migration of the contaminants.

F. The FDEP has agreed to issue a No Further Action with Conditions (hereinafter "Order") upon recordation of this Declaration. The FDEP can unilaterally revoke the Order if the conditions of this Declaration or of the Order are not met. Additionally, should concentrations of petroleum products' chemicals of concern increase above the levels approved in the Order, or if a subsequent discharge occurs at the site, the FDEP may require site rehabilitation to reduce concentrations of contamination to the levels allowed by the appropriate FDEP rules. The Order relating to FDEP Facility No. 529804856 is on file with the Pinellas County Health Department, Environmental Health Division located at 4175 East Bay Drive, Suite 300, Clearwater, Florida 33764 and with Grace Rivera with the FDEP Waste Management Division, Bureau of Petroleum Storage Systems located at 2600 Blair Stone Road, MS 4545, Tallahassee, Florida 32399.

G. GRANTOR deems it desirable and in the best interest of all present and future owners of the Property that an Order obtained for the Property be held subject to certain restrictions and changes, all of which are more particularly hereinafter set forth.

NOW, THEREFORE, to induce the FDEP to issue the Order and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged by each of the undersigned parties, GRANTOR agrees as follows:

1. The foregoing recitals are true and correct and are incorporated herein by reference.
2. GRANTOR hereby imposes on the Property the following restrictions:

    a. The area of soil contamination as located on the Property shall remain permanently covered and maintained with an impermeable material that prevents human exposure and limits water infiltration.

    b. Excavation and construction below two feet surface elevations is not prohibited within the areas containing soils contaminated with petroleum products' chemicals of concern provided any soils contaminated with petroleum products' chemicals of concern that are excavated are removed and properly disposed of pursuant to Chapter 62-770 F.A.C. (or subsequent contamination site cleanup criteria rule(s)). Nothing herein shall limit or conflict with any other legal requirements regarding construction methods and techniques that must be taken to minimize risk of exposure while conducting work in contaminated areas. For any dewatering activities, a plan must be in place to address and ensure the appropriate handling, treatment, and disposal of any extracted groundwater that may be contaminated.

Nothing in this Declaration shall prevent, limit or restrict any excavation or construction at or below the surface outside the boundary of soils contaminated with petroleum products' chemicals of concern.

c. Generally, there shall be no agricultural use of the land including forestry, fishing and mining; no hotels or lodging; no recreational uses including amusement parks, parks, camps, museums, zoos, or gardens; no residential uses; and no educational uses such as elementary and secondary schools, or day care services. These prohibited uses are specifically defined by using the North American Industry Classification System, United States, 2007 (NAICS), Executive Office of the President, Office of Management and Budget. The prohibited uses by code are: Sector 11 Agriculture, Forestry, Fishing and Hunting; Subsection 212 Mining (except Oil and Gas); Code 512132 Drive-In Motion Picture Theaters; Code 51412 Libraries and Archives; Code 53111 Lessors of Residential Buildings and Dwellings; Subsector 611 Elementary and Secondary Schools; Subsector 623 Nursing and Residential Care Facilities; Subsector 624 Social Assistance; Subsector 711 Performing Arts, Spectator Sports and Related Industries; Subsector 712 Museums, Historical Sites, and Similar Institutions; Subsector 713 Amusement, Gambling, and Recreation Industries; Subsector 721 Accommodation (hotels, motels, RV parks, etc.); Subsector 813 Religious, Grantmaking, Civic, Professional, and Similar Organizations; and Subsection 814 Private Households.

3. For the purpose of monitoring the restrictions contained herein, FDEP or its respective successors and assigns shall have site access to the Property at reasonable times and with reasonable notice to the GRANTOR and its successors and assigns.

4. It is the intention of GRANTOR that the restriction contained in this Declaration shall touch and concern the Property, run with the land and with the title to the Property, and shall apply to and be binding upon and inure to the benefit of the successors and assigns of GRANTOR, and to FDEP, its successors and assigns, and to any and all parties hereafter having any right, title or interest in the Property or any part thereof. The FDEP, its successors and assigns may enforce the terms and conditions of this Declaration by injunctive relief and other appropriate available legal remedies. Any forbearance on behalf of the FDEP to exercise its right in the event of the failure of the GRANTOR, its successors and assigns to comply with the provisions of this Declaration shall not be deemed or construed to be a waiver of the FDEP's rights hereunder. This Declaration shall continue in perpetuity, unless otherwise modified in writing by GRANTOR, its successors and assigns and the FDEP, its successors and assigns as provided in paragraph 6 hereof. These restrictions may also be enforced in a court of

competent jurisdiction by any other person, firm, corporation, or governmental agency that is substantially benefited by this restriction.

5. In order to ensure the perpetual nature of these restrictions, GRANTOR, its successors and assigns, shall reference these restrictions in any subsequent lease or deed of conveyance, including the recording book and page of record of this Declaration.

6. This Declaration is binding until a release of covenant is executed by the FDEP Secretary (or designee) and GRANTOR or their successors and assigns and is recorded in the county land records. To receive prior approval from FDEP to remove any requirement herein, cleanup target levels established pursuant to Florida Statutes and FDEP rules must have been achieved. This Declaration may be modified in writing only. Any subsequent amendment must be executed by both GRANTOR and the FDEP or their respective successors and assigns and be recorded by GRANTOR or its successors and assigns as an amendment hereto.

7. If any provision of this Declaration is held to be invalid by any court of competent jurisdiction, the invalidity of such provision shall not affect the validity of any other provisions thereof. All such other provisions shall continue unimpaired in full force and effect.

8. GRANTOR covenants and represents that on the date of execution of this Declaration that GRANTOR is seized of the Property in fee simple and has good right to create, establish, and impose this restrictive covenant on the use of the Property. GRANTOR also covenants and warrants that the Property is free and clear of any and all liens, mortgages, or encumbrances that could impair GRANTOR'S rights to impose the restrictive covenant described in this Declaration or that would be superior to the restrictive covenant described in this Declaration.

IN WITNESS WHEREOF, the City of Clearwater has executed this instrument, this 28th day of February, 2019.

RE: Natural Attenuation Monitoring Report
Clearwater Police Substation
1310 North Martin Luther King Jr. Boulevard
Facility ID # 529804856

ENTERED
1/18/06
SD

Dear Mr. Moore

TBE, on behalf of the City of Clearwater (City), is submitting the third quarter natural attenuation monitoring report for the above site. This natural attenuation monitoring report is being submitted in accordance with the Natural Attenuation Monitoring Plan (NAMP) dated June 15, 2004, which was approved by the Florida Department of Environmental Protection (FDEP). The NAMP approval order is included as Attachment A.

The site is located on the southwest corner of the Carlton Street and North Martin Luther King Jr. Boulevard (North Greenwood Avenue) intersection in Clearwater, Florida (Figure 1). The third quarter sampling event for the natural attenuation monitoring was completed on January 4, 2006. The field activities included collecting water level measurements from all existing monitor wells and groundwater samples from MW-4, MW-5, and MW-6.

Water level measurements were collected from the six existing monitor wells and are presented in Table 1 along with historical water level data from previous site assessment work. Figure 2 shows the shallow groundwater flow direction using the relative groundwater elevation from Table 1. Figure 2 illustrates that groundwater flow direction is predominately to the northeast, which is consistent with previous reporting.

Groundwater samples were collected from monitor wells MW-4, MW-5, and MW-6 following the collection of the water level measurements. The samples were packaged on ice, shipped to Xenco Laboratories (Xenco), and analyzed for polynuclear aromatic hydrocarbons (PAHs) using Method 8310. The analytical results are presented in Table 2 and illustrated on Figure 3. Attachment B is a copy of the field log with water level measurements. Attachment C is the groundwater sampling logs for MW-4, MW-5, and MW-6. Attachment D is the analytical report from Xenco.

During the previous sampling event naphthalene and 1-methylnaphthalene were detected in MW-4. The concentrations of these compounds were above groundwater cleanup target levels (GCTLs) but below natural attenuation default levels in September 2005 (Table 2).

380 Park Place Blvd, Suite 300 • Clearwater, Florida 33759
T: 727.531.3505 • T: 800.861.8314 • F: 727.539.1294 • www.tbegroup.com

Based on the data collected from this natural attenuation monitoring event, the groundwater concentrations for the chemicals of concern have decreased to below GCTLs. No exceedances of GCTLs were detected in MW-4, MW-5 or MW-6

The next quarterly sampling event is scheduled for March 2006, at which time contaminant trends will be re-evaluated. In addition, a soil sampling plan will be submitted for PCHD approval to allow final confirmatory soil sample collection to support requesting an SRCO.

Thank you for your continued assistance with this project. If you have any questions or need additional information, please call.

Sincerely,

TBE GROUP, INC.

1.0 INTRODUCTION

URS Corporation (URS) was retained the City of Clearwater to conduct a soil assessment at the Clearwater Police Substation located at 1310 North Martin Luther King Jr. Avenue in Clearwater, Florida. This report includes the site background, the project objective, a description of field activities, an evaluation of data, conclusions, and a proposal for No Further Action with institutional and engineering controls. This soil assessment was conducted in accordance with the scope of work presented in URS' work order initiation form dated August 27, 2007.

2.0 SITE BACKGROUND

2.1 SITE DESCRIPTION

The subject property is located at 1310 North Martin Luther King Jr. Avenue in Clearwater, Florida. The physiographic location of the site is Section 10, Township 29 South, Range 15 East in Pinellas County, Florida. A site vicinity map is shown in Figure 1. The subject property is utilized as a community police substation and job skills center. A site location map is shown in Figure 2.

2.2 PROJECT HISTORY

During installation of subsurface utilities along Martin Luther King Jr. Avenue by City of Clearwater contractors in May 2002, petroleum-impacted soil was encountered. This material was excavated and was placed on and covered with visqueen. Following pre-burn analysis, this material was transported to a licensed thermal treatment facility for disposal.

Site assessment activities were initiated by TBE Group, Inc., (TBE) in September 2002. Site assessment activities included field screening of soil samples using an organic vapor analyzer (OVA), collection of soil samples for laboratory analysis, installation of six monitor wells (GW-1 and MW-2 through MW-6), and collection of groundwater samples for laboratory analysis. Field screening and laboratory analysis of soil samples indicated that petroleum-impacted soil was limited to the area south of the former excavation area and the constituents of concern were benzene, ethylbenzene, xylenes, naphthalene, and total recoverable petroleum hydrocarbons (TRPH). Detected concentrations of benzene, ethylbenzene, xylenes, and naphthalene in soil samples collected from two borings (SB-6 and SB-9) exceeded their respective leachability soil cleanup target

levels (SCTLs). The detected concentration of TRPH in the soil sample collected from boring SB-6 exceeded the residential SCTL of 460 milligrams per kilogram (mg/kg) and leachability SCTL (340 mg/kg). The detected concentration of TRPH in the soil sample collected from boring SB-9 exceeded the industrial SCTL (2,700 mg/kg) and leachability SCTL.

Laboratory analysis of groundwater samples indicated that only the sample collected from monitor well MW-4 contained petroleum constituents (i.e., naphthalene, 1-methylnaphthalene, and 2-methylnaphthalene) at concentrations that exceeded groundwater cleanup target levels (GCTLs). However, concentrations of these constituents in this groundwater sample were below natural attenuation default source concentrations (NADSCs). Groundwater samples collected from the remaining five monitor wells contained non-detectable to minimal concentrations of petroleum constituents. These findings were presented in a Site Assessment Report dated February 2003. Pertinent tables and figures from this report are provided in Appendix A.

TBE conducted supplemental site assessment activities in June 2004. TBE collected soil samples at five locations (SS-1 through SS-5) in the vicinity of soil borings SB-6 and SB-9. Soil samples were screened in the field with an OVA and retained for laboratory analysis. Soil samples collected at SS-1 through SS-3 were analyzed for benzene, ethylbenzene, toluene, xylenes, methyl-tert-butyl ether (MTBE), naphthalene, and TRPH using the synthetic precipitation leaching procedure (SPLP). Soil samples collected at SS-4 and SS-5 were analyzed for TRPH. A groundwater sample was collected from monitor well MW-4 and analyzed for benzene, ethylbenzene, toluene, xylenes, MTBE, and polynuclear aromatic hydrocarbons.

The findings of this supplemental site assessment indicated that the soil sample collected at location SS-2 contained leachable concentrations of ethylbenzene, xylenes, and naphthalene that exceeded their respective GCTLs. Concentrations of TRPH in the soil samples collected at locations SS-4 (81.4 mg/kg) and SS-5 (93.3 mg/kg) were below the residential and leachability SCTLs. The groundwater sample collected from monitor well MW-4 did not contain detectable concentrations o f benzene, ethylbenzene, toluene, xylenes, and MTBE. Detected concentrations of naphthalene, 1-methylnaphthalene, and 2-methylnaphthalene in this groundwater sample were below their respective GCTLs. These findings were presented in a Site Assessment Report Addendum dated June 2004. Pertinent tables and figures from this report are provided in Appendix B.

In correspondence dated August 11, 2004, the Pinellas County Health Department (PCHD) stated that site assessment activities were complete and approved Natural Attenuation Monitoring, which had been proposed by TBE. The Florida Department of Environmental Protection (FDEP) formally approved Natural Attenuation Monitoring in correspondence dated December 17, 2005. The FDEP specified the collection of groundwater samples from monitor wells MW-4, MW-5, and MW-6 on a quarterly basis. These samples were to be analyzed for polynuclear aromatic hydrocarbons.

TBE subsequently conducted quarterly groundwater monitoring as specified by the FDEP. A summary of the quarterly groundwater monitoring analytical results is provided in Appendix C of this report. Concentrations of naphthalene, 1-methylnaphthalene, and 2-methylnaphthalene remained below GCTLs for two consecutive quarterly groundwater monitoring events. Accordingly, TBE proposed No Further Action with Conditions as promulgated under Chapter 62-770.680, Florida Administrative Code (FAC).

In correspondence dated March 23, 2007, the PCHD indicated that additional assessment of the unsaturated soil would be required to fully delineate the extent of impacted soil prior to approval of No Further Action with Conditions. URS subsequently met with the PCHD to develop a plan to complete the soil assessment.

3.0 OBJECTIVE

The objective of this project was to conduct a soil assessment to delineate the extent of petroleum impacted soil in order to propose a No Further Assessment with institutional or engineering controls.

4.0 FIELD ACTIVITIES

URS provided the PCHD with a schedule of field activities in correspondence dated November 30, 2007. Field activities included the collection and analysis of soil samples. Field activities were performed in accordance with the FDEP Standard Operating Procedures (SOP) for Field Activities (DEP-SOP-002/01). Since soil samples were collected in roadways (Martin Luther King Jr. Avenue and Carlton Street), URS prepared and submitted a Maintenance of Traffic Plan and Right-of-Way Permit to the City of Clearwater.

URS collected soil samples at seven boring locations (SB-4, SB-5, SB-7, SB-10, SB-11, SB-12, and SB-21) on December 27, 2007. The locations of these soil borings are shown in Figure 3. A Geoprobe drill rig was used to facilitate advancement of the borings through asphalt and the sub-base. Soil samples were the collected with stainless steel hand augers. At boring location SB-10, soil samples were collected from 1.5 feet to 2.0 feet below land surface (1.5 – 2.0 feet) and from 3.5 feet to 4.0 feet below land surface (3.5 – 4.0 feet). Soil was damp at a depth of approximately 3.8 feet and groundwater was measured at a depth of approximately 4.3 feet below land surface in monitor well MW-4. At the remaining boring locations, soil samples were collected from 1.0 foot to 1.5 feet below land surface (1.0 – 1.5 feet) and from 3.0 feet to 3.5 feet below land surface (3.0 – 3.5 feet). Sampling equipment was decontaminated between sample locations.

Soil samples were screened in the field with an OVA equipped with a flame ionization detector using the headspace method. An activated charcoal filter was used to screen for methane, a naturally-occurring organic compound. Filtered soil sample readings were subtracted from the unfiltered sample readings in order to evaluate the net concentration of organic vapors in the soil samples.

Soil samples were placed in laboratory-supplied containers. The containers were sealed, labeled, and immediately placed in ice-filled coolers. Chain-of-Custody forms were completed and the samples were delivered to ELAB, Inc., for analysis. The soil samples were analyzed for select volatile organic compounds (benzene, ethylbenzene, toluene, xylenes, and MTBE by EPA Method 8260, polynuclear aromatic hydrocarbons (EPA Method 8270), and TRPH using the Florida Petroleum Range Organic (FL-PRO) method.

5.0 RESULTS AND DATA EVALUATION

5.1 SOIL ORGANIC VAPOR ANALYZER RESULTS

The results of soil sample field screening using an OVA on December 27, 2007 are summarized in Table 1. The soil samples obtained from borings SB-5, SB-7 SB-11, SB-12, and SB-21 did not exhibit detectable OVA readings. The soil sample collected from boring SB-4 at 1.0 – 1.5 feet exhibited a net OVA reading of 0.3 parts per million (ppm). The soil sample collected at 3.0 – 3.5 feet from this boring did not exhibit detectable OVA readings. The soil sample collected from boring SB-10 at 1.5 – 2.0 feet exhibited a net OVA reading of 805 ppm. The soil sample collected at 3.5 – 4.0 feet from this boring exhibited a net OVA reading of 2,925 ppm.

5.2 SOIL ANALYTICAL RESULTS

A summary of the analytical results of the soil samples collected on December 27, 2007 is presented in Table 1. The complete laboratory report and Chain-of-Custody forms are provided in Appendix D. The laboratory analytical results were compared to SCTLs as established in Table II of Chapter 62-777, FAC.

Soil samples collected from borings SB-4, SB-7, SB-11, SB-12, and SB-21 did not contain detectable concentrations of benzene, ethylbenzene, toluene, xylenes, MTBE, and polynuclear aromatic hydrocarbons. These soil samples contained detectable concentrations of TRPH. Concentrations of TRPH ranged from 3.8 mg/kg in the sample collected from boring SB-12 (3.0 – 3.5 feet) to 170 mg/kg in the sample collected from boring SB-4 (1.0 – 1.5 feet). Concentrations of TRPH in these samples were below the residential SCTL (460 mg/kg) and leachability SCTL (340 mg/kg).

The soil samples collected from boring SB-5 did not contain detectable concentrations of benzene, ethylbenzene, toluene, xylenes, and MTBE. The samples collected at 1.0 – 1.5 feet and 3.0 – 3.5 feet from this soil boring contained detectable concentrations of several polynuclear aromatic hydrocarbons. Concentrations of non-carcinogenic polynuclear aromatic hydrocarbons in these samples were below their respective SCTLs.

Since the soil samples collected from boring SB-5 contained detectable concentrations of several carcinogenic polynuclear aromatic hydrocarbons, URS calculated the total benzo(a)pyrene equivalents using the benzo(a)pyrene conversion table which has been developed by the FDEP. Total benzo(a)pyrene equivalents calculations are provided in Appendix E. The total benzo(a)pyrene equivalents value for the sample collected at 1.0 – 1.5 feet was 0.1 mg/kg, which did not exceed the residential SCTL of 0.1 mg/kg. The total benzo(a)pyrene equivalents value for the sample collected at 3.0 – 3.5 feet was 0.8 mg/kg, which slightly exceeded the industrial SCTL (0.7 mg/kg) but was below the leachability SCTL (8.0 mg/kg). Concentrations of TRPH in the sample collected at 1.0 – 1.5 feet (410 mg/kg) and 3.0 – 3.5 feet (400 mg/kg) were below the residential SCTL (460 mg/kg) but exceeded the leachability SCTL (340 mg/kg).

The soil sample collected at 1.5 – 2.0 feet from boring SB-10 contained ethylbenzene at a concentration of 4.9 mg/kg, which was below the residential SCTL (1,500 mg/kg) but exceeded the leachability SCTL (0.6 mg/kg). This soil sample did not contain detectable concentrations of benzene, toluene, xylenes, and MTBE. The sample collected from this boring at 3.5 – 4.0 feet

contained ethylbenzene at a concentration (60 mg/kg) which was below the residential SCTL but exceeded the leachability SCTL. This soil sample also contained xylenes at an estimated concentration of 0.099 mg/kg, which was below the residential SCTL (130 mg/kg) and leachability SCTL (0.2 mg/kg). This soil sample did not contain detectable concentrations of benzene, toluene, and MTBE.

The two samples collected at soil boring SB-10 contained detectable concentrations of several carcinogenic and non-carcinogenic polynuclear aromatic hydrocarbons. These soil samples contained three non-carcinogenic polynuclear aromatic hydrocarbons (naphthalene, 1-methylnaphthalene, and 2-methylnaphthalene) at concentrations that exceeded their respective leachability SCTLs. Further, the soil sample collected at 3.5 – 4.0 feet contained naphthalene at a concentration (110 mg/kg) that exceeded the residential SCTL (55 mg/kg) but was below the industrial (300 mg/kg). Concentrations of remaining non-carcinogenic polynuclear aromatic hydrocarbons were below their respective SCTLs.

Total benzo(a)pyrene equivalents calculations for the soil samples collected from boring SB-10 are also provided in Appendix C. The total benzo(a)pyrene equivalents value for the sample collected at 1.0 – 1.5 feet was non-detectable. The total benzo(a)pyrene equivalents value for the sample collected at 3.0 – 3.5 feet was 0.1 mg/kg, which did not exceed the residential SCTL. Concentrations of TRPH in the sample collected at 1.0 – 1.5 feet (6,400 mg/kg) and 3.0 – 3.5 feet (11,000 mg/kg) exceeded the industrial SCTL (2,700 mg/kg) and leachability SCTL (340 mg/kg).

6.0 CONCLUSIONS AND PROPOSAL FOR NO FURTHER ACTION WITH INSTITUTIONAL AND ENGINEERING CONTROLS

The findings of this soil assessment indicate that the lateral extent of unsaturated soil impacted with petroleum constituents has been adequately delineated as shown in Figure 4. Based on the findings of this soil assessment and previous assessment and monitoring activities conducted by TBE, it is the opinion of URS that conditions have been met to propose No Further Action with institutional and engineering controls (Risk Management Options Level II) in accordance with the provisions of Chapter 62-770.680(2), FAC. It is the opinion of URS that NFA with institutional controls is appropriate since the following conditions have been met:

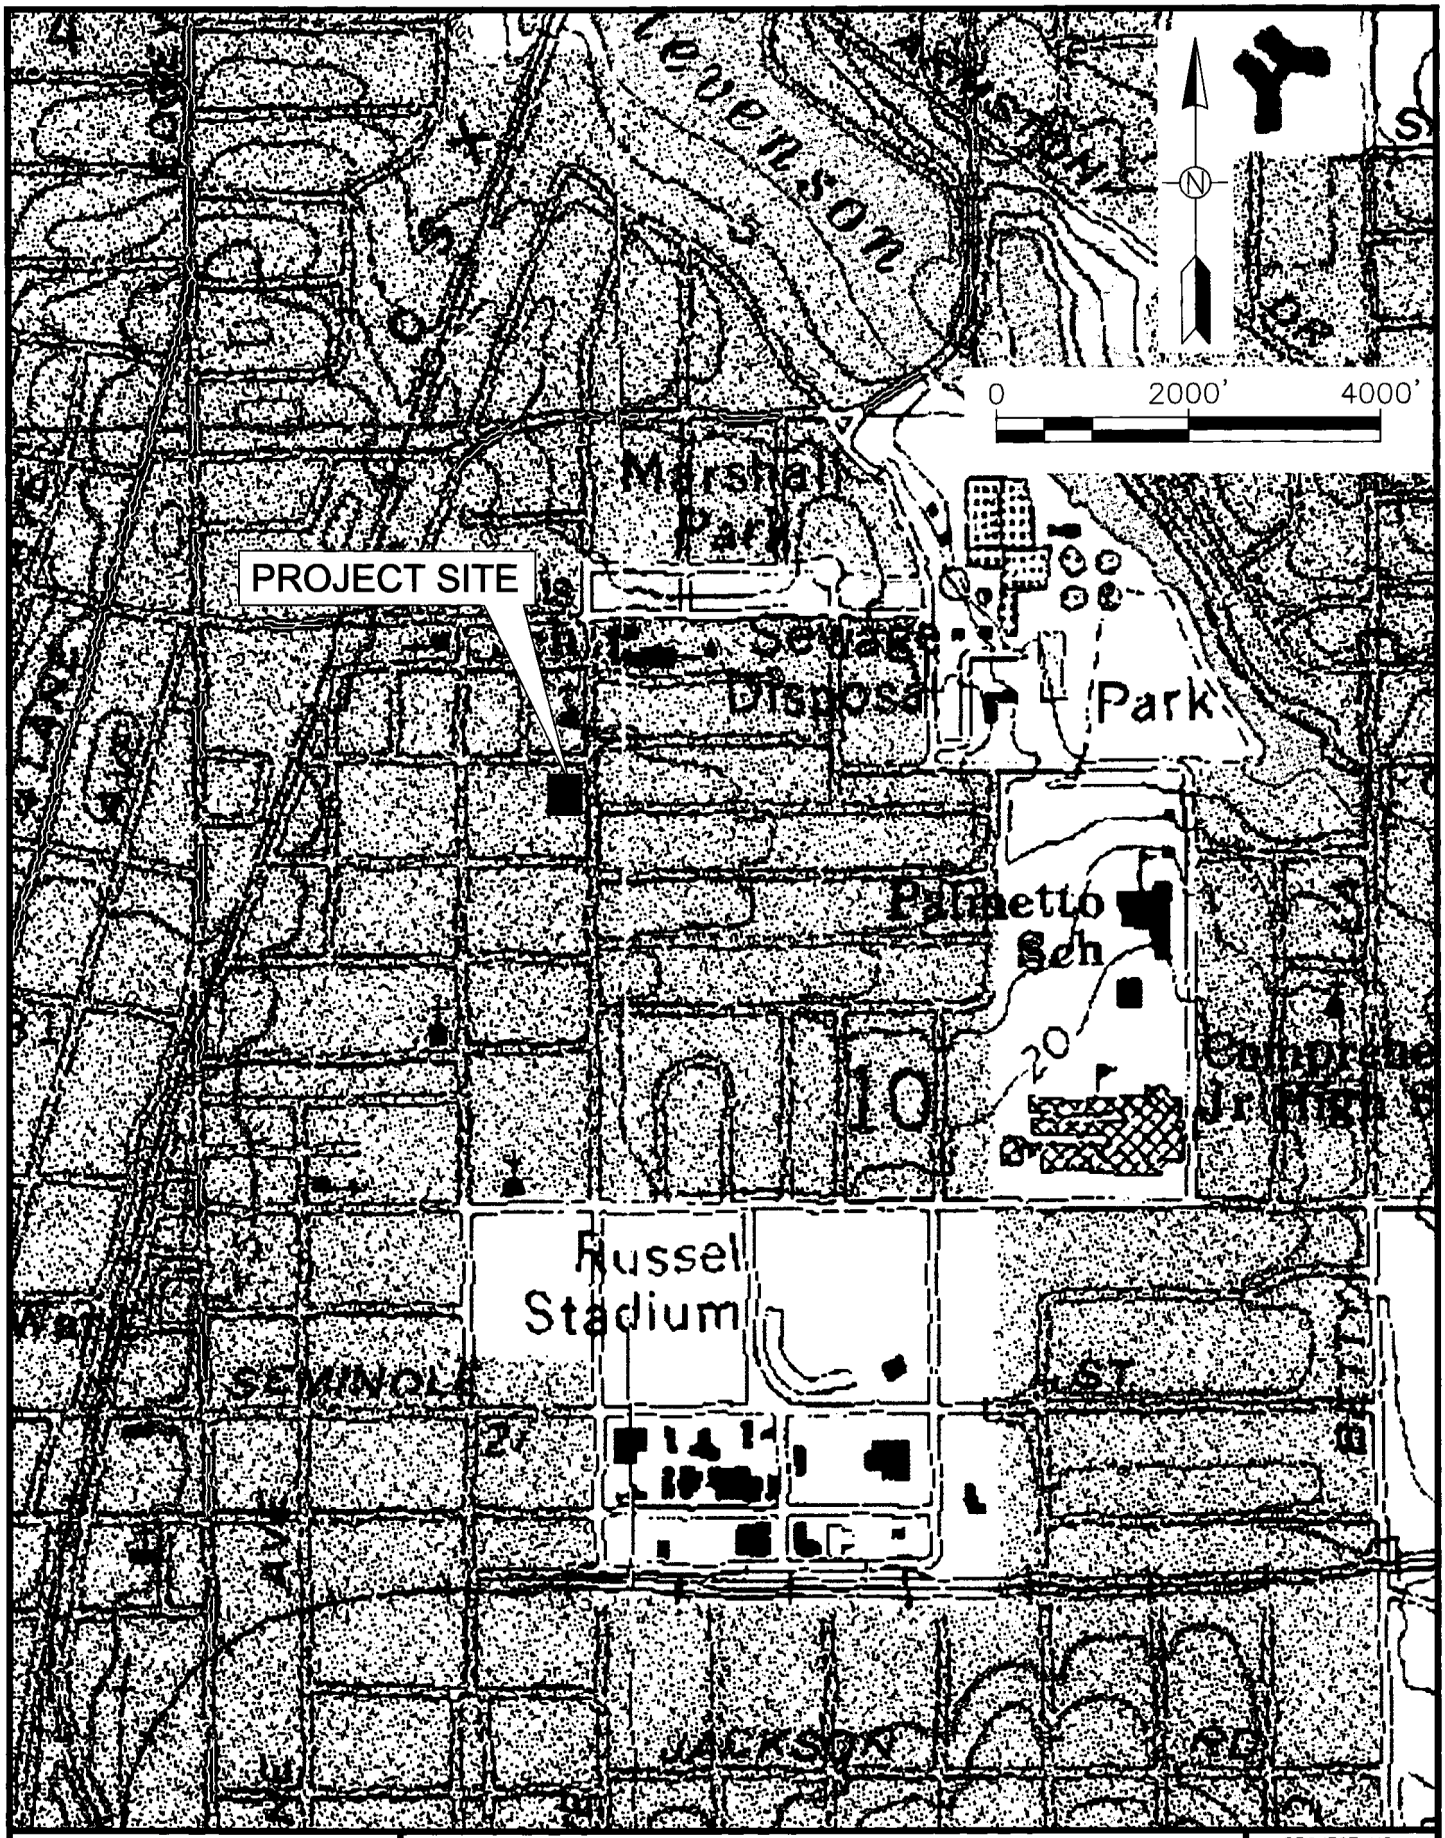

- Free product is not present;
- Impacted soil in the unsaturated zone is completely covered with an impervious material (asphalt) in a roadway which preludes direct exposure;

- Groundwater monitoring data indicates that petroleum constituents in the unsaturated zone of soil have not leached into the surficial aquifer at concentrations above applicable GCTLs.
- The current real property owner is in agreement with the implementation of institutional controls.

Impacted media at the subject property is limited to soil. Groundwater analytical data indicates that petroleum constituents in the surficial aquifer have naturally attenuated. A summary of soil analytical results is provided in Table 1 of this report. A summary of groundwater analytical results is provided in Appendix C of this report.

As noted above, the area of impacted soil is beneath an active roadway and is covered with asphalt. This impervious cover will serve as the engineering control. The City of Clearwater will maintain responsibility for the proper condition of this road in order to prevent direct human exposure. In addition, institutional controls in the form of a deed restriction will be implemented which will document the nature and extent of impacted soil.

APPENDIX I

AAI Questionnaire

In accordance with ASTM 1527-21 and in order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001, the user (**purchaser**, client or client representative) must provide the following information (if available) to the *environmental professional* (**EnviroTrac Ltd**). Failure to provide this information could result in a determination that "*all appropriate inquiry*" (AAI) is not complete.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?
No

2. Are you aware of any area use limitations (AULs), such as engineering controls, land use restriction or institutional controls that are in place at the property and/or have been filed or recorded in a registry under federal, trial, state or local law?
No

3. As the *user* of this ESA do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property, so that you would have specialized knowledge of the chemicals and processes used by this type of business?
History Restaurant
Residential on top

4. Does the purchase price being paid for this property reasonable reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?
Slightly above

5. Are you aware of commonly known or reasonably ascertainable information about the property that would help the *environmental professional* to identify conditions indicative of releases or threatened releases?

   a. Do you know the past uses of the property?

   b. Do you know of specific chemicals that are present or once were present at the property?
No

   c. Do you know of spills or chemical releases that have taken place at the property?
No

   d. Do you know of any environmental cleanups that have taken place at the property?
No

6. As the *user* of this ESA, based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of contamination at the property?

No

In addition to the above questions, certain information should be collected, if available, and provided to the *environmental professional*. This information is intended to assist the *environmental professional*, but is not necessarily required to qualify for one of the LLPs.

7. The reason why the ESA is required (i.e. sale, purchase, exchange, etc.).

potential purchase

8. The complete name, correct address and/or parcel number for the property (a map or other documentation showing property location and boundaries is helpful).

Provide

9. A description of the property (i.e. acreage, square footage, number of buildings, other structures, age of buildings, above/underground storage tanks, etc.) Provided

10. Knowledge or previous owners and/or previous uses of the property?

listing agent - Pat Green
patgreenerealtor@gmail.com

11. The site contact name and number.

813-618-3802

12. Previous reports available? Any other available documentation, correspondence, etc. concerning the environmental condition of the property? No

Completed By: _____ Date: 11/6/23
Name and Title

APPENDIX J

CORPORATE RESUME

William Heim
Senior Project Manager

EnviroTrac

willh@envirotrac.com
813.626.8443

Experience Snapshot

Mr. Heim is a Senior Project Manager with over 25 years of experience as a Hydrogeologist/Senior Project Manager. Specific experience includes: Petroleum contamination and hazardous waste assessments; geotechnical investigations, environmental property assessments (Phase I/II ESAs); underground storage tank (UST) assessments, implementation and oversight of various remedial strategies including chemical oxidants and episodic groundwater extractions; health and safety monitoring; soil and groundwater sampling quality assurance and quality control. Mr. Heim also has extensive experience in NPDES permitting and the preparation/ implementation of Stormwater Pollution Preventative Plans (SWPPs) and Spill Prevention Control & Countermeasure (SPCC) Plans.

Licenses/Certifications

OSHA Certification, 40 hour Hazwoper Health and Safety Training, OSHA, 8 hour Health and Safety Management Site Supervision and Hazwoper Refresher (current)

American Petroleum Institute (API) Work Safety Key Training (current)

American Red Cross Standard First Aid/CPR and AED

Smith System Driver Safety Training

FDEP Qualified Stormwater Management Inspector

Lead Renovator, Renovation, Repair & Painting (RRP) Certification

Certificate of Training, 8 hour Florida Wetland Delineation Workshop

Strengths

- Environmental Property Assessments (Phase I & II)
- Petroleum Contamination and Hazardous Waste Assessments
- Environmental Permitting/ Compliance/Operation & Maintenance (O&M)
- Geotechnical Investigations
- Emergency Response
- UST Assessments
- Health & Safety Monitoring
- Soil & Groundwater Sampling
- Monitoring Well & Soil Boring Installations
- Quality Assurance/Quality Control
- Lead (Pb) Testing

Education

- BS Geology, University of South Florida, 1995

Experience highlight 2023

About EnviroTrac

EnviroTrac is an environmental consulting and remediation firm delivering a wide range of services for a diverse clientele throughout the United States. With a staff of over 150, we are consistently ranked among the Top 200 Environmental Consulting Firms by Engineering News-Record (ENR).

"We Deliver Value, Quality and Innovation Safely to Our Clients"

Professional Affiliations

- National Groundwater Association
- Florida Association of Environmental Professionals
- Tampa Bay Association of Environmental Professionals

Professional History

- 1998 - Present, EnviroTrac Ltd., Project Manager

Professional Highlights and Selected Projects

- **Phase I ESA/Phase II ESA Due Diligence.** Currently manages and reviews technical aspects of all due diligence projects. Senior reviewer has overseen final deliverables for 100+ environmental Phase I/II reports throughout Florida and Georgia including numerous large acre wetland mitigation bank properties. Projects included an evaluation of hazard waste materials and petroleum products and remediation recommendations and implementation, when warranted.

- **Multiple Assessment and Remediation Projects, Florida Department of Environmental Protection.** Currently manage over 100 petroleum impacted facilities under the FDEP's Petroleum Restoration Program as an approved Agency Term Contractor. Prior experience includes performance of assessment and remediation activities at over 400 locations throughout Florida over the last 20 years.

- **Project Manager for Interchange Improvements between I-75 & Bruce B. Downs Boulevard, PCL Civil Constructors Inc. (2007)** Coordinated permitting, including the installation of temporary wells and subsequent data evaluation, for a large scale dewatering project which required a Short-Term NPDES permit. Maintained permit for project duration through the re-sampling and reanalysis of semiannual effluent samples.

- **Project Manager for Improvements to I-275 Corridor, West of Hillsborough River, PCL Civil Constructors Inc. (2007-2008)** Coordinated permitting, including the installation of temporary wells and subsequent data evaluation, for a large scale dewatering project which required a Short-Term NPDES permitting along development corridor. Maintained permit for project duration through the re-sampling and reanalysis of semiannual effluent samples. Coordinated work through SWFWMD, Hillsborough County, FDOT and FDEP. Prepped multiple SWPPPs for prime and subcontractors.

- **Project Manager for Crosstown Connector Corridor, PCL Civil Constructors Inc. & Archer Western Contractors, Ltd. (2010-2014)** Project Manager for a project which required the investigation and evaluation of water quality samples on multiple parcels pursuant to the preparation of a written dewatering plan and the acquisition of Short-Term NPDES Permits. Coordinated permitting activities, including the installation of temporary wells and subsequent data evaluation. Conducted source removal/assessment activities in ROWs/CSX corridor as part of emergency response activities, multiple locations.

CORPORATE RESUME

John Ferrill, PG

Vice President/Senior Project Manager

EnviroTrac

johnf@envirotrac.com
813.626.8443

Experience Snapshot

Mr. Ferrill has worked over 30 years as a geologist/project manager in the environmental consulting and engineering fields. Specific experience includes: Petroleum contamination and hazardous waste assessments, geotechnical investigations, environmental site assessments (Phase I & II), underground storage tank (UST) assessments, regulatory compliance inspections, the design, installation and operation of soil and groundwater remediation systems, risk assessments, emergency response, health and safety monitoring, soil and ground water sampling, quality assurance and quality control, in addition to technical and regulatory support. Mr. Ferrill has worked on projects with a wide range of contaminants including petroleum hydrocarbons, chlorinated solvents, PCBs, metals and asbestos.

Licenses/Certifications

Professional Geologist, PG #1953, State of Florida

Florida Pollutant Storage Systems Contractor #PCC 1256788

Certified FDEP Storm Water Management Inspector

Certified Florida Dept. of Health Environmental Health Professional

Lead (Pb) Renovator, Renovation, Repair, and Painting (RRP) Certification

SCDHEC South Carolina Class A/B UST Operator Training

Certificate of Training: Florida Wetland Delineation Workshop

ASTM Technical and Professional Training: ESAs for Commercial Real Estate

OSHA Certification, 40 hr Health & Safety Training

OSHA Certification, 8 hr. Health & Safety Management Site Supervision

OSHA Certification 8 hr Hazwoper Refresher (current)

American Petroleum Institute (API) WorkSafe Safety Key Training

Smith System Driver Safety Training

Strengths

- Phase I & II ESAs
- Petroleum Contamination & Hazardous Waste Assessments
- UST Assessments & Closures
- Insurance Claims Investigation
- Insurance Litigation Support
- Regulatory Compliance Inspections
- Emergency Response
- Remedial Investigation/Feasibility Studies
- Risk Assessment, RCBA, Fate & Transport Modeling
- Bioremediation of Contaminated Soil & Groundwater
- Remedial Design & Construction

Education

- MS Environmental Science & Engineering, Colorado School of Mines, 1994
- BA Geology, The Colorado College, 1984

Experience highlight 2021

Professional Affiliations

National Ground Water Association

National Association of Environmental Professionals

Tampa Bay Association of Environmental Professionals (past VP/Treasurer)

Professional History

- 1985 – 1986, GES Party Ltd., Australia, Seismic Survey Technician
- 1989 – 1991, Enviropact, Staff Scientist
- 1991 – 1992, Halliburton NUS, Staff Geologist
- 1994 – 1995, Soil Recycling Technologies, Inc. (SRTI) Project Manager
- 1995 – 1996, ViroGroup, Project Manager
- 1996 – Present, EnviroTrac Ltd., VP and Senior Project Manager

Professional Highlights and Selected Projects

- Mr. Ferrill has been involved in hundreds of subsurface soil and ground-water investigations (Phase II & III ESAs). Investigation and delineation techniques have included soil borings, ground-water monitoring well networks, Direct Push/GeoProbe sampling, geophysical methods, soil-gas surveys, aquifer testing, surface water and sediment sampling, waste characterization (soil piles, drums, USTs, ASTs, landfills, etc.), test pits and computer fate & transport modeling. Materials investigated have included petroleum products (heating/fuel oil, aviation gas, diesel and gasoline), waste oil, PCB oils, pesticides, coal tar, heavy metals and chlorinated solvents.
- Since 1996, Mr. Ferrill has been the program contact for several major oil companies in Florida. Active contracts included the management of over 500 retail petroleum facilities. Services include site development, regulatory compliance monitoring and site assessment/remediation.
- Mr. Ferrill is well versed in various state funded cleanup programs and is currently the manager for EnviroTrac's Florida Department of Environmental Protection's (FDEP) Agency Term Contractor (ATC) program which provides petroleum contamination site response action services in all three regions of the state (North, Central and South).
- Mr. Ferrill has worked with several major oil companies to develop and/or manage regulatory compliance programs associated with retail station and bulk plant operations. Services included state and local file reviews, PBS compliance, UST system and monitoring inspections, waste minimization evaluation, onsite waste inspection (drums, soil piles, etc.), SPCC plans, potable well surveys, remediation system inspections and evaluations, site sketches, photo-documentation, database management, documentation of non-compliance issues, follow-up audits and reporting.

About EnviroTrac

EnviroTrac is an environmental consulting and remediation firm delivering a wide range of services for a diverse clientele throughout the United States. With a staff of over 150, we are consistently ranked among the Top 200 Environmental Consulting Firms by Engineering News-Record (ENR).

"We Deliver Value, Quality and Innovation Safely to Our Clients"

Professional Highlights and Selected Projects

- Mr. Ferrill has worked with several corporate, industrial and municipal clients to coordinate environmental audits and due diligence related to audits, mergers and/or acquisitions involving up to several hundred retail and bulk plant facilities. Services included regulatory file reviews, UST system and monitoring inspections, multi-media sampling to establish baseline contaminant levels, remediation system inspections and evaluations, photo-documentation, database management and reporting.
- Mr. Ferrill was retained as a consultant to a major insurance company to assist in the negotiations of claims for a Florida based portfolio of over 25 locations. Mr. Ferrill evaluated existing soil and ground-water data collected, evaluated the remediation technologies implemented or proposed for implementation and their effectiveness, conducted forensic analyses to determine the ages of plumes and potential contributing sources and finally, prepared cost and cost allocation evaluations.
- Mr. Ferrill has and continues to provide insurance claim support on over 100 locations throughout the state of Florida. Claims range from emergency response projects to retail service stations to larger scale industrial facilities working under direct contract to both the major insurance carriers as well as on behalf of the individual policy carriers.
- Mr. Ferrill has extensive experience in the selection, design, installation and maintenance of a wide range of soil and ground water remediation systems at over 300 sites throughout the southeastern United States. Remedial systems have included both active and passive free product recovery, traditional pump and treat, soil-vapor extraction, air sparging, bioventing, bioremediation, excavation, dual phase extraction, steam injection, oxidation technologies, oxygen releasing compounds, natural attenuation and the development of innovative technologies.

CORPORATE RESUME

Kristina Miller
Project Manager

kmiller@envirotrac.com
813.626.8443

Experience Snapshot

Ms. Miller has 17 years of scientific experience in Florida, ranging from laboratory testing, to industrial water cleanup, to the environmental consulting field. Her experience as a Project Manager in the environmental consulting field has mainly focused on due diligence, site assessment and risk assessments. As a project manager she is specialized in a variety duties ranging from field services; soil and groundwater assessments and remediation; contamination removal, transport, and disposal; radioactive waste sampling, UST removal, analytical data interpretation and water well/ soil boring installation oversight, monitoring, and analyses.

Licenses/Certifications

OSHA Certification 40 hour Hazwoper Health and Safety Training and Hazwoper refresher (current)

Florida Licensed Asbestos Inspector

Smith System Driver Safety Training

American Red Cross Standard First Aid/ CPR and AED

American Petroleum Institute (API) Work Safety Key Training (current)

Strengths

- Environmental Property Assessments (Phase I / Phase II)
- UST Assessments
- Health & Safety Monitoring
- Soil Vapor/IAQ Sampling
- Soil & Groundwater Sampling
- Monitoring Well & Soil Boring Installations
- Project Management
- Site Closure & Risk Options Oversight
- Technical Reporting

Education

Professional History

- 2016 - Present: EnviroTrac Ltd., Project Manager
- 2006-2016 - Terracon Consultants, Inc. Environmental Scientist/Project Manager
- 2005 - Severn Trent Laboratories, Wet Chemistry Lab Technician
- 2004 - IMC Phosphates, Research & Development Technician

Professional Highlights and Selected Projects

- Ms. Miller has managed due diligence portfolios for multiple 2,000+ acre properties as part of citrus farm, agricultural land acquisitions and large acre wetland mitigation banks. Projects included an evaluation of hazard materials and petroleum products and remediation recommendations and implementation, if warranted.
- Ms. Miller has conducted hundreds of ASTM Phase I/II ESAs in Florida, Georgia, South Carolina, Alabama, and New York in addition to transaction screens, RSRAs, limited site assessments, and environmental report peer reviews.
- Ms. Miller is well versed in state-funded cleanup programs and currently manages numerous sites for EnviroTrac's Florida Department of Environmental Protection (FDEP) Agency Term Contractor (ATC) program which provides petroleum contamination site response action services throughout the state.
- Ms. Miller has been involved in hundreds of subsurface soil and groundwater investigations. Investigation and delineation techniques have included soil borings, groundwater monitoring well networks, Direct Push/GeoProbe sampling, geophysical methods, surface water and sediment sampling, waste characterization (soil mounds, drums, USTs, ASTs, etc.), and test pits. Materials investigated have included petroleum products (heating/fuel oil, aviation gas, diesel and gasoline), waste oil, PCB oils, PFOS/PFOA, pesticides, coal tar, heavy metals, and chlorinated solvents.
- Ms. Miller conducted environmental corridor studies for the Drew Park stormwater redevelopment project and Pinellas County Alternative Analysis project.
- Ms. Miller prepares FDEP permit applications for local waste tire processing businesses.
- Ms. Miller has conducted numerous indoor air quality, radon, mold, and asbestos inspections.
